 TRV520P/TRV525/TRV620E/TRV720/TRV720E

NP-F550 battery pack (1) DCR-TRV420E: AEP

4 CR2025 lithium battery (1)

The lithium battery is already installed in your camcorder.

- **5** R6 (Size AA) battery for Remote Commander (2)
- 6 A/V connecting cable (1)
- 7 Shoulder strap (1)

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK A OR DOTTED LINE WITH MARK A ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

- |8| Lens cap (1)
- 9 **21-pin adaptor** (1) DCR-TRV320E: AEP, UK, EE, NE, RU/TRV420E: AEP/TRV520E: AEP/TRV620E/TRV720E: AEP
- 10 2-pin conversion adaptor (1) DCR-TRV320: E, HK/TRV320E: E, HK/TRV320P/TRV520: E, HK/TRV520E: E, HK/TRV520P: E/TRV720: E/TRV720E: E, HK
- 2-pin conversion adaptor (1) DCR-TRV520: JE/TRV520E: JE
- 12 Carrying bag (1) DCR-TRV320P/TRV520P
- 13 PC serial cable (1)
- 14 "Memory Stick" (1)
- 15 Application software: PictureGear 4.1 Lite (CD ROM) (1)

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE A SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer.

- Check the area of your repair for unsoldered or poorly-soldered connections. Check the entire board surface for solder splashes and bridges.
- 2. Check the interboard wiring to ensure that no wires are "pinched" or contact high-wattage resistors.
- 3. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
- Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.

- 5. Check the B+ voltage to see it is at the values specified.
- 6. Flexible Circuit Board Repairing
 - Keep the temperature of the soldering iron around 270 °C during repairing.
 - Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
 - Be careful not to apply force on the conductor when soldering or unsoldering.

SERVICE NOTE

1. POWER SUPPLY DURING REPAIRS

In this unit, about 10 seconds after power is supplied (8.4 V) to the battery terminal using the service power cord (J-6082-223-A), the power is shut off so that the unit cannot operate.

This following two methods are available to prevent this. Take note of which to use during repairs.

Method 1.

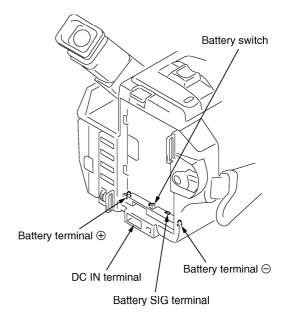

Connect the servicing remote commander RM-95 (J-6082-053-B) to the LANC jack, and set the remote commander switch to the "ADJ" side.

Method 2.

Press the battery switch of the battery terminal using adhesive tape, etc.

Method 3.

Use the DC IN terminal. (Use the AC power adaptor.)

2. TO TAKE OUT A CASSETTE WHEN NOT EJECT (FORCE EJECT)

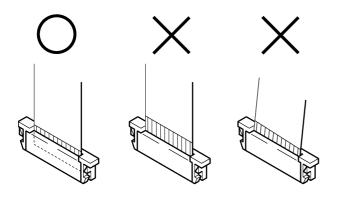

- 1 Refer to 2-4 to remove the front panel assembly.
- 2 Refer to 2-5 to remove the cabinet (L) assembly.
- 3 Refer to 2-6 to remove the cabinet (R) assembly.
- 4 Refer to 2-15 to remove the battery panel assembly.
- 5 Disconnect CN4401 of VC-235 board.
- 6 Add +5 V from the DC POWER SUPPLY and unload with a

pressing the cassette lid. 7 Pull the timing belt in the direction of the arrow with a pincette while pressing the cassette lid (be careful not to damage it) to adjust the bending of a tape. Press the cassette lid to rise the cassette compartment Pincette [DC power supply] (+5V) Timing belt 000 8 Let go your hold the cassette lid and rise the cassette compartment to take out a cassette Loading motor Disconnect CN4401 of VC-235 board. Timing belt Adjust the bending of a tape

3. NOTE FOR REPAIR

Make sure that the flat cable and flexible board are not cracked of bent at the terminal.

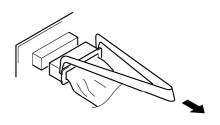

Do not insert the cable insufficiently nor crookedly.

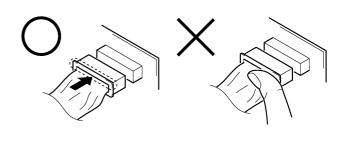

Cut and remove the part of gilt which comes off at the point. (Be careful or some pieces of gilt may be left inside)

When remove a connector, don't pull at wire of connector. It is possible that a wire is snapped.

When installing a connector, don't press down at wire of connector. It is possible that a wire is snapped.

4. LCD TYPE CHECK

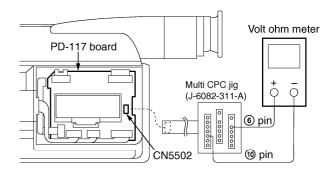

By measuring the resistor value between Pin (6) of CN5502 and Pin (10) of CN5502 on PD-117/118 board, the type of LCD can be discriminated.

Note: About PD-117/118 board and LCD module, discriminate LCD type on the machine, and replace the same type.

PD-117/118 board CN5502

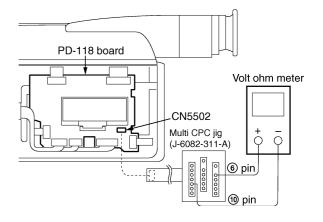

Resistor value	LCD type	PD board					
1 kΩ	2.5 LCD TYPE S 61 k	PD-117 (2.5 LCD TYPE S 61 k)					
1.5 kΩ	2.5 LCD TYPE C 61 k	PD-117 (2.5 LCD TYPE C 61 k)					
2.2 kΩ	2.5 LCD	PD-117 (2.5 LCD TYPE S 123 k)					
	TYPE S 123 k						
$4.7~\mathrm{k}\Omega$	3 LCD TYPE S	PD-118 (3 LCD TYPE S)					
5.6 kΩ	3.5 LCD TYPE S	PD-118 (3.5 LCD TYPE S)					
$6.8~\mathrm{k}\Omega$	3.5 LCD TYPE C	PD-118 (3.5 LCD TYPE C)					
8.2 kΩ	4 LCD TYPE S	PD-118 (4 LCD TYPE S)					
10 kΩ	4 LCD TYPE C	PD-118 (4 LCD TYPE C)

SELF-DIAGNOSIS FUNCTION

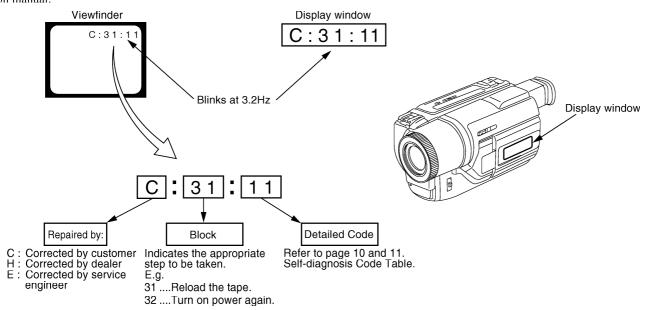

1. Self-diagnosis Function

When problems occur while the unit is operating, the self-diagnosis function starts working, and displays on the viewfinder or Display window what to do. This function consists of two display; self-diagnosis display and service mode display.

Details of the self-diagnosis functions are provided in the Instruction manual.

2. Self-diagnosis Display

When problems occur while the unit is operating, the counter of the viewfinder or Display window shows a 4-digit display consisting of an alphabet and numbers, which blinks at 3.2 Hz. This 5-character display indicates the "repaired by:", "block" in which the problem occurred, and "detailed code" of the problem.

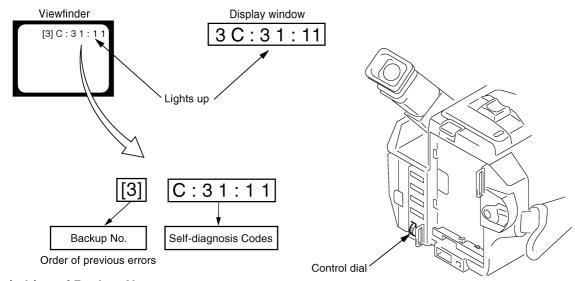

3. Service Mode Display

The service mode display shows up to six self-diagnosis codes shown in the past.

3-1. Display Method

While pressing the "STOP" key, set the switch from OFF to "VTR or PLAYER", and continue pressing the "STOP" key for 5 seconds continuously. The service mode will be displayed, and the counter will show the backup No. and the 5-character self-diagnosis codes.

3-2. Switching of Backup No.

By rotating the control dial, past self-diagnosis codes will be shown in order. The backup No. in the [] indicates the order in which the problem occurred. (If the number of problems which occurred is less than 6, only the number of problems which occurred will be shown.)

[1]: Occurred first time
[2]: Occurred second time
[3]: Occurred third time
[6]: Occurred the last time

3-3. End of Display

Turning OFF the power supply will end the service mode display.

Note: The "self-diagnosis display" data will be backed up by the coin-type lithium battery (CF-69/70/72 board BH001). When this coin-type lithium battery is disconnected, the "self-diagnosis display" data will be lost by initialization.

DCR-TRV320/TRV320E/TRV320P/TRV420E/TRV520/TRV520E/TRV520P/TRV525 **SECTION 1** TRV620E/TRV720/TRV720E

GENERAL

This section is extracted from DCR-TRV420E/ TRV520E/TRV620E instruction manual.

English

Welcome!

Congratulations on your purchase of this Sony Digital Handycam camcorder. With your Digital Handycam, you can capture life's precious moments with superior picture and sound

quality.
Your Digital Handycam is loaded with advanced features, but at the same time it is very easy to use. You will soon be producing home video that you can enjoy for years to come.

WARNING
To prevent fire or shock hazard, do not expose the unit to rain or moisture.

To avoid electrical shock, do not open the cabinet. Refer servicing to qualified personnel only.

NOTICE ON THE SUPPLIED AC POWER ADAPTOR FOR CUSTOMERS IN THE UNITED KINGDOM

A moulded plug complying with BS1363 is fitted to this equipment for your safety and convenience

Should the fuse in the plug supplied need to be replaced, a 5 AMP fuse approved by ASTA or BSI to BS1362 (i.e., marked with �� or ♥ mark) must be used.

If the plug supplied with this equipment has a detachable fuse cover, be sure to attach the fuse cover fetr you change the fuse. Never use the plug without the fuse cover. If you should lose the fuse cover, please contact your nearest Sony service station.

The electromagnetic fields at the specific frequencies may influence the picture and sound of this digital camcorder.

For the customers in Germany Directive: EMC Directive 89/336/EEC. 9/31/EEC This equipment complies with the EMC regulations when used under the follow circumstances: regulations when circumstances:
• Residential area

- Business district
 Light-industry district
 (This equipment complies with the EMC standard regulations EN55022 Class B.)

Русский

Добро пожаловать!

Поздравляем Вас с приобретением данной видеокамеры Digital Handycam фирмы Sony. С помощью Вашей видеокамеры Digital Handycam вы коможете запечатиеть дорогие Вам мінговения жизни с превосходным качеством изображения и звука. Ваша видеокамера Digital Handycam оснащена усовершенствованными функциями, но в то же время ее очень легко использовать. Вскоре Вы будете создавать семейные видеопрограммы, которыми можете наслаждаться последующие годы.

ПРЕДУПРЕЖДЕНИЕ

опасности электрического удара не выставляйте аппарат на дождь или влагу

Во избежание поражения электрическим током не открывайте корпус. За обслуживанием обращаться только к квалифицированному обслуживающему

ВНИМАНИЕ

Электромагнитные поля на определенных частотах могут влиять на изображение и звук, воспроизводимые данной цифровой видеокамерой

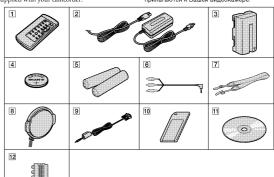

Checking supplied accessories

Make sure that the following accessories are supplied with your camcorder.

Проверка прилагаемых принадлежностей

Убедитесь, что следующие принадлежности прилагаются к Вашей видеокамере.

- 1 Wireless Remote Commander (1) (p. 170) 2 AC-L10A/L10B/L10C AC power adaptor (1),
- 2 AC-L10AL/10BAL/10C AC power adaptor (

Quick Start Guide

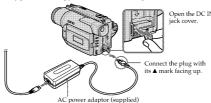

This chapter introduces you to the basic features of your camcorder. See the page in parentheses "()" for more

Quick Start Guide

6

Connecting the mains lead (p. 18)

Use the battery pack when using your camcorder outdoors (p. 12).

2 Inserting a cassette (p. 19)

1 Open the lid of the cassette compartment and press EJECT. The compartment automatically.

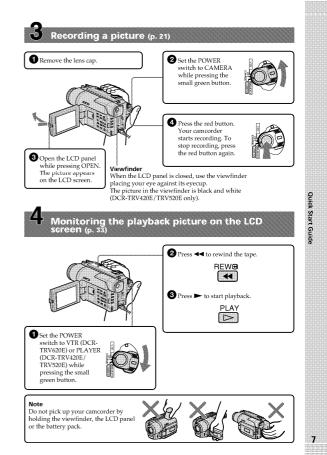

2 Insert a cassette compartment with its window facing out and the writeprotect tab on the

(1) Close the cassette compartment by press the (PUSH) mark on the automatically goes down Close the lid of the

Using this manual

The instructions in this manual are for the three models listed in the table below. Before you start reading this manual and operating your camcorder, check the model number by looking at the bottom of your camcorder. The DCR-TRV620E is the model used for illustration purposes. Otherwise, the model name is indicated in the illustrations. Any differences in operation are clearly indicated in the text, for example, "DCR-TRV620E only."

As you read through this manual, buttons and settings on your camcorder are shown in capital letters.

Set the POWER switch to CAMERA. e.g. Set the POWER switch to CAMERA. When you carry out an operation, you can hear a beep sound to indicate that the operation is being carried out.

Types of differences/Типы различий				
DCR-	TRV420E	TRV520E	TRV620E	
Viewfinder/ Видоискатель	B/W	B/W	colour	
Digital zoom/ Цифровой вариообъектив	125×	100×	100×	
POWER switch/ Переключатель POWER	PLAYER	PLAYER	VTR*	

* The models which have VTR mode on the POWER switch can record pictures from other equipment such as VCR.

Before using your camcorder

With your digital camcorder, you can use Hi8
HiB/Digital8 D video cassettes. Your camcorder
records and plays back pictures in the Digital8 D
system. Also, your camcorder plays back tapes
recorded in the Hi8 HiB/standard 8 B (analog)
system. You, however, cannot use the functions
in "Advanced Playback Operations" on page 64
or 27 for playback in the Hi8 HiB/standard 8 B
system. To enable smooth transition, we
recommend that you do not mix pictures
recorded in the Hi8 HiB/standard 8 B with the
Digital8 D system on a tape.

— Подготовка к эксплуатации –

Использование данного руководства

Инструкции в данном руководстве предназначены для трех моделей, перечисленных в таблице ниже. Перед тем, как прочесть данное руководство и начать эксплуатацию Вашей видеокамеры, проверьте номер модели на нижней стороне Вашей видеокамеры. В качестве иллюстративных целей используется модель DCR-TRV620E. В других случаях номер модели указаны в тексте, напрямер, "только DCR-TRV620E." При чтении данного руководства учитывайте, что кнопки и установки на видеокамере показаны заглавными буквами. Прим. Установки на видеокамере показаны заглавными буквами. Прим DCTAHOBUST в положение САМЕЯ. При выполнении операции на видеокамере Вы сможете услышать зуммерный сигнал, подтверждающий выполнение операции.

* Модели, в которых имеется режим VTR на переключателе POWER, могут записывать изображения с другого оборудования, как, например КВМ.

Перед началом эксплуатации Вашей видеокамеры

Вашем видеокамеры

Для Вашей цифровой видеокамеры Вы можете использовать видеокассеты НіВ НІВУ
Digital8 Р. Ваша видеокамера записывает и
воспроизводит изображения в цифровой
системе Digital8 Р. Также, Ваша видеокамера
воспроизводит ленты, записанные в системе
НіВ НІВУстандартной системе В В
(аналоговой). Однако, Вы не можете
использовать функции в разделе
"Усовершенствованные операции
воспроизведения" на страницах с 64 по 72
для воспроизведения в системе НіВ НІВУ
стандартной системе В В. Для обеспечения
плавного перехода рекомендуется не
смешивать на ленте изображения, плавно переода рекомендуется не смешивать на ленте изображения, записанные в системе НіВ НІВ/стандартной системе 8 В, с изображениями, записанными в цифровой системе Digital8 D.

Using this manual

Note on TV colour systems

TV colour systems differ from country to country. To view your recordings on a TV, you need a PAL system-based TV.

Copyright precautions

Television programmes, films, video tapes, and other materials may be copyrighted. Unauthorized recording of such materials may be contrary to the provision of the copyright

Precautions on camcorder care

- Precautions on camcorder care

 The LCD screen and the viewfinder are manufactured using high-precision technology. However, there may be some tiny black points and/or bright points (red, blue, green or white) that constantly appear on the LCD screen and in the viewfinder. These points occur normally in the manufacturing process and do not affect the recorded picture in any way. Effective ratio of pixels and/or screen are 99.99% or more. Do not let your camcorder get wet. Keep your camcorder away from rain and sea water. Letting your camcorder get wet may cause your camcorder to malfunction. Sometimes this malfunction cannot be repaired [a].

 Never leave your camcorder exposed to temperatures above 60°C (140°F), such as in a car parked in the sun or under direct sunlight [b].

- Do not place your camcorder so as to point the viewfinder, the LCD screen or lens toward the sun. The inside of the viewfinder, LCD screen or lens may be damaged [6].

After installing the battery pack

After installing the battery pack
Do not carry your camcorder by holding the
battery pack. If you do so, the battery pack may
slide off your camcorder unintentionally, damaging your camcorder.

После установки батарейного блока

Не переносите свою видеокамеру, взявшись за батарейный блок. Если Вы так сделаете, батарейный блок может непроизвольно соскользнуть с Вашей видеокамеры и повредить ее

Step 1 Preparing the power supply

Charging the battery pack

Use the battery pack after charging it for your

- Ose the others, your cannorder.

 Your cannorder operates only with the "InfoLITHIUM" battery pack (I. series).

 (1) Open the DC IN jack cover and connect the AC power adaptor supplied with your cannorder to the DC IN jack with the plug's A mark facing up.

 (2) Connect the mains lead to the AC power
- adaptor.
 (3) Connect the mains lead to the mains.
 (4) Set the POWER switch to OFF (CHARGE).
 Charging begins. The remaining battery tin
 is indicated in minutes on the display

window. When the remaining battery indicator changes to when the remaining battery indicator changes to me, normal charge is completed. To fully charge the battery (full charge), leave the battery pack attached for about 1 hour after normal charge is completed until FULL appears in the display window. Fully charging the battery allows you to use the battery longer than usual.

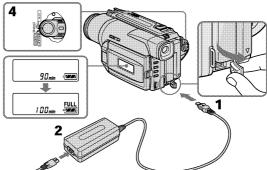

Пункт 1 Подготовка источника

Зарядка батарейного блока

Используйте батарейный блок для Вашей

- Используйте батарейный блок для Вашей видеокамеры после его зарядки. Ваша видеокамеры после его зарядки. Серим L). (1) Откройте крышку гнезда DC IN и подсоедините сетевой адаптер переменного тока, прилагаемый к Вашей видеокамере, к гнезду DC IN, так чтобы штекер ▲ был направлен вверх. (2) Подсоедините провод электролитания к сетевому адаптеру переменного тока. (3) Подсоедините провод электропитания к сетевому адаптеру переменного тока. (3) Подсоедините провод электропитания к сетевому адаптеру переменного тока. (4) Установите переключатель РОШЕВ в положение ОРГ (СНАЯСЕ). Начнется зарядка. В окошке дисплея будет отображаться время оставшегося заряда в минутах.

отображаться время оставшегося заряда в минутах.
Если индикатор оставшегося заряда изменится на **че... это значит**, что нормальная зарядка завершена. Для полной зарядки батарейного блока (полная зарядка) оставьте оатарейным олок прикрепленным на месте приблизительной час после завершения нормальной один час после завершения нормальной зарядки до тех пор, пока в окошке дисплея не появится индикация FULL. Полная зарядка батарейного блока позволяет Вам использовать батарейный блок дольш обычно

12

13

11

Step 1 Preparing the power supply

After charging the battery pack Disconnect the AC power a IN jack on your camcorder

- Prevent metallic objects from coming into contact with the metal parts of the DC plug of the AC power adaptor. This may cause a short-circuit, damaging the AC power adaptor.
- Keep the battery pack dry.
 When the battery pack is not to be used for a long time, charge the battery pack once fully, and then use it until it fully discharges again. Keep the battery pack in a cool place.

When the battery pack is charged fully The LCD backlight of the display window is turned off.

Remaining battery time indicator
The remaining battery time indicator in the
display window roughly indicates the recording
time with the viewfinder.

Battery pack
The supplied battery pack is charged a little.

Until your camcorder calculates the actual remaining battery time "---min" appears in the display window.

While charging the battery pack, no indicator appears or the indicator flashes in the display window in the following cases: - The battery pack is not installed correctly. - The AC power adaptor is disconnected. - Something is wrong with the battery pack.

Пункт 1 Подготовка источника

После зарядки батарейного блока

соедините сетевой адаптер переменного ка от гнезда DC IN на Вашей видеокамер

- Не допускайте контакта металлических предметов с металлическими частями штекера постоянного тока сетевого адаптера. Это может привести к короткому замыканию и повреждению Вашего сетевого адаптера.
 • Содержите батарейный блок в сухом
- состоянии.
 Если батарейный блок предполагается не использовать длительное время, зарядите его полностью один раз, а затем используйте до тех пор, пока он снова полностью не разрядится. Храните батарейный блок в прохладном месте

Если батарейный блок заряжен полностью Задняя подсветка ЖКД в окошке дисплея выключится.

Индикатор времени оставшегося заряда батарейного блока

оатареиного олока
Индикатор времени оставшегося заряда
батарейного блока в окошке дисплея
приблизительно указывает время записи с
помощью видоискателя.

Батарейный блок

Батарейный блок уже немного заряжен на предприятии-изготовителе

До тех пор, пока Ваша видеокамера определит действительное время оставшегося заряда батарейного блока В окошке дисплея будет отображаться индикация "--- min".

Во время зарядки батарейного блока никакой индикатор не поялвяется, или индикатор будет мигать в окошке дисплея в следующих случаях

- Батарейный блок установлен неправильно
 Отсоединен сетевой адаптер переменного
- Что-то не в порядке с батарейным блоком

The remaining battery time indicator
The indicator may not be correct, depending or
the conditions in which you are recording. Whe
you close the LCD panel and open it again, it
takes about 1 minute for the correct remaining
battery time to be displayed.

If the power may go off although the battery remaining indicator indicates that the battery pack has enough power to operate. Charge the battery pack fully again so that the indication on the battery remaining indicator is correct.

What is "InfoLITHIUM"?

The "InfoLITHIUM" is a lithium ion battery pack which can exchange data such as battery consumption with compatible electronic equipment. This unit is compatible with the "InfoLITHIUM" battery pack (L series). Your camcorder operates only with the "InfoLITHIUM" battery. "InfoLITHIUM" battery packs have the **Document* mark." InfoLITHIUM" is a trademark of Sony Corporation.

Пункт 1 Подготовка источника

По индикатору времени оставшегося заряда батарейного блока во время

Индикатор может быть неправильным в Индикатор может быть неправильным в зависимости от условий, в которых выполняется запись. Если Вы закроете панель ЖКД и откроете ее нова, то пройдет около 1 минуты, прежде чем на дисплее появится правильное время оставшегося заряда батарейного блока.

Если заряд может быть израсходован, а индикатор времени оставшегося заряда батарейного блока будет показывать, что заряд батарейного блока вполне достаточный для его эксплуатации. Зарядите батарейный блок еще раз, так чтобы показамие на индикаторе оставшегося заряда батарейного блока было правильным.

Что такое "Infol ITHILIM"?

Что такое "InfoLITHIUM"?

InfoLITHIUM" представляет собой литиевоионный батарейный блюк, который может
обмениваться данными, такими как
потребление заряда батарейного блока, с
совместимой электронной аппаратурой. Это
устройство совместимо с батарейным блоком
"InfoLITHIUM" (серии L). Ваша видеокамера
работает только с батарейным блоком
"InfoLITHIUM". На батарейных блоком
"InfoLITHIUM" вилется знак (р) мыстими.
"InfoLITHIUM" вяляется потровой маркой

- Advanced Recording Operations -

Recording a still image on a tape - Tape Photo recording

You can record a still image like a photograph. This mode is useful when you want to record a picture such as a photograph or when you print a picture using a video printer (not supplied). You can record about 1510 images in the SP mode and about 765 images in the LP mode on a tape which can record for 60 minutes in the SP mode. Besides the operation described here, your camcorder can record still images on the "Memory Stick"s (p. 100).

(1) In the standby mode, keep pressing PHOTO lightly until a still image appears. The CAPTURE indicator appears. Recording does not start yet.

CAPTUKE indicator appears. Recording doe not start ye.

To change the still image, release PHOTO, select a still image again, and then press and hold PHOTO lightly.

(2) Press PHOTO deeper.

The still image on the LCD screen or in the

viewfinder is recorded for about seven seconds. The sound during those seven

seconds. The still image is displayed on the LCD screen or in the viewfinder untill recording is completed.

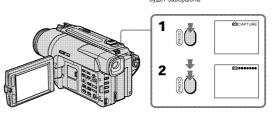

Усовершенствованные операции съемки – Запись неподвижного изображения на ленту - Фотосъемка на ленту

39

Вы можете записывать неподвижное изображение подобно фотографии. Данный режим полезен, если Вы хотите записывать изображение в виде фотоснимка или же при выполнении отпечатков с помощью видеопритера (не прилагается). Вы можете записать около 510 изображений в режиме SP и около 768 изображений в режиме SP и около 768 изображений в режиме SP и около 768 изображений в режиме SP. Кроме описанной здесь операции, Ваша видеокамера может выполнить запись е потраженых изображении выполнить запись неподвижных изображении выполнить запись неподвижных изображения выполнить запись неподвижных изображений на "Memory Stick" (стр. 100).

операции, сым вудельных изображений на "Метолу Stick" (стр. 100).

(1) В режиме ожидания держите слегка нажатой кнопку PHOTO до тех пор, пока не появится неподвижное изображение. Появится индикатор САРТИРЕ. Запись пока еще не началась. От появится индикатор САРТИРЕ. Запись пока еще не началась. От выберите неподвижного изображения отпустите кнопку PHOTO, выберите неподвижное изображение снова, а затем нажимите и держите слегка нажатой кнопку PHOTO сильнее. Неподвижное изображение в видоискателе или на экране ЖКД будет записываться около семи секунд. В течение этих семи секунд будет записываться и звук. Неподвижное изображение будет отображаться на звук. Неподвижное изображение будет отображаться на экране ЖКД или в видоискателе тех пор, пока запись не будет завершена.

записи. (7) Если Вы захотите остановить запись титра, нажмите кнопку TITLE.

58

Superimposing a title

To superimpose the title while you

are recording
Press TITLE while you are recording, and carry
out steps 2 to 5. When you press the SEL/PUSH
EXEC dial at step 5, the title is recorded.

To select the language of a preset

If you want to change the language, select before step 2. Then select the desired language and return to step 2.

If you display the menu while superimposing a title The title is not recorded while the menu is

displayed

To use the custom title

If you want to use the custom title, select ☑ in

If you have not made any custom title, "---. ..." appears on the display.

Title setting

• The title colour changes as follows:

WHITE ↔ YELLOW ↔ VIOLET ↔ RED ↔

CYAN ↔ GREEN ↔ BLUE

• The title size changes as follows:

SMALL ↔ LARGE

You cannot input more than 12 characters in

LARGE size

• The title position changes as follows:

1 ← 2 ← 3 ← 4 ← 5 ← 6 ← 7 ← 8 ← 9

The larger the position number, the lower the title is positioned.

When you select the title size LARGE, you cannot choose position 9.

When you are selecting and setting the title

screen. When you superimpose a title while you are recording The beep does not sound.

While you are playing back
You can superimpose a title. However, the title is not recorded on tape.
You can record a title when you dub the tape connecting your cameorder to the VCR with the A/V connecting cable. If you use the i.LINK cable instead of the A/V connecting cable, you cannot record the title.

Наложение титра

Для наложения титра во время записи Нажмите кнопку ТІТLЕ во время записи и выполните действия пунктов 2-5. Если Вы нажмете диск SEUPUSH EXEC в пункте 5, титр будет записан.

Для выбора языка предварительно

установленного титра
Если Вы хотите изменить язык, выберите индикацию 🖬 перед пунктом 2. Затем выберите нужный язык и вернитесь к пункту 2.

В случае отображения меню во время наложения титра Титр не будет записываться во время отображения меню

Для использования собственного тит Если Вы хотите использовать собственн титр, выберите установку 🛈 в пункте 2. Если Вы не средлали никакого собственного титра, на дисплее появится индикация "——

Установка титра • Цвет титра изменяется следующим

. цвет титра изменяется следующим образом:
WHITE (белый) → YELLOW (желтый) → VIOLET (фиолетовый) → RED (красный) → CYAN (голубой) → GREEN (зеленый) → BLUE (синии) Размер титра изменяется следующим образом:

образом: SMALL (маленький) → LARGE (большой)

Вы не можете ввести более 12 символов для размера титра LARGE.

• Позиция титра изменяется следующим

1 Позиция и при възгософразон:

1 ↔ 2 ← 3 ← 4 ← 5 ← 6 ← 7 ← 8 ← 9

Чем выше номер позиции титра, тем ниже
расположен титр.

Если Вы выберите размер титра LARGE, Вы
не сможете выбрать положение 9.

При выборе и установке титра
Вы не можете записать титр, отображаемый на экране.

Во время воспроизведения
Вы можете наложить титр. Однако титр не
будет записан на ленту.
Вы можете записать титр при перезаписи
ленты, подсоединия Вашу видеокамеру к
КВМ с помощью соединительного кабеля
аудио/видео. Если Вы используете кабель аудио/видео. Если Вы используете кабелю i.LINK вместо соединительного кабеля аудио/ видео, Вы не можете записать титры.

Making your own titles

You can make up to two titles and store them in your camcorder. Each title can have up to 20

(1) Press TITLE in the standby, VTR (DCR-TRV620E) or PLAYER (DCR-TRV420E/TRV520E) mode.

(2) Turn the SEL/PUSH EXEC dial to select 12/theory sees the dial.

(2) Turn the SEL/PUSH EXEC dial to select \(\psi\), then press the dial.

(3) Turn the SEL/PUSH EXEC dial to select the first line (CUSTOM!) or second line (CUSTOM!) then press the dial.

M AUTO SHTR	• ON	To automatically activate the electronic shutter when shooting in bright conditions	CAMERA
	OFF	To not automatically activate the electronic shutter even when shooting in bright conditions	
⊡ D ZOOM	• OFF	To deactivate digital zoom. Up to 25× zoom is carried out.	CAMERA MEMORY
	50×	To activate digital zoom. More than 25× to 50× zoom is performed digitally. (p. 24)	
	100×*	To activate digital zoom. More than 25× to 100× zoom is performed digitally. (p. 24)	
16:9WIDE	OFF	_	CAMERA
	ON	To record a 16:9 wide picture (p. 45)	
STEADYSHOT	• ON	To compensate for camera-shake	CAMERA
	OFF	To cancel the SteadyShot function. Natural pictures are produced when shooting a stationary object with a tripod.	MEMORY
N.S. LIGHT	ON	To use the NightShot Light function (p. 28)	CAMERA
	OFF	To cancel the NightShot Light function	MEMORY

^{* 125× (}DCR-TRV420E only)

- Notes on the SteadyShot function

 The SteadyShot function will not correct excessive camera-shake.

 Attachment of a conversion lens (not supplied) may influence the SteadyShot function

If you cancel the SteadyShot function The SteadyShot off indicator $\overset{\bullet}{\otimes}$ appears. Your camcorder prevents excessive compensation for camera-shake 86

* When you play back tapes recorded in the Hi8/standard 8 system only

A/V → DV OUT ● OFF (DCR-TRV620E

- Notes on AUDIO MIX

 When playing back a tape recorded in the 16-bit mode, you cannot adjust the balance.

 You can adjust the balance only for tapes recorded in the Digital8 ₱ system.

only)

Note on NTSC PB
When you play back a tape on a Multi System TV, select the best mode while viewing the picture on the TV.

Note on PB MODE

The mode will return to the default setting when:

- you remove the battery pack or power source.

- you turn the POWER switch.

- Notes on LCD B.L. and VF.B.L.

 When you select BRIGHT, battery life is reduced by about 10 percent during recording.

 When you use power sources other than the battery pack, BRIGHT is automatically selected

- Notes on formatting

 Supplied or optional "Memory Stick"s have been formatted at factory. Formatting with this camcorder is not required.

 Do not turn the POWER switch or press any button while the display shows FORMATTING.

 You cannot format the "Memory Stick" if the write-protect tab on the "Memory Stick" is set to LOCK.

 Format again if the message

 papears.

- Formatting erases all information on the "Memory Stick" Check the contents of the "Memory Stick" before formatting.

 Formatting erases sample images on the "Memory Stick"

 Formatting erases the protected image data on the "Memory Stick" 88

Changing the menu settings

lcon/item	Mode	Meaning	POWER switch
REC MODE	● SP	To record in the SP (Standard Play) mode	VTR/PLAYER
	LP	To increase the recording time to 1.5 times the SP mode	CAMERA
AUDIO MODE	• 12BIT	To record or play back in the 12-bit mode (two stereo sounds)	VTR/PLAYER* CAMERA
	16BIT	To record or play back in the 16-bit mode (the one stereo sound with high quality)	
™ REMAIN	• АИТО	To display the remaining tape bar: • for about 8 seconds after your camcorder is turned on and calculates the remaining amount of tape • for about 8 seconds after a cassette is inserted and your camcorder calculates the remaining amount of tape • for about 8 seconds after ▶ is pressed in VTR (DCR-TRV620E) or PLAYER (DCR-TRV420E/ TRV520E) mode • for about 8 seconds after DISPLAY is pressed to display the screen indicators • for the period of tape rewinding, forwarding or picture search in the VTR (DCR-TRV620E) mode PLAYER (DCR-TRV420E/TRV520E) mode	VTR/PLAYER CAMERA
	ON	To always display the remaining tape bar	
DATA CODE	DATE/CAM	To display date, time and recording data during playback	VTR/PLAYER
	DATE	To display date and time during playback	

When you record on the standard 8 \blacksquare tape, your camcorder records in the SP mode even you select the LP mode in the menu settings. In this case, the indicator "8 mm TAPE \rightarrow SP REC, Hi8 TAPE \rightarrow LP/SP REC" appears on the LCD screen or in the viewfinder. Use the Hi8 \blacksquare tapes for the LP mode.

Notes on the LP mode

- When you record a tape in the LP mode on your camcorder, we recommend playing the tape on your camcorder. When you play back the tape on other camcorders or VCRs, noise may occur in images or
- sound.

 When you record in the SP and LP modes on one tape or you record some scenes in the LP mode, the playback image may be distorted or the time code may not be written properly between scenes.

1-21

Note on AUDIO MODE

When playing back a tape recorded in the 16-bit mode, you cannot adjust the balance in AUDIO MIX.

*To dub a tape to another VCR You cannot select AUDIO MODE for tapes recorded in the Digital8 Θ system. You, however, can select AUDIO MODE when you dub tapes recorded in the Hi8/standard 8 system to another VCR using the i.LINK cable.

Changing the menu settings

lcon/item	Mode	Meaning	POWER switch
	_	To reset the date or time (p. 98)	CAMERA MEMORY
LTR SIZE	 NORMAL 	To display selected menu items in normal size	VTR/PLAYER
	2×	To display selected menu items at twice the normal size	CAMERA MEMORY
DEMO MODE	• on	To make the demonstration appear	CAMERA
	OFF	To cancel the demonstration mode	-

- Notes on DEMO MODE

 You cannot select DEMO MODE when a cassette is inserted in your camcorder.

 DEMO MODE is set to STBY (Standby) at the factory and the demonstration starts about 10 minutes after you have set the POWER switch to CAMERA without a cassette inserted.

 To cancel the demonstration, insert a cassette, set the POWER switch to other than CAMERA, or set DEMO MODE to OFF.

 When NIGHTSHOT is set to ON, the "NIGHTSHOT" indicator appears on the LCD screen or in the viewfinder and you cannot select DEMO MODE in the menu settings.

Changing the menu settings

con/item	Mode	Meaning	POWER switch
TE WORLD TIME	_	To set the clock to the local time. Turn the SEL/PUSH EXEC dial to set a time difference. The clock changes by the time difference you set here. If you set the time difference to 0, the clock returns to the originally set time.	CAMERA MEMORY
BEEP	MELODY	To output the melody when you start/stop recording or when an unusual condition occurs on your camcorder	VTR/PLAYER CAMERA MEMORY
	NORMAL	To output the beep instead of the melody	
	OFF	To cancel all sound including shutter sound	
COMMANDER	• ON	To activate the Remote Commander supplied with your camcorder	VTR/PLAYER CAMERA
	OFF	To deactivate the Remote Commander to avoid remote control misoperation caused by other VCR's remote control	MEMORY
DISPLAY	• LCD	To show the display on the LCD screen and in the viewfinder	VTR/PLAYER CAMERA
	V-OUT/LCD	To show the display on the TV screen, LCD screen and in the viewfinder	MEMORY
REC LAMP	• ON	To light up the camera recording lamp at the front of your camcorder	CAMERA MEMORY
	OFF	To turn the camera recording lamp off so that the subject is not aware of the recording	
INDICATOR	BL OFF	To turn off the backlight on display window	VTR/PLAYER
	BL ON	To turn on the backlight	CAMERA MEMORY

If you press DISPLAY with DISPLAY set to V-OUT/LCD in the menu settings, the picture from a TV or VCR will not appear on the LCD screen even when your camcorder is connected to outputs on the TV or VCR. (Except when your camcorder is connected with the i.LINK cable.)

In more than 5 minutes after removing the power source
The AUDIO MIX, COMMANDER and HiFi SOUND items are returned to their default settings.
The other mean items are held in memory even when the battery is removed, as long as the lithium battery is installed.

Notes on INDICATOR

- When you select BL ON, battery lite is reduced by about 10 percent during recording.
 When you use power sources other than the battery pack, BL ON is automatically selected.

90

Resetting the date and time

The default clock setting is set to London time for United Kingdom and to Paris time for the other European countries Time. The date and time are held in memory by the lithium battery. If you replace the lithium battery with the battery pack or other power source connected, you need not reset the date and time. You must reset the date and time when the lithium battery becomes dead with no power source installed. First, set the year, then the month, the day, the hour and then the minute.

(1) While the camcorder is in the standby mode, press MENU to display the menu settings.

(2) Turn the SEL/PUSH EXEC dial to select ⑤ then press the dial.

(3) Turn the SEL/PUSH EXEC dial to select ℂLOCK SET, then press the dial.

(4) Turn the SEL/PUSH EXEC dial to adjust the desired year, then press the dial.

(5) Set the month, day and hour by turning the SEL/PUSH EXEC dial and pressing the dial.

(6) Set the minute by turning the SEL/PUSH EXEC dial and pressing the dial.

(7) Press MENU to make the menu settings disappear.

Переустановка даты и времени

Установка часов по умолчанию соответствует времени Лондона для моделей Соединенного Королевства и времени Парижа для других европейских моделей. Дата и время сохраняются в памети с помощью литиевой батарейки. Если Вы от литиевой батарейки переключитесь на батарейный опок или другой подсоединенный источник питатиня, Вам нужно будет также переустановить дату и время. Вам нужно также переустановить дату и время, когда литиевая батарейка разрядится и в это время не будет вставлени ситочник питатия. Сначала установите год, затем месяц, день, час и минуть.

- Сначала установите год, затем месяц, день, час и минуту.

 (1) В режиме ожидания видеокамеры нажимите киопку МЕЛИ для отображения установок меню.

 (2) Повериите диск SEL/PUSH EXEC для выбора индикации № 3 а затем нажимите диск.

 (3) Повериите диск SEL/PUSH EXEC для выбора команды СLОСК SET, а затем нажимите диск.

 (4) Повериите диск SEL/PUSH EXEC для выбора ужуного года, а затем нажимите диск.

 (5) Установите миска.

 (6) Установите миска.

 (6) Установите минуты путем вращения диска.

- нажимания диска.
 (6) Установите минуты путем вращения диска SEL/PUSH EXEC и нажимания диска в момент передачи сигнала точного времени. Часы начнут функционировать.
 (7) Нажимте кнопку МЕМ-0И для того, чтобы исчезли установки меню.

Resetting the date and time

Переустановка даты и времени

The year changes as follows: Год изменяется следующим образом:

1999 ↔ 2000 ← · · · · → 2029

If you do not set the date and time
"---""----" is recorded on the tape and the "Memory Stick".

Note on the time indicator The internal clock of your camcorder operates on a 24-hour cycle.

Если Вы не установили дату и время На ленту и "Memory Stick" будет записываться индикация "----"

Примечание по индикатору времени Встроенные часы Вашей видеокамеры работают в 24-часовом режиме.

Usable cassette tapes We recommend using Hi8 Hi⊠/Digital8 → video

we recommend using rito FIBS Digitals BY video cassette.

The recording time when you use your Digitals By system camcorder on His FIBS standard 8 Bit ape is half the recording time when using the conventional His FIBS Istandard 8 Bit system camcorder. (120 minutes of recording time becomes 60 minutes in the 5F mode.)

If you use standard 8 Bit ape, be sure to play back the tape on this camcorder. Mosaic pattern noise may appear when you play back standard 8 Bit ape not her VCRs (including other DCR-TRV420E/TRV520E/TRV620E).

Tapes recorded in the Digital8 D system cannot be played back on His His /standard 8 (analog) system machine.

S is a trademark.

Hi S is a trademark

B is a trademark.

Playback system

The Digitals D system or His HIB/standard 8 B system is automatically detected before the tape is played back.

During playback of tapes recorded in the His HIB/standard 8 B system, digital signals are output as the image signals from the DV IN/OUT or DV OUT jack.

Display during automatic detection of system The Digitals **B** system or His **HIB**/standard 8 **B** system is automatically detected, and the playback system is automatically switched to. During switching of systems, the screen turns blue, and the following displays appear. A hissing noise also sometimes can be heard.

B→ Hi 8/8: During switching from Digital8 B to Hi 8/8 → B: During switching from Hi 8 Hi 8/8 → B: During switching from Hi 8 Hi 8/8 standard 8 8 to Digital8 B

When you play back

Playing back an NTSC-recorded tape You can play back tapes recorded in the NTSC video system on the LCD screen, if the tape is recorded in the SP mode.

Дополнительная информация -

About i.LINK

The DV jack on this unit is an i.LINK-compliant DV input/output jack. This section describes the i.LINK standard and its features.

What is "i.LINK"?

What is "i.LINK"?

i.LINK is a digital serial interface for handling digital video, digital audio and other data in two directions between equipment having the i.LINK jack, and for controlling other equipment.

i.LINK-compatible equipment can be connected by a single i.LINK cable. Possible applications are operations and data transactions with various digital AV equipment.

When two or more i.LINK-compatible equipment are connected to this unit in a daisy chain, operations and data transactions are possible with not only the equipment that this unit is connected to but also with other devices via the directly connected equipment.

Note, however, that the method of operation sometimes varies according to the characteristics and specifications of the equipment having two or more i.LINK jacks (DV jacks) to be connected equipment.

Note

Note
Normally, only one piece of equipment can be connected to this unit by the i.LINK cable (DV cable). When connecting this unit to two or more i.LINK-compatible equipment, refer to the instruction manual of the equipment to be connected.

About the Name "i.LINK"

i.LINK is a more familiar term for IEEE 1394 data transport bus proposed by SONY, and is a trademark approved by many corporations. IEEE 1394 is an international standard standardized by the Institute of Electrical and Electronic Engineers.

Относительно i.LINK

Цифровое гнездо DV на данном аппарате удовлетворяет стандарту i.LINK и является совместимым с входным/выходным гнездом цифровых видеосигналов DV. В этом разделе описан стандарт i.LINK и его основные

что такое "i.LINK"?

I.LINK является цифровым последовательным интерфейсом для управления цифровыми видеосигналами, цифровыми аудиосигналами и другими данными в деух направления кежду апаратами, информами, информами, информами аудиосигналами и другими данными в деух направления кежду апаратами, i.LINK. а также для управления другими аппаратами. i.LINK. 6 от другими аппаратами. i.LINK. Возможные применения этой функции охаатывают операции и передачи данных с разными цифровыми аудиовидеоаппаратами. Eсли к данныму аппарату подосединены два или более i.LINK-совместимых аппарата в последовательной цени, то возможные последовательной цени, то возможные подсоединенным аппаратом, но и с другими аппаратами через непосредственно подсоединенный аппарат. Однако имейте в виду, что метод управления иногда отдинается в зависимости от харахтеристики и технических данных подсоединенного аппарата с деуми или операции и передачи данных иногда невозможны в на екоторых подсоединемых аппаратах.

Примечание

Обычно, только один аппарат можно обично, полько данному аппарату с помощью кабеля i.LINK (цифрового кабеля DV). При подсоединении данного аппарата к двум или более i.LINK-совместимым аппаратам изучите руководство по эксплуатации соответствующего подсоединяемого аппарата.

Относительно названия "i.LINK"

i.LINK является более привычным термином ля шины передачи данных IEEE 1394, предлаженной фирмой SONY, и он является фирменным знаком, утвержденным многими сопрозывания в предлаженным знаком, утвержденным многими сопрозываниями. корпорациями. IEEE 1394 является международным

стандартом, утвержденным Институтом инженеров по электротехнике и электронике. **137**

About i.LINK

i.LINK's maximum baud rate varies according to the equipment. Three maximum baud rates are the equipment. Three may defined:

S100 (approx. 100Mbps*) S200 (approx. 200Mbps) S400 (approx. 400Mbps)

The baud rate is listed under "Specifications" in the instruction manual of each equipment. It is also indicated near the i.LINK jack on some

also indicated near the LLINA jack on some equipment. The maximum baud rate of equipment on which it is not indicated such as this unit is "\$100". When units are connected to equipment having a different maximum baud rate, the baud rate sometimes differs from the indicated baud rate.

* What is "Mbps"?
Mbps stands for megabits per second, or the amount of data that can be sent or received in one second. For example, a baud rate of 100Mbps means that 100 megabits of data can be sent in

i.LINK Functions on this unit

For details on how to dub when this unit is connected to other video equipment having DV

connected to other video equipment having DV jacks, see page 75.
This unit can also be connected to other i.LINK (DV) compatible equipment made by SONY (e.g. VAIO series personal computer) other than video equipment.
Before connecting this unit to a personal computer, make sure that application software supported by this unit is already installed on the personal computer.
For details on precautions when connecting this unit, also refer to the instruction manuals for the equipment to be connected.

Required i.LINK Cable

Use the Sony i.LINK 4-pin-to-4-pin cable (during DV dubbing).

i LINK and Lare trademarks

Относительно i.LINK

Скорость передачи i.LINK

Максимальная скорость передачи i.LINK изменяется в зависимости от аппарата. Имеются три максимальные скорости передачи:

\$100 (приблиз. 100 Мбит/с*) \$200 (приблиз. 200 Мбит/с) \$400 (приблиз. 400 Мбит/с)

S400 (приблиз. 400 Мбит/с)

Скорость передачи указывается в разделе
"Текнические характеристики" в руководстве
по эксплуатации каждого аппарата. На
некоторых аппаратах она может быть также
указана возле гнезда i.LINK
максимальная скорость передачи аппарата,
на котором она не указана, например, для
данного аппарата, равна "\$100". На
Стучае, если аппараты подсоединятогя к
борудовачию с рругой максимальной
скоростью передачи, то скорость передачи
иногда может отличаться от указанной
скорости передачи.

СКОРОСТЯ ПЕРОВДЕТА:

"Что такое "Мбит/с"?

Мбит/с означает количество мегабит за секунду или количество данных, которое можно посылать или принимать за одну секунду. Например, скорость передачи 100 мбит/с означает, что 100 мегабит данных может быть послано за одну секунду.

Функции i.LINK на данном аппарате

Подробные сведения о том, как выполнять перезапись, когда данный аппарат подсоединен к другому видеооборудованию с гнездами DV, см. на стр. Данный илират и может быть также подсоединен к другому, LILINK (DV)- совместимому оборудованию фирмы SONY (например, персональному компьютеру серии VAIO), не относящемуся к видеоаппаратуре. Перед подсоединением данного аппарата к персональному компьютеру убедитесь, что на компьютерь уже утактовлено программное приложение, поддерживаемое данным аппаратом. ппаратом.

аппаратом. Подробные сведения относительно мер предосторожности при подсоединении данного аппарата приведены также в руководстве по эксплуатации для каждого подсоединяемого аппарата.

Требуемый кабель i.LINK

Используйте 4-штырьковый-к- 4-штырьковому кабель i.LINK фирмы Sony (во время цифровой видеоперезаписи)

i.LINK и **į** являются фирменными знаками

Changing the lithium battery in your camcorder

When replacing the lithium battery, keep the battery pack or other power source attached. Otherwise, you will need to reset the date, time and other items in the menu settings hold in memory by the lithium battery.

Insert the battery with the positive (+) side facing out. When the battery becomes weak or dead, the & indicator flashes on the LCD screen or in the viewfinder for about 5 seconds when you set the POWER switch to CAMBERA or MEMORY. In this case, replace the battery with a Sony CR2025 lithium battery. Use of any other battery may present a risk of fire or explosion. Discard used batteries according to the manufacturer's instructions.

Замена литиевой батарейки в Вашей видеокамере

При замене литиевой батарейки батарейный блок или другой источник питания должен быть прикреплен к видеокамере. В противном случае Вам понадобится переустанавливать дату, время и другие пункты в установках меню, хранимых в памяти видеокамеры с помощью литиевой

Вставьте батарейку так, чтобы положительный (+) полюс был обращен наружу. Если батарейка станет или разрядится, индикатор & будет мигать на экране ЖКД или в видоискателе около 5 секунд, если переключатель РОWЕЯ установлен в положение САМЕЯА или МЕМОЯЧ В этом случае, замените батарейку на литиевую батарейку Колу СЯ2025. Использование какой-либо другой батарейки может представлять риск воспламенения или взрыва. Ликвидируйте инспользованные батарейки в соответствии с инспользованные батарейки в соответствии с инспользованные батарейки в соответствии с инструкциями предприятия-изготовителя.

WARNING

The battery may explode if mistreated. Do not recharge, disassemble, nor dispose of it in fire.

- Lithium battery
 Keep the lithium battery out of the reach of children.
- Should the battery be swallowed, immediately
- Wipe the battery with a dry cloth to ensure good contact.

Lithium battery installed at the factory This battery may not last 1 year.

ВНИМАНИЕ

Если с батарейкой неправильно обращаться она может взорваться. Не перезаряжайте, н разбирайте и не бросайте в огонь батарейку

Литиевая батарейка

- Храните литиевую батарейку в месте, не доступном для детей.
 В случае, если кто-либо случайно проглотит батарейку, следует немедленно обратиться к врачу
- оатареику, отоду от теленов, к врачу.
 Протрите батарейку сухой тканью для обеспечения хорошего контакта.

Литиевая батарейка, установлен заводе

Этой батарейки может не хватить на 1 гол

Changing the lithium battery in your camcorder

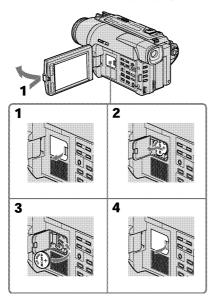

Changing the lithium battery

- (1) Open the LCD panel and open the lid of the lithium battery compartment.
 (2) Push the lithium battery in the direction of the arrow and pull it out from the holder.
 (3) Install a Sony CR2025 lithium battery with the positive (+) side facing out.
 (4) Close the lid.

Замена литиевой батарейки в Вашей видеокамере

Замена литиевой батарейки

- (1) Откройте панель ЖКД и откройте крышку
- (1) Откроите панель ЖКД и откроите крыш отсека для литиевой батарейки. (2) Нажмите литиевую батарейку в направлении стрелки и выньте ее из держателя. (3) Установите литиевую батарейку Sony CR2025 так, чтобы положительный (+) полюс был обращен наружу. (4) Закройте крышку.

English

Troubleshooting

If you run into any problem using your camcorder, use the following table to troubleshoot the problem. If the problem persists, disconnect the power source and contact your Sony dealer or local authorized Sony service facility. If "CCIDIDID" appears on the LCD screen, in the viewfinder or the display window, the self-diagnosis display function has worked. See page 146.

In the recording mode

Symptom	Cause and/or Corrective Actions
START/STOP does not operate.	The POWER switch is set to OFF (CHARGE), VTR (DCR-TRV620E), PLAYER (DCR-TRV420E/TRV520E) or MEMORY. Set it to CAMERA. (p. 21) The tape has run out. Rewind the tape or insert a new one. (p. 19, 33) The write-protect tab is set to expose the red mark. Use a new tape or slide the tab. (p. 20) The tape is stuck to the drum (moisture condensation). Remove the cassette and leave your camcorder for at least 1 hour to acclimatize. (p. 158)
The power goes off.	 While being operated in CAMERA mode, your camcorder has been in the standby mode for more than 3 minutes. Set the POWER switch to OFF (CHARGE) and then to CAMERA again. (p. 21)
The image on the viewfinder screen is not clear.	 The viewfinder lens is not adjusted. Adjust the viewfinder lens. (p. 25)
The SteadyShot function does not work.	 STEADYSHOT is set to OFF in the menu settings. → Set it to ON. (p. 85)
The autofocusing function does not work.	FOCUS is set to MANUAL. Set it to AUTO. (p. 57) Shooting conditions are not suitable for autofocus. Set FOCUS to MANUAL to focus manually. (p. 57)
The fader function does not work.	The digital effect function is working. Cancel it. (p. 53)
The picture does not appear in the viewfinder.	 The LCD panel is open. → Close the LCD panel. (p. 23)
You cannot record in the LP mode.	 The tape is the standard 8 tape. → Use Hi8 Hi8 /Digital8 → tapes. (p. 89)
A vertical band appears when you shoot a subject such as lights or a candle flame against a dark background.	The contrast between the subject and background is too high. This is not a malfunction.
A vertical band appears when you shoot a very bright subject.	This is not a malfunction.

140 (Continued on the following page) 141

Troubleshooting

Symptom	Cause and/or Corrective Actions
Some tiny white spots appear on the LCD screen or in the viewfinder.	 Slow shutter, low lux or Super NightShot mode is activated. This is not a malfunction.
An unknown picture is displayed on the LCD screen or in the viewfinder.	 If 10 minutes elapse after you set the POWER switch to CAMERA or DEMO MODE is set to ON in the menu settings without a cassette inserted, your camcorder automatically starts the demonstration. Insert a cassette and the demonstration stops. You can also cancel DEMO MODE. (p. 90)
The picture is recorded in incorrect or unnatural colours.	 NIGHTSHOT is set to ON. → Set it to OFF. (p. 28)
Picture appears too bright, and the subject does not appear on the LCD screen or in the viewfinder.	 NIGHTSHOT is set to ON in a bright place. → Set it to OFF, or use the NightShot function in a dark place. (p. 28)
A horizontal black band appears when shooting a TV screen or computer screen.	Set STEADYSHOT to OFF in the menu settings (p. 85).

Symptom	Cause and/or Corrective Actions
The tape does not move when a video control button is pressed.	 The POWER switch is set to CAMERA, MEMORY or OFF (CHARGE). Set it to VTR (DCR-TRV620E) or PLAYER (DCR-TRV420E/TRV520E). (p. 33)
The playback button does not work.	The tape has run out. Rewind the tape. (p. 33)
There are horizontal lines on the picture or the playback picture is not clear or does not appear.	The video head may be dirty. Clean the heads using the Sony V8-25CLD cleaning cassette (not supplied). (p. 159)
No sound or only a low sound is heard when playing back a tape.	The stereo tape is played back with HiFi SOUND set to 2 in the menu settings. Set it to STEREO. (p. 85) The volume is turned to minimum. Open the LCD panel and press VOLUME +. (p. 33) AUDIO MIX is set to ST2 side in the menu settings. Adjust AUDIO MIX. (p. 85)
The date search does not work correctly.	The tape has a blank portion in the recorded portion (p. 69)
The picture which is recorded in the Digital8 B system is not played back.	PB MODE is set to ► ■ □ □ In the menu settings. Set it to AUTO. (p. 85)
The tape which is recorded in the Hi8 standard 8 system is not played back correctly.	/ • Set PB MODE to MIB/B in the menu settings. (p. 85)

Traublashaatine

Symptom	Cause and/or Corrective Actions
The power does not turn on.	The battery pack is not installed, or is dead or nearly dead. Install a charged battery pack. (p. 12, 13) The AC power adaptor is not connected to the mains. Onnect the AC power adaptor to the mains. (p. 18)
The end search function does not work.	The tape was ejected after recording. You have not recorded on the new cassette yet.
The end search function does not work correctly.	The tape has a blank portion in the beginning or middle.
The battery pack is quickly discharged.	 The operating temperature is too low. The battery pack is not fully charged. Charge the battery pack fully again. (p. 13) The battery pack is completely dead, and cannot be recharged. Replace with a new battery pack. (p. 12)
The battery remaining indicator does not indicate the correct time.	Nou have used the battery pack in an extremely hot or cold environment for a long time. The battery pack is completely dead, and cannot be recharged. Replace with a new battery pack. (p. 12) The battery is dead. Use a charged battery pack. (p. 12, 13)
The power goes off although the battery remaining indicator indicates that the battery pack has enough power to operate.	 Charge the battery pack fully again so that the indication on th battery remaining indicator is correct.
The cassette cannot be removed from the holder.	The power source is disconnected. Connect it firmly. (p. 13, 18) The battery is dead. Use a charged battery pack. (p. 12, 13)
The ■ and ♠ indicators flash and no functions except for cassette ejection work.	Moisture condensation has occurred. Remove the cassette and leave your camcorder for at least 1 hour to acclimatize. (p. 158)

142 (Continued on the following page) 143

Troubleshooting

Symptom	Cause and/or Corrective Actions
The "Memory Stick" does not function.	The POWER switch is set to CAMERA or OFF (CHARGE) Set it to MEMORY. (p. 103) "Memory Stick" is not inserted. Insert a "Memory Stick". (p. 102)
Recording does not function.	The "Memory Stick" has already been recorded to its full capacity. Erase unnecessary images and record again. (p. 130, 105) The "Memory Stick" formatted incorrectly is inserted. Format the "Memory Stick" on your camcorder or use another "Memory Stick" (p. 94) The write-protect tab on the "Memory Stick" is set to LOCK Release the lock. (p. 104)
The image cannot be deleted.	The write-protect tab on the "Memory Stick" is set to LOCK Release the lock. (p. 100) The image is protected. Cancel image protection. (p. 128)
You cannot format the "Memory Stick".	 The write-protect tab on the "Memory Stick" is set to LOCK → Release the lock. (p. 100)
Deleting all the images cannot be carried out.	 The write-protect tab on the "Memory Stick" is set to LOCK → Release the lock. (p. 100)
You cannot protect the image.	The write-protect tab on the "Memory Stick" is set to LOCK Release the lock. (p. 100) The image to protect is not played back. → Press MEMORY PLAY to play back the image. (p. 119)
You cannot write a print mark on the still image.	The write-protect tab on the "Memory Stick" is set to LOCK Release the lock. (p. 100) The image to write a print mark is not played back. ≯ Press MEMORY PLAY to play back the image. (p. 119)
The photo save function does not work.	 The write-protect tab on the "Memory Stick" is set to LOCK → Release the lock. (p. 100)

Troubleshooting

Symptom	Cause and/or Corrective Actions
The Remote Commander supplied with your camcorder does not work.	COMMANDER is set to OFF in the menu settings. Set it to ON. (p. 85) Something is blocking the infrared rays Remove the obstacle The batteries are inserted in the battery holder with the + polarities incorrectly matching the + - marks. Insert the batteries with the correct polarity. (p. 171) The batteries are dead. Insert new ones. (p. 171)
The picture from a TV or VCR does not appear even when your camcorder is connected to outputs on the TV or VCR.	DISPLAY is set to V-OUT/LCD in the menu settings. Set it to LCD. (p. 85)
The melody or beep sounds for 5 seconds.	Moisture condensation has occurred. Remove the cassette and leave your camcorder for at least hour to acclimatize, (p. 158) Some troubles has occurred in your camcorder. Remove the cassette and insert it again, then operate your camcorder.
While charging the battery pack, no indicator appears or the indicator flashes in the display window.	 The AC power adaptor is disconnected. Connect it firmly. (p. 18) Something is wrong with the battery pack. Contact your Sony dealer or local authorized Sony service facility.

145

144

146

Your camcorder has a self-diagnosis display function. This function displays the current condition of your camcorder as a 5-digit code (a combination of a letter and figures) on the LCD screen, in the viewfinder or in the display window. If a 5-digit code is displayed, check the following code chart. The last two digits (indicated by ICID) will differ depending on the state of your camcorder.

Self-diagnosis display

Five-digit display	Cause and/or Corrective Actions	
C:04:□□	 You are using a battery pack that is not an "InfoLITHIUM" battery pack. Use an "InfoLITHIUM" battery pack. (p. 17) 	
C:21:□□	Moisture condensation has occurred. Remove the cassette and leave your camcorder for at least 1 hour to acclimatize. (p. 158)	
C:22:□□	 The video heads are dirty. → Clean the heads using the Sony V8-25CLD cleaning cassette (not supplied). (p. 159) 	
C:31:□□	A malfunction other than the above that you can service has	
C:32:□□	 occurred. Remove the cassette and insert it again, then operate your camcorder. 	
	→ Disconnect the mains lead of the AC power adaptor or remove the battery pack. After reconnecting the power source, operate your camcorder.	
E:61:□□	 A malfunction that you cannot service has occurred. 	
E:62:□□	→ Contact your Sony dealer or local authorized Sony service facility and inform them of the 5-digit code. (example: E:61:10)	

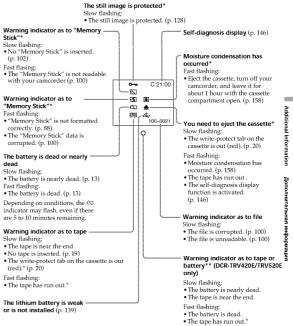

If you are unable to rectify the problem even if you try corrective actions a few times, contact your Sony dealer or local authorized Sony service facility.

Warning indicators and messages

If indicators and messages appear on the LCD screen, in the viewfinder or in the display window, check the following:

See the page in parentheses "()" for more information.

Warning indicators

1-34

* You hear the melody or beep sound.
** This indicator appears in the viewfinder only. 147

Maintenance information and precautions

Moisture condensation

If your camcorder is brought directly from a cold If your camcorder is brought directly from a cold place to a warm place, moisture may condense inside your camcorder, on the surface of the tape, or on the lens. In this condition, the tape may stick to the head drum and be damaged or your camcorder may not operate correctly. If there is moisture inside your camcorder, the beep sounds and the \blacksquare indicator flashes. When the \triangle indicator flashes at the same time, the cassette is inserted in your camcorder. If moisture condenses on the lens, the indicator will not appear

Warning indicators and messages

Конденсация влаги

Если видеокамера принесена прямо из Если видеокамера принесена прямо из холодного места в теплое, то внутри видеокамеры, на поверхности ленты или на объективе может произойти конденсанция влаги. В таком состоянии лента может прилигнуть к барабану головки и будет повреждена или же видеокамера не сможет работать надлежащим обласом. Если внутри видеокамеры произошля конденсация влаги, то прогавомат замиельных сигыел а на экпаме. видеокамеры произошла конденсация влаги, то прозвучит зуммерный сигнал, а на экране ЖКД будет мигать индикатор Ш. Если в то же самое время будет мигать индикатор ♠, это значит, что в видеокамеру вставлена кассета. Если влага сконденсировалась на объективе, индикатор появляться не будет

Если произошла конденсация влаги

Еслі піримосшна кондельсация влагі на Ни одна из функций, кроме выталкивания кассетьі, не будет работать. Изалежите кассету, выключите видеомамеру и оставьте ее приблизительно на 1 час с открытым кассетным отсеком. Если при повторном включении питания индикатор № не появится на дисплее, Вы можете снова пользоваться видеокамерой.

Бримечание по конденсации влаги
Влага может образоваться, если Вы
принесете Вашу видеокамеру из холодного
места в теплое (или наоброг) или когда Вы
используете Вашу видеокамеру в жарком
месте в спедуощих случаять:

— Вы принесли Вашу видеокамеру с лыжного
склона в помещение, где функционирует
обогреватель.

— Вы принесли Вашу видеокамеру из
автомобили или из комнаты с воздушным
кондиционированием в жаркое место на
улице.

- кондиционнучения с после грозы или деятельного в после грозы или дождя.

 Вы используете Вашу видеокамеру в очен жарком и влажном месте.

Как предотвратить конденсацию влаги Как предотвра ит в конденсацию влаги Если видеокамера принесена из холодного места в теплое, то положите видеокамеру в полизтивнеовый пакет и плотно заклейте его. Выньте видеокамеру из полизтиленового пакета, когда температура воздуха внутри пакета достинет температуры окружающего воздуха (приблизительно через 1 час).

Precautions

Camcorder operation

- Camcorder operation

 Operate your camcorder on 7.2 V (battery pack) or 8.4 V (AC power adaptor).

 For DC or AC operation, use the accessories recommended in this operating instructions.

 If any solid object or liquid get inside the casing, unplug your camcorder and have it checked by a 50ny dealer before operating it any further.

 Avoid rough handling or mechanical shock. Be particularly careful of the lens.

 Keep the POWER switch set to OFF (CHARGE) when you are not using your camcorder.

 Do not wrap your camcorder with a towel, for example, and operate it. Doing so might cause heat to build up inside.

 Keep pour camcorder away from strong

- heat to build up inside.

 Keep your camcorder away from strong magnetic fields or mechanical vibration. Noise may appear on the image.

 Do not touch the LCD screen with your fingers or a sharp-pointed object.

 If your camcorder is used in a cold place, a residual image may appear on the LCD screen or in the viewfinder. This is not a malfunction.

 While using your camcorder, the back of the LCD screen may heat up. This is not a malfunction.

On handling tapes
Do not insert anything into the small holes on the rear of the cassette. These holes are used to sense the type and hickness of the tape and if the recording tab is in or out.

Camcorder care

- Camoorder care

 Remove the tape, and periodically turn on the power, operate the CAMERA and VTR (DCR-TRV620E)/FLAYER (DCR-TRV420E/TRV520E) sections and play back a tape for about 3 minutes when your camcorder is not to be used for a long time.

 Clean the lens with a soft brush to remove dust. If there are fingerprints on the lens, remove them with a soft cloth.

- them with a soft cloth.

 Clean the camcorder body with a dry soft cloth, or a soft cloth lightly moistened with a mild detergent solution. Do not use any type of solvent which may damage the finish.

 Do not let sand get into your camcorder. When you use your camcorder on a sandy beach or in a dusty place, protect it from the sand or dust. Sand or dust may cause your camcorder to malfunction, and sometimes this malfunction cannot be repaired. 160

Maintenance information and precautions

Battery pack

- cified charger or video
- Use only the specified charger or video equipment with the charging function.
 To prevent accident from a short circuit, do not allow metal objects to come into contact with
- allow metal objects to come into contact with the battery terminals.

 *Keep the battery pack away from fire.

 *Never expose the battery pack to temperatures above 60°C (140°F), such as in a car parked in the sun or under direct sunlight.

 *Keep the battery pack dry.

 *Do not expose the battery pack to any mechanical shock.

 *Do not disassemble nor modify the battery
- Attach the battery pack to the video equipment
- Charging while some capacity remains does not affect the original battery capacity.

Note on dry batteries
To avoid possible damage from battery leakage or corrosion, observe the following:

- Be sure to insert the batteries with the +-

- polarities matched to the + marks.

 Dry batteries are not rechargeable.

 Do not use a combination of new and old
- batteries. - Do not use different types of batteries
- Current flows from batteries when you are no using them for a long time.

 – Do not use leaking batteries.

- If batteries are leaking

 Wipe off the liquid in the battery compartment carefully before replacing the batteries.

 If you ouch the liquid, wash it off with water.
- If the liquid get into your eyes, wash your eyes with a lot of water and then consult a doctor.

If any problem occurs, unplug your camcorder and contact your nearest Sony dealer.

Батарейный блок

- Окпользуйте только рекомендуемое зарядное устройство или видеоаппаратуру с зарядное функцией.

 Для предотвращения несчастного случая яз-за короткого замыкания не допускайте контакта металлических предметов с голюсами батарей-ного блока.

 Не располагайте батарейный блок вблизи
- огня.

 Не подвергайте батарейный блок воздействию температур свыше 60°С, например, в припаркованном под солнцем автомобиле или под прямым солнечным светом.
- Следите за тем, чтобы батарейный блок
- Следите за тем, чтооы оатареиныи оло был сухим.
 Не подвергайте батарейный блок воздействию каких-либо механических

- ударов.
 Не разбирайте и не видоизменяйте батарейный блок.
 Прикрепляйте батарейный блок к видеоапларатуре плотно.
 Зарядка в случае оставшейся емкости заряда не отражается на емкости первоначального заряда.

Примечание к сухим батарейкам

Во избежание возможного повреждения видеокамеры вследствие утечки внутреннего вещества батареек или коррозии соблюдайте

- При установке батареек соблюдайте правильную полярность + в соответствии
- с метками + -. Сухие батарейки нельзя перезаряжать. Не используйте новые батарейки вместе со
- старыми.
 Не используйте батарейки разного типа.
 Если батарейки не используются длительное
 время, они постепенно разряжаются.
 Не используйте батарейки, которые потекли.

Если произошла утечка внутреннего

- Если произошла утечка внутреннего вещества батареек

 Перед тем, как заменить батарейки, тщательно прогрите остатки жидкости в отсеке для батареек.

 В случае попадания жидкости на кожу, промойте жидкость водой.

 В случае попадания жидкости в глаза, промойте свои глаза большим количеств: воды, после чего обратитесь к врачу.

В случае возникновения каких-либо проблем отключите Вашу видеокамеру от источника питания и обратитесь в ближайший сервисный центр Sony.

56 Grip strap

57 LANC @ DIGITAL I/O jack

LANC stands for Local Application Control Bus System. The LANC control jack is used for controlling the tape transport of video equipment and other peripherals connected to the video equipment. This jack has the same function as the jack indicated as CONTROL L or REMOTE.

58 S VIDEO jack (p. 38)

1-37

59 (headphones) jack

60 AUDIO/VIDEO jack (p. 38, 44, 73, 116)

61 MIC (PLUG IN POWER) jack Connect an external microphone (not supplied). This jack also accepts a "plug-in-power" microphone.

62 i DV IN/OUT or i DV OUT jack

(p. 75, 116) The **i** DV IN/OUT or **i** DV OUT jack is i.LINK compatible.

52 Кнопка ЕЈЕСТ (стр. 19)

53 Лампочка доступа (стр. 102)

54 Отсек "Memory Stick" (стр. 102)

55 Кассетный отсек (стр. 19)

56 Ремень для захвата

58 Гнездо S VIDEO (стр. 38)

59 Гнездо ((головные телефоны)

60 Гнездо AUDIO/VIDEO (стр. 38, 44, 73, 116)

[3] Гнездо MIC (PLUG IN POWER)
Для подсоединения внешнего микрофона (не прилагается). Это гнездо также позволяет подключить микрофон "с выключателем питания".

62 Гнездо в DV IN/OUT или в DV OUT (стр.

75, 116) Гнездо в DV IN/OUT или в DV OUT совместимо с каналом передачи сигналов I.LINK.

Fastening the grip strap

стегивание ремня для захвата

Fasten the grip strap firmly.

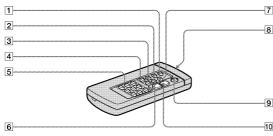

Пристегните ремень для захвата плотно

Remote Commander

The buttons that have the same name on the Remote Commander as on your camcorde function identically to the buttons on your camcorder

Пульт дистанционного управления

Кнопки пульта дистанционного управления, которые имеют одинаковые наименования кнопками на видеокамере, функционируют

- 1 PHOTO button (p. 41, 105)
- 2 DISPLAY button (p. 34)
- 3 SEARCH MODE button (p. 69, 71)
- [4] **I**◀◀**/▶►I** buttons (p. 68, 71)
- [5] Tape transport buttons (p. 36)
- $\underline{\textbf{6}} \hspace{0.1cm} \textbf{DATA} \hspace{0.1cm} \textbf{CODE} \hspace{0.1cm} \textbf{button} \hspace{0.1cm} (p. \hspace{0.1cm} 34)$
- 7 ZERO SET MEMORY button (p. 63, 68) 8 Transmitter
- Point toward the remote sensor to control the camcorder after turning on the camcorder.
- 9 START/STOP button (p. 21)
- 10 Power zoom button (p. 24)

170

- 7 KHORKA ZERO SET MEMORY (CTp. 63, 68)
- 8 Передатчик Передатчик Направьте на датчик для управления видеокамерой после включения видеокамеры.
- 9 KHORKA START/STOP (CTp. 21)
- 10 Кнопка приводного вариообъектива

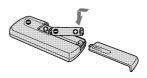

Identifying the parts and controls

To prepare the Remote Commander

Insert 2 R6 (size AA) batteries by matching the and – polarities on the batteries to the + – marks inside the battery compartment.

Обозначение частей и регуляторов

Для подготовки пульта дистанционного управления Вставьте две батарейки R6 (размера AA), соблюдая надлежащую полярность + и – на батарейках со знаками + – внутри отсека для батареек.

Notes on the Remote Commander

- Notes on the kemote Commander

 *Point the remote sensor away from strong light
 sources such as direct sunlight or overhead
 lighting, Otherwise, the Remote Commander
 may not function properly.

 *Your camcorder works in the Commander
 mode VTR 2. Commander modes
- 1, 2 and 3 are used to distinguish your camcorder from other Sony VCRs to avoid remote control misoperation. If you use another Sony VCR in the Commander mode VTR 2, we recommend changing the Commander mode or covering the sensor of the VCR with black

Примечания к пульту дистанционного равления

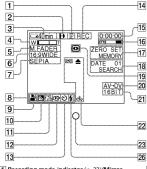

- управления
 Держите дистанционный датчик подальше держите дистанционный даттик подально от сильных источников света, как например, прямые солнечные лучи или иллюминация. В противном случае дистанционное управление может не действовать.
- управление может по докольности. В Данная видеокамера работает в режиме пульта дистанционного управления VTR 2. Режимы пульта дистанционного управлени 1, 2 и 3 используются для отличия данной видеокамеры от других КВМ фирмы Sony во избежание неправильной работы дистанционного управления. Если Вы используете другой КВМ фирмы Sony, работающий в режиме VTR 2, мы рекомендуем Вам изменить режим пульта рекомендуем оди изменить режим пульта дистанционного управления или закрыть дистанционный датчик КВМ черной бумагой.

THIS NOTE IS COMMON FOR WIRING BOARDS AND SCHEMATIC DIAGRAMS (In addition to this, the necessary note is printed in each block)

(For printed wiring boards)

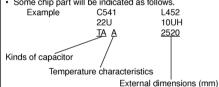

: Pattern from the side which enables seeing. (The other layers' patterns are not indicated)

- · Through hole is omitted.
- · Circled numbers refer to waveforms.
- · There are few cases that the part printed on diagram isn't mounted in this model.
- · Chip parts.

(For schematic diagrams)

- All capacitors are in μF unless otherwise noted. pF : μ uF. 50 V or less are not indicated except for electrolytics and tantalums.
- Chip resistors are 1/10 W unless otherwise noted. $k\Omega = 1000 \Omega$. $M\Omega = 1000 k\Omega$.
- Caution when replacing chip parts. New parts must be attached after removal of chip. Be careful not to heat the minus side of tantalum capacitor, Because it is damaged by the heat.
- Some chip part will be indicated as follows.

- · Constants of resistors, capacitors, ICs and etc with XX indicate that they are not used.
- In such cases, the unused circuits may be indicated.
- Parts with * differ according to the model/destination. Refer to the mount table for each function.
- · All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- Signal name

XEDIT → EDIT PB/XREC → PB/REC

• ---: non flammable resistor

• +wv-: fusible resistor

• ____: panel designation • ----: B+ Line *

• ---: B- Line *

IN/OUT direction of (+,−) B LINE. *

adjustment for repair. *

Circled numbers refer to waveforms. *

* Indicated by the color red.

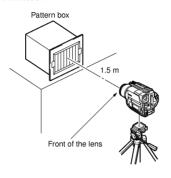

Note: The components identified by mark \triangle or dotted line with mark \triangle are critical for safety. Replace only with part number specified.

Note: Les composants identifiés par une marque

> Ne les remplacer que par une pièce portant le numéro spécifie.

(Measuring conditions voltage and waveform)

- Voltages and waveforms are measured between the measurement points and ground when camera shoots color bar chart of pattern box. They are reference values and reference waveforms *
- (VOM of DC 10 M Ω input impedance is used)
- Voltage values change depending upon input impedance of VOM used.)
- 1. Connection

2. Adjust the distance so that the output waveform of Fig. a and the Fig. b can be obtain.

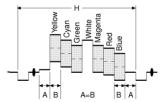

Fig. a (Video output terminal output waveform)

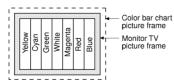

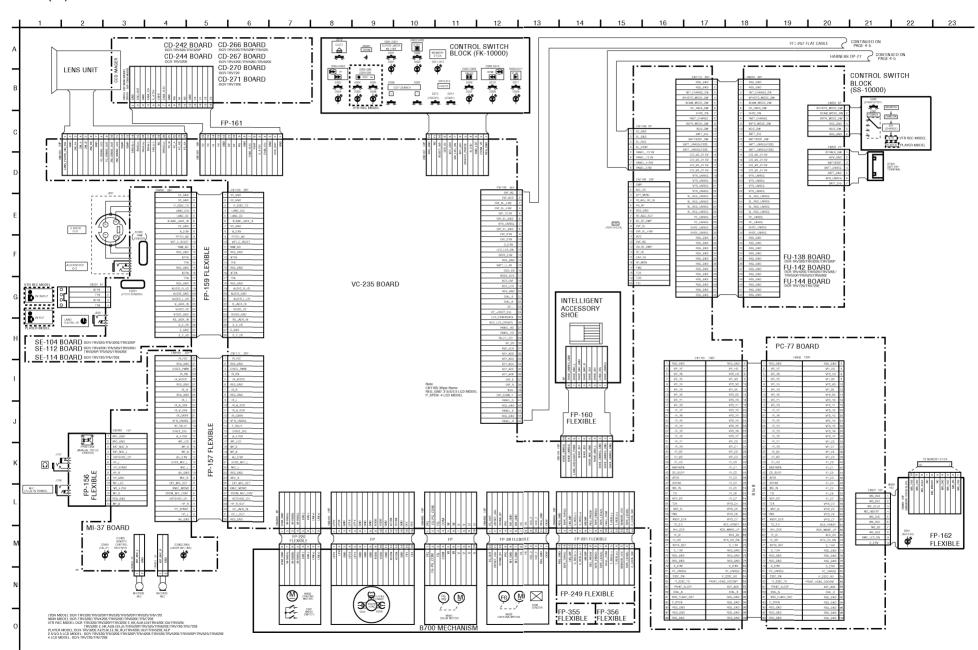

Fig.b (Picture on monitor TV)

When indicating parts by reference number, please include the board name.

SECTION 5 ADJUSTMENTS

1. Before starting adjustment

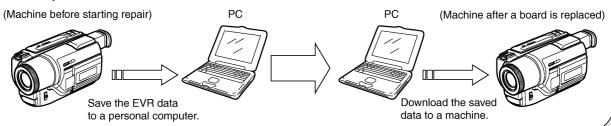

EVR Data Re-writing Procedure When Replacing Board

The data that is stored in the repair board, is not necessarily correct.

Perform either procedure 1 or procedure 2 or procedure 3 when replacing board.

Procedure 1

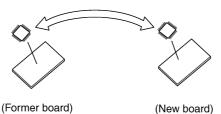

Save the EVR data of the machine in which a board is going to be replaced. Download the saved data after a board is replaced.

Procedure 2

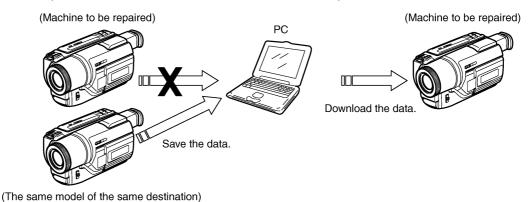

Remove the EEPROM from the board of the machine that is going to be repaired. Install the removed EEPROM to the replaced board.

Remove the EEPROM and install it.

Procedure 3

When the data cannot be saved due to defective EEPROM, or when the EEPROM cannot be removed or installed, save the data from the same model of the same destination, and download it.

5-1

After the EVR data is saved and downloaded, check the respective items of the EVR data.

(Refer to page 5-3 for the items to be checked)

--

1-1. Adjusting items when replacing main parts and boards
Adjusting items when replacing main parts
When replacing main parts, adjust the items indicated by ● in the following table.

			Bl	ock	repla	acen	nent						Re	eplac	ced p		ınted	l par	t rep	olace	mer	nt

	CF board
2.5 LCD model	CF-69
3/3.5 LCD model	CF-70
4 LCD model	CF-72

Connect the equipment for adjustments according to Fig. 5-1-3,
 4.

2) The front panel block (MI-37 board, focus dial, microphone unit) must be assembled because the focus ring is used for adjustments.

Note 4: As removing the cabinet (R) (removing the VC-235 board CN1105) means removing the lithium 3V power supply (CF-69/70/72 board BH001), data such as date, time, user-set menus will be lost. After completing adjustments, reset these data. If the cabinet (R) has been removed, the self-diagnosis data, data on history of use (total drum rotation time, etc.) will be lost. Before removing, note down the self-diagnosis data and data on history use (data of page: 2, address: A2 to AA). (Refer to "SELF-DIAGNOSIS FUNCTION" for the self-diagnosis data, and to "5-4. Service Mode" for the data on the history use.)

Note 5: Setting the "Forced Camera Power ON" Mode

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 10, set data: 01, and press the PAUSE button of the adjustment remote commander. The above procedure will enable the camera power to be turned on with the power switch (SS-10000 block) removed. After completing adjustments, be sure to exit the "Forced Camera Power ON Mode".

Note 6: Exiting the "Forced Camera Power ON" Mode

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 10, set data: 00, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 0, address: 01, and set data: 00.

1-1-3. Precaution

1. Setting the Switch

Unless otherwise specified, set the switches as follows and perform adjustments without loading cassette.

1.	POWER switch (SS-10000 block) CAMERA	8.	FOCUS switch (MF-10000)	MANUAL
2.	NIGHT SHOT switch (Lens block) OFF	9.	PROGRAM AE (CF-69/70, KP-009 board)	Auto
3.	DEMO MODE (Menu display)OFF	10.	BACK LIGHT (CF-69/70, KP-009 board).	OFF
4.	DIGITAL ZOOM (Menu display)OFF	11.	PICTURE EFFECT (CF69/70/72 board)	OFF
5.	STEADY SHOT (Menu display)OFF	12.	DIGITAL EFFECT (CF-69/70/72 board)	OFF
	DISPLAY (Menu display)		16:9 WIDE (MENU display)	OFF
7	DISPLAY (CF-69/70/72 board) ON			

2. Order of Adjustments

Basically carry out adjustments in the order given.

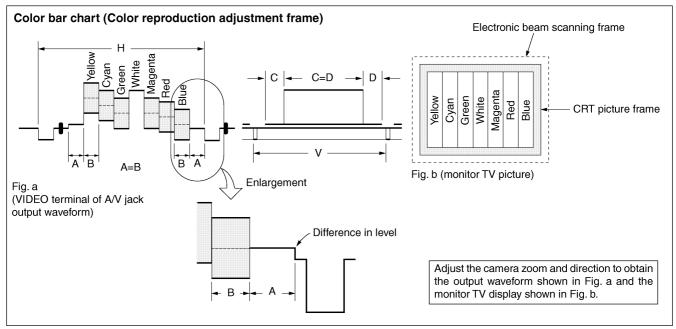

Fig. 5-1-6

5-9

3. Subjects

- Color bar chart (Color reproduction adjustment frame)
 When performing adjustments using the color bar chart, adjust
 the picture frame as shown in Fig. 5-1-6. (Color reproduction
 adjustment frame)
- 2) Clear chart (Color reproduction adjustment frame)
 Remove the color bar chart from the pattern box and insert a clear chart in its place. (Do not perform zoom operations during this time)
- Chart for flange back adjustment
 Join together a piece of white A0 size paper (1189mm × 841 mm) and a piece of black paper to make the chart shown in Fig. 5-1-7.

Note: Use a non-reflecting and non-glazing vellum paper. The size must be A0 or larger and the joint between the white and black paper must not have any undulations.

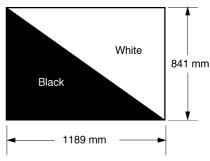

Fig. 5-1-7

1-2. INITIALIZATION OF 7, 8, C, D, E, F PAGE DATA AND MODIFICATION OF B PAGE DATA

1-2-1. INITIALIZATION OF 8, C, D PAGE DATA 1. Initializing the 8, C, D Page Data

Note 1: If "Initialization of Pages 8, C, D" is executed, all data on pages 8, C and D are initialized. (Only an individual page cannot be initialized)

Note 2: If the 8, C, D page data has been initialized, "Modification of 8, C, D Page Data" and following adjustments need to be performed again.

- 1) LCD electronic viewfinder system adjustment
- 2) LCD system adjustment
- 3) System control system adjustment
- 4) Servo and RF system adjustment
- 5) "Chroma BPF fo adjustment", "S VIDEO OUT Y level adjustment" and "S VIDEO OUT chroma level adjustment" of the video system adjustments.

Adjusting Page	8
Adjusting Address	00 to FF
Adjusting Page	С
Adjusting Address	10 to FF
Adjusting Page	D
Adjusting Address	10 to FF

Initializing Method:

- 1) Select page: 0, address: 01, and set data: 80.
- Select page: 3, address: 81, set data: 10, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 3, address: 80, set data: 0A, and press the PAUSE button of the adjustment remote commander.
- 4) Select page: 3, address: 80, and check that the data changes to "1A".
- 5) Select page: 0, address: 01, and set data: 00.
- 6) Perform "Modification of 8, C, D Page Data".

2. Modification of 8, C, D Page Data

If the 8, C, D page data has been initialized, change the data of the "Fixed data-2" address shown in the following table by manual input.

Modifying Method:

- 1) Before changing the data, select page: 0, address: 01, and set data: 01
- 2) New data for changing are not shown in the tables because they are different in destination. When changing the data, copy the data built in the same model.

Note: If copy the data built in the different model, the camcorder may not operate.

- 3) When changing the data, press the PAUSE button of the adjustment remote commander each time when setting new data to write the data in the non-volatile memory.
- Check that the data of adjustment addresses is the initial value.
 If not, change the data to the initial value.

Processing after Completing Modification of D Page data

- 1) Select page: 2, address: 00, and set data: 29.
- 2) Select page: 2, address: 01, and set data: 29, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 0, address: 01, and set data: 00.

1-2-2. INITIALIZATION OF 7, E, F PAGE DATA

1. Initializing the 7, E, F Page Data

Note 1: If "Initialization of Pages 7, E, F" is executed, all data on pages 7, E and F are initialized. (Only an individual page cannot be initialized)

Note 2: If the 7, E, F page data has been initialized, "Modification of 7, E, F Page Data" and following adjustments need to be performed again.

- 1) Camera system adjustments
- 2) "Hi8/standard 8 mm switching position adjustment" and "CAP FG duty adjustment" of the servo & RF system adjustments
- "27 MHz/36 MHz origin oscillation adjustment" and "Hi8/ standard 8 mm AFC fo adjustment" of the video system adjustment
- 4) IR transmitter adjustments
- 5) Audio system adjustments

Adjusting Page	7
Adjusting Address	00 to FF
Adjusting Page	Е
Adjusting Address	00 to FF
Adjusting Page	F
Adjusting Address	10 to FF

Initializing Method:

- 1) Select page: 0, address: 01, and set data: 80.
- 2) Select page: 6, address: 00, and set data: 55 (NTSC) or data: 51 (PAL).
- Select page: 6, address: 01, set data: 55 (NTSC) or data: 51 (PAL), and press the PAUSE button of the adjustment remote commander.
- 4) Select page: 6, address: 02, and check that the data is "01".
- 5) Select page: 0, address: 01, and set data: 00.
- 6) Perform "Modification of 7, E, F Page Data".

2. Modification of 7, E, F Page Data

If the 7, E, F page data has been initialized, change the data of the "Fixed data-2" address shown in the following tables by manual input.

Modifying Method:

- 1) Before changing the data, select page: 0, address: 01, and set data: 01
- 2) New data for changing are not shown in the tables because they are different in destination. When changing the data, copy the data built in the same model.

Note: If copy the data built in the different model, the camcorder may not operate.

- 3) When changing the data, press the PAUSE button of the adjustment remote commander each time when setting new data to write the data in the non-volatile memory.
- 4) Check that the data of adjustment addresses is the initial value. If not, change the data to the initial value.

Processing after Completing Modification of 7, E, F Page data

- 1) Select page: 2, address: 00, and set data: 29.
- Select page: 2, address: 01, and set data: 29, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 0, address: 01, and set data: 00.

F7 to FF			Fixed data-1 (Initialized data)	

1-2-3. MODIFICATION OF B PAGE DATA

1. Modification of B Page Data

When replacing PC-77 board or IC105 of PC-77 board, change the data of the "Fixed data-2" address shown in the following tables by manual input.

Mode	Memory
Adjusting Page	В
Adjusting Address	17 to 1A

Modifying Method:

- 1) Before changing the data, select page: 0, address: 01, and set data: 01.
- New data for changing are not shown in the tables because they are different in destination. When changing the data, copy the data built in the same model.

Note: If copy the data built in the different model, the camcorder may not operate.

3) When changing the data, press the PAUSE button of the adjustment remote commander each time when setting new data to write the data in the non-volatile memory.

Processing after Completing Modification of B Page data

- Select page: 5, address: 0E, set data: 00, and press the PAUSE button of the adjustment remote commander.
- 2) Select page: 5, address: 01, set data: FB, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 5, address: 00, set data: 01, and press the PAUSE button of the adjustment remote commander.
- 4) Select page: 5, address: 0E, and check that the data is "01".
- 5) Select page: 0, address: 01, and set data: 00.

2. B Page Table

Note: Fixed data-2: Modified data. (Refer to "1. Modification of B Page Data")

Address	Remark
00 to 16	Fixed data-1 (Initialized data)
17	Fixed data-2
18	Fixed data-1 (Initialized data)
19	Fixed data-2
1A	
1B to FF	Fixed data-1 (Initialized data)

1-3. CAMERA SYSTEM ADJUSTMENTS

Before perform the camera system adjustments, Check that the specified values of "27 MHz/36 MHz Origin Oscillation Adjustment", "S VIDEO OUT Y level Adjustment" and "S VIDEO OUT C level Adjustment" of "VIDEO SYSTEM ADJUSTMENT" are satisfied.

1. HALL Adjustment

For detecting the position of the lens iris, adjust the hall AMP gain and offset.

Subject	Not required
Measurement Point	Display data of page 1
Measuring Instrument	Adjustment remote commander
Adjustment Page	F
Adjustment Address	38, 39, 3A
Specified Value	88 to 8C during IRIS OPEN 15 to 19 during IRIS CLOSE

Note: Displayed data of page 1 of the adjustment remote commander.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 6, address: 94, and set data: 8A.
- 3) Select page: 6, address: 95, and set data: 17.
- 4) Select page: 6, address: 01, set data: 6D, and press the PAUSE button of the adjustment remote commander. (The HALL adjustment is performed and the adjustment data is stored in page: F, address: 38, 39 and 3A)
- 5) Select page: 6, address: 02, and check that the data is "01".
- 6) Select page: 6, address: 01, set data: 00, and press the PAUSE button.

Checking method:

- 1) Select page: 0, address: 03, and set data: 03.
- Select page: 6, address: 01, set data: 01, and press the PAUSE button.
- Select page: 1, and check that the display data (Note) during IRIS OPEN satisfies the specified value.
- 4) Select page: 6, address: 01, set data: 03, and press the PAUSE button
- Select page: 1, and check that the display data during IRIS CLOSE satisfies the specified value.

Processing after Completing Adjustments

- 1) Select page: 6, address: 94, and set data: 00.
- 2) Select page: 6, address: 95, and set data: 00.
- 3) Select page: 0, address: 03, and set data: 00.
- 4) Select page: 0, address: 01, and set data: 00.
- Select page: 6, address: 01, set data: 00, and press the PAUSE button.

2. Flange Back Adjustment (Using the minipattern box)

The inner focus lens flange back adjustment is carried out automatically. In whichever case, the focus will be deviated during auto focusing/manual focusing.

Subject	Siemens star chart with ND filter for the minipattern box (Note 1)
Measurement Point	Check operation on TV monitor
Measuring Instrument	
Adjustment Page	F
Adjustment Address	4E to 5D, 61

Note 1: Dark Siemens star chart.

Note 2: Perform this adjustment after performing "HALL adjustment".

Switch setting:

1)	NIGHT SHOT	OFF
2)	DIGITAL ZOOM (Menu display)	OFF
3)	STEADY SHOT (Menu display)	OFF

Preparation for adjustment

The minipattern box is installed as shown in the following figure. **Note:** The attachment lenses are not used.

Specified voltage: The specified voltage varies according to the minipattern box, so adjust the power supply output voltage to the specified voltage written on the sheet which is supplied with the minipattern box.

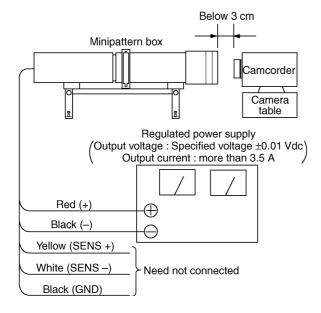

Fig. 5-1-8

Adjusting method:

- Install the minipattern box so that the distance between it and the front of the lens of the camcorder is less than 3 cm.
- Make the height of the minipattern box and the camcorder equal.
- Check that the output voltage of the regulated power supply is the specified voltage \pm 0.01 Vdc.
- Check that at both the zoom lens TELE end and WIDE end, the center of the Siemens star chart and center of the exposure screen coincide.
- Select page: 0, address: 01, and set data: 01. 5)
- Select page: 6, address: 82, and set data: 01. 6)
- Check that the data of page: F, address: 4E to 5D and 61 is the initial value (See table below).

Address	Data	Address	Data
4E	2E	57	00
4F	12	58	19
50	48	59	00
51	F1	5A	00
52	18	5B	04
53	5D	5C	00
54	66	5D	00
55	00	61	00
56	19		

- Select page: 6, address: 02, and check that the data is "00".
- Select page: 6, address: 01, set data: 13, and press the PAUSE button of the adjustment remote commander.
- Select page: 6, address: 01, set data: 27, and press the PAUSE
 - (The adjustment data will be automatically input to page: F, addresses: 4E to 5D and 61)
- 11) Select page: 6, address: 02, and check that the data is "01".

Processing after Completing Adjustments

- Turn OFF the main power supply (8.4 V).
- Perform "Flange Back Check".

3. Flange Back Adjustment (Using Flange Back Adjustment Chart Subject More Than 500 m Away)

The inner focus lens flange back adjustment is carried out automatically. In whichever case, the focus will be deviated during auto focusing/manual focusing.

3-1. Flange Back Adjustment (1)

Subject	Flange back adjustment chart (2.0 m from the front of the lens) (Luminance: 350 ± 50 lux)
Measurement Point	Check operation on TV monitor
Measuring Instrument	
Adjustment Page	F
Adjustment Address	4E to 5D, 61

Note: Perform this adjustment after performing "HALL adjustment".

Switch setting:

1)	NIGHT SHOT	OFF
2)	DIGITAL ZOOM (Menu display)	OFF
3)	STEADY SHOT (Menu display)	OFF

Adjusting method:

- Check that at both the zoom lens TELE end and WIDE end, the center of the chart for the flange back adjustment and center of the exposure screen coincide.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: 6, address: 82, and set data: 01.
- 4) Check that the data of page: F, address: 4E to 5D, 61 is the initial value (See table below).

Address	Data	Address	Data
4E	2E	57	00
4F	12	58	19
50	48	59	00
51	F1	5A	00
52	18	5B	04
53	5D	5C	00
54	66	5D	00
55	00	61	00
56	19		

- 5) Select page: 6, address: 02, and check that the data is "00".
- 6) Select page: 6, address: 01, set data: 13, and press the PAUSE button of the adjustment remote commander.
- 7) Select page: 6, address: 01, set data: 15, and press the PAUSE button.
 - (The adjustment data will be automatically input to page: F, addresses:4E to 5D, 61)
- 8) Select page: 6, address: 02, and check that the data is "01".

Processing after Completing Adjustments

- 1) Turn OFF the main power supply (8.4 V).
- 2) Perform "Flange Back Adjustment (2)".

3-2. Flange Back Adjustment (2)

Perform this adjustment after performing "Flange Back Adjustment (1)".

Subject	Subject more than 500m away
	(Subjects with clear contrast such as
	buildings, etc.)
Measurement Point	Check operation on TV monitor
Measuring Instrument	
Adjustment Page	F
Adjustment Address	4E to 5D, 61

Switch setting:

1)	NIGHT SHOT	.OFF
2)	DIGITAL ZOOM (Menu display)	.OFF
3)	STEADY SHOT (Menu display)	OFF.

Adjusting method:

- Set the zoom lens to the TELE end and expose a subject that is more than 500 m away (subject with clear contrast such as building, etc.). (Nearby subjects less than 500 m away should not be in the screen)
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: 6, address: 82, and set data: 01.
- 4) Select page: 6, address: 02, and check that the data is "00".
- 5) Select page: 6, address: 01, set data: 13, and press the PAUSE button of the adjustment remote commander.
- Place a ND filter on the lens so that the optimum image is obtain.
- 7) Select page: 6, address: 01, set data: 29, and press the PAUSE button.
 - (The adjustment data will be automatically input to page: F, addresses: 4E to 5D, 61)
- 8) Select page: 6, address: 02, and check that the data is "01".

Processing after Completing Adjustments

- 1) Select page: 0, address: 01, and set data: 00.
- 2) Turn OFF the main power supply (8.4 V).
- 3) Perform "Flange Back Check".

4. Flange Back Check

Subject	Siemens star (PTB-450)	
	(2.0 m from the front of the lens)	
	(Luminance : approx. 200 lux)	
Measurement Point	Check operation on TV monitor	
Measuring Instrument		
Specified Value	Focused at the TELE end and WIDE end.	

Switch setting:

1)	NIGHT SHOT	OFF
2)	DIGITAL ZOOM (Menu display)	OFF
	STEADY SHOT (Menu display)	

Note: When the auto focus is ON, the lens can be checked if it is focused or not by observing the data on the page 1 of the adjustment remote commander.

1) Select page: 0, address: 03, and set data: 0F.

2) Page 1 shows the state of the focus.

1:00: XX Odd: Focused Even: Unfocused

Checking method:

- 1) Place the Siemens star 2.0 m from the front of the lens.
- To open the IRIS, decrease the luminous intensity to the Siemens star up to a point before noise appear on the image.
- 3) Select page: 6, address: 40, and set data: 02.
- 4) Select page: 6, address: 41, and set data: 01.
- 5) Shoot the Siemens star with the zoom TELE end.
- 6) Turn on the auto focus.
- 7) Check that the lens is focused (Note).
- 8) Select page: 6, address: 21, and set data: 10.
- 9) Shoot the Siemens star with the zoom WIDE end.
- 10) Observe the TV monitor and check that the lens is focused.

Processing after Completing Adjustments

- 1) Select page: 6, address: 21, and set data: 00.
- 2) Select page: 6, address: 40, and set data: 00.
- 3) Select page: 6, address: 41, and set data: 00.
- 4) Select page: 0, address: 03, and set data: 00.

5-19

. . . .

5. Optical Axis Adjustment

Correct a deviation of optical axis between the lens and the CCD imager.

If deviated, the screen center will be shifted when the lens is zoomed from TELE end to WIDE end.

Subject	Siemens Star (PTB-450)
Measurement Point	Check operation on monitor TV
Measuring Instrument	
Adjustment Page	F
Adjustment Address	60

Note: "Flange Back Adjustment" must be already finished.

Switch setting:

1)	NIGHT SHOT	OFF
	DIGITAL ZOOM (Menu display)	
3)	STEADY SHOT (Menu display) .	OFF

Preparation for adjustment:

- 1) Play a monoscope portion of the System Check tape (WR5-5ND(NTSC) or WR5-5CD(PAL)).
- Stick the optical axis deviation specification frame to the monitor screen so that the center of monoscope coincides with the center of specification frame.
- 3) Select the CAMERA mode.

Adjustment method:

- 1) Select page:0, address:01, and set data:01.
- Select page:F, address:60, and set data:00, then press the PAUSE button on the adjusting remote commander.
- 3) Place the Siemens Star at 2m position away from the lens.
- 4) Shoot the Siemens Star with the zoom at TELE end.
- Change the lens direction so that the center of Siemens Star coincides with the center of optical axis deviation specification frame.
- 6) Shoot the Siemens Star with the zoom at WIDE end.
- 7) Check on the monitor TV which area the center of Siemens Star exists of the optical axis deviation specification frame. At this time, measure the amount of deviation "L1" (distance from the center of Siemens Star to the center of optical axis deviation specification frame).
- From the following table, read correction data according to the area.

Area	Deviation Phase	Correction Data
1	22.6° to 67.5°	01
2	67.6° to 112.5°	02
3	112.6° to 157.5°	03
4	157.6° to 202.5°	04
5	202.6° to 247.5°	05
6	247.6° to 292.5°	06
7	292.6° to 337.5°	07
8	337.6° to 22.5°	08

- 9) Select page:F, address:60, and set correction data, then press the PAUSE button on the adjusting remote commander.
- 10) Shoot the Siemens Star with the zoom at TELE end.
- Change the lens direction so that the center of Siemens Star coincides with the center of optical axis deviation specification frame.
- 12) Shoot the Siemens Star with the zoom at WIDE end.
- 13) Measure the amount of deviation "L2" (distance from the center of Siemens Star to the center of optical axis deviation specification frame).
- 14) Compare L1 and L2, and make sure that the L2 is smaller than L1
 - If large, select page:F, address:60, and set data:00, then press the PAUSE button on the adjusting remote commander.

Processing after completion of adjustment:

1) Select page:0, address:01, and set data:00.

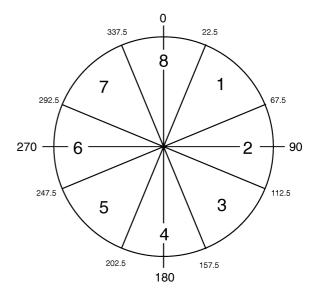

Fig. 5-1-9

6. Picture Frame Setting

Subject	Color bar chart (PTB-450) (Color reproduction adjustment frame) (1.5 m from the front of the lens)	
Measurement Point	Video output terminal of A/V jack	
Measuring Instrument	Oscilloscope and TV monitor	
Specified Value	A=B, C=D, E=F	

Note: "Flange Back Adjustment" must be already finished.

Switch setting:

1)	NIGHT SHOT	OFF
2)	DIGITAL ZOOM (Menu display)	OFF
3)	STEADY SHOT (Menu display)	OFF

Setting method:

- 1) Select page: 6, address: 82, and set data: 01.
- Adjust the zoom and the camera direction, and set to the specified position.
- 3) Select page: 6, address: 82, and set data: 00.
- 4) Mark the position of the picture frame on the monitor display, and adjust the picture frame to this position in following adjustments using "Color reproduction adjustment frame".

Check on the oscilloscope

1. Horizontal period

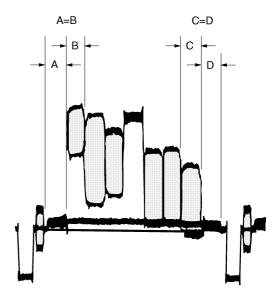

Fig. 5-1-10

2. Vertical period

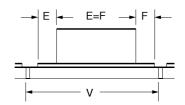

Fig. 5-1-11

Check on the monitor TV (Underscanned mode)

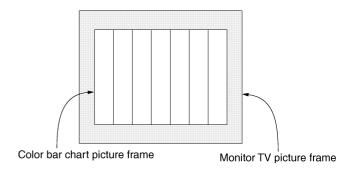

Fig. 5-1-12

7. Color Reproduction Adjustment

Adjust the color Separation matrix coefficient so that proper color reproduction is produced.

Subject	Color bar chart (PTB-450) (Color reproduction adjustment frame)
Measurement Point	Video output terminal of A/V jack
Measuring Instrument	Vectorscope
Adjustment Page	F
Adjustment Address	47, 49, D7, D8
Specified Value	All color luminance points should settle within each color reproduction frame.

Note: NTSC 720H model: DCR-TRV320/TRV320P/TRV520/TRV520P/TRV525/TRV720

PAL 960H model: DCR-TRV320E/TRV420E/TRV520E/ TRV620E/TRV720E

Switch setting:

1)	NIGHT SHOT	.OFF
2)	DIGITAL ZOOM (Menu display)	.OFF
3)	STEADY SHOT (Menu display)	OFF

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 6, address: 82, and set data: 01.
- Select page: F, address: 8B. After note down the data of this address, set data: 29 to the address, and press the PAUSE button of the adjustment remote commander.
- 4) Select page: 6, address: 01, set data: 3D, and press the PAUSE button.
- 5) Select page: F, address: 2B, set data: 17 (NTSC 720H model) or data: 97 (PAL 960H model), and press the PAUSE button.
- 6) Adjust the GAIN and PHASE of the vectorscope, and adjust the burst luminance point to the burst position of the color reproduction frame.
- Change the data of page: F, address: 47, 49, D7 and D8, and settle each color luminance point in each color reproduction frame.

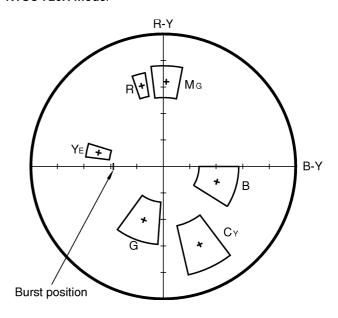

Note: Be sure to press the PAUSE button of the adjustment remote commander before changing the addresses. If not, the new data will not be written to the memory.

8) Select page: F, address: 8B, and set the data that is noted down at step 3).

Processing after Completing Adjustments

- Select page: F, address: 2B, set data: 13 (NTSC 720H model) or data: 93 (PAL 960H model), and press the PAUSE button of the adjustment remote commander.
- 2) Select page: 6, address: 01, set data: 00, and press the PAUSE button
- 3) Select page: 6, address: 82, and set data: 00.
- 4) Select page: 0, address: 01, and set data: 00.

NTSC 720H model

PAL 960H model

8. AWB & LV Standard Data Input

Subject	Clear chart (PTB-450) (Color reproduction adjustment frame)	
Adjustment Page	F	
Adjustment Address	3C to 41	

Note 1: This adjustment should be carried out upon completion of "Color Reproduction Adjustment".

Note 2: Check that the data of page: 6, address: 02 is "00". If not, turn the power of the unit OFF/ON.

Switch setting:

1)	NIGHT SHOT	OFF
2)	DIGITAL ZOOM (Menu display)	OFF
3)	STEADY SHOT (Menu display)	OFF

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 6, address: 82, and set data: 01.
- 3) Wait for 2 seconds.
- 4) Select page: 6, address: 01, set data: 11, and press the PAUSE button of the adjustment remote commander.
- 5) Select page: 6, address: 01, set data: 0D, and press the PAUSE button.
 - (When the standard data is take in, the data will be automatically input to page: F, address: 3C to 41)
- 6) Select page: 6, address: 02, and check that the data is "01".

Processing after Completing Adjustments

- Select page: 6, address: 01, set data: 00, and press the PAUSE button of the adjustment remote commander.
- 2) Select page: 6, address: 82, and set data: 00.
- 3) Select page: 0, address: 01, and set data: 00.
- 4) Perform "Auto White Balance Adjustment".

9. Auto White Balance Adjustment

Adjust to the proper auto white balance output data.

If it is not correct, auto white balance and color reproducibility will be poor.

Subject	Clear chart (PTB-450) (Color reproduction adjustment frame)
Filter	Filter C14 for color temperature correction
Measurement Point	Display data of page 1 (Note2)
Measuring Instrument	Adjustment remote commander
Adjustment Page	F
Adjustment Address	42, 43
Specified Value	NTSC 720H model
	R ratio: 2A40 to 2AC0
	B ratio: 60A0 to 6160
	PAL 960H model
	R ratio: 2C40 to 2CC0
	B ratio: 5FA0 to 6060

Note 1: Perform "Auto White Balance Standard Data Input" before this adjustment.

Note 2: Displayed data of page 1 of the adjustment remote commander.

Note 3: NTSC 720H model: DCR-TRV320/TRV320P/TRV520/TRV520P/TRV525/TRV720

PAL 960H model: DCR-TRV320E/TRV420E/TRV520E/ TRV620E/TRV720E

Switch setting:

1)	NIGHT SHOT	OFF
2)	DIGITAL ZOOM (Menu display)	OFF
3)	STEADY SHOT (Menu display)	OFF

Adjusting method:

- 1) Place the C14 filter for color temperature correction on the lens.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: 6, address: 82, and set data: 01.
- Select page: F, addresses: B8 to BB, and note down the data of each address.
- 5) Input the following data to page: F, addresses: B8 to BB.

Address		В8	В9	BA	BB
Data NTSC 720H model		2A	80	61	00
	PAL 960H model	2C	80	60	00

Note: Press the PAUSE button of the adjustment remote commander each time to set the data.

- 6) Select page: 6, address: 01, set data: A7, and press the PAUSE button.
- 7) Wait for 2 seconds.
- 8) Select page: 6, address: 01, set data: A5, and press the PAUSE button. (The auto white balance adjustment is performed and the adjustment data is stored in page: F, address: 42 and 43.)
- 9) Select page: 6, address: 02, and check that the data is "01".
- 10) Select page: 6, address: 01, set data: 3F, and press the PAUSE button.
- 11) Select page: 0, address: 03, and set data: 04.
- 12) Select page: 1, and check that the display data (Note2) satisfies the R ratio specified value.
- 13) Select page: 0, address: 03, and set data: 05.
- 14) Select page: 1, and check that the display data (Note2) satisfies the B ratio specified value.
- 15) Select page: F, addresses: B8 to BB, and input the data noted down at step 3).

Note: After setting each data, be sure to press the PAUSE button of the adjustment remote commander.

Processing after Completing Adjustments

- 1) Select page: 6, address: 01, set data: 00, and press the PAUSE button.
- 2) Select page: 6, address: 82, and set data: 00.
- 3) Select page: 0, address: 03, and set data: 00.
- 4) Select page: 0, address: 01, and set data: 00.

10. White Balance Check

Subject	Clear chart (PTB-450) (Color reproduction adjustment frame)	
Filter	Filter C14 for color temperature correction ND filter 1.0, 0.4 and 0.1	
Measurement Point	Video output terminal of A/V jack	
Measuring Instrument	Vectorscope	
Specified Value	Fig. 5-1-14 A to C	

Switch setting:

1)	NIGHT SHOT	OFF
2)	DIGITAL ZOOM (Menu display) .	OFF
3)	STEADY SHOT (Menu display)	OFF

Checking method:

- 1) Check that the lens is not covered with either filter.
- 2) Select page: 6, address: 82, and set data: 01.
- Select page: 6, address: 01, set data: 0F, and press the PAUSE button of the adjustment remote commander.
- 4) Check that the center of the white luminance point is within the circle shown Fig. 5-1-14 (A).
- 5) Select page: 6, address: 01, set data: 00, and press the PAUSE button.
- Select page: 6, address: 01, set data: 23, and press the PAUSE button.
- 7) Place the C14 filter on the lens.
- 8) Check that the center of the white luminance point settles in the circle shown Fig. 5-1-14 (B).
- 9) Remove the C14 filter, and place the ND filter 1.5 (1.0 + 0.4 + 0.1) on the lens.
- 10) Check that the white luminance point stopped moving, and then remove the ND filter 1.5.
- 11) Check that the center of the white luminance point settles within the circle shown Fig. 5-1-14 (C).

Processing after Completing Adjustments

- 1) Select page: 6, address: 01, set data: 00, and press the PAUSE button of the adjustment remote commander.
- 2) Select page: 6, address: 82, and set data: 00.

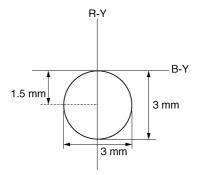

Fig. 5-1-14 (B)

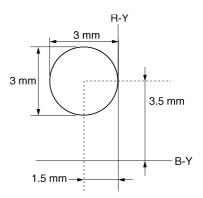

Fig. 5-1-14 (C)

11. Angular Velocity Sensor Sensitivity Data Preset and SteadyShot Check

Check the angular velocity sensor output.

Precautions on the Parts Replacement

There are two types of repair parts.

Type A ENC03JA Type B ENC03JB

Replace the broken sensor with a same type sensor. If replace with other type parts, the image will vibrate up and down or left and right during hand-shake correction operations.

Precautions on Angular Velocity Sensor

The sensor incorporates a precision oscillator. Handle it with care as if it dropped, the balance of the oscillator will be disrupted and operations will not be performed properly.

Subject	Not required
Measurement Point	Display data of page 1 (Note 1)
Measuring Instrument	Adjustment remote commander
Adjustment Page	F
Adjustment Address	5E, 5F
Specified Value	PITCH data: 2900 to 4D00
	YAW data: 2900 to 4D00

Note 1: Displayed data of page 1 of the adjustment remote commander.

1 : XX : XX Display data

Note 2: NTSC model: DCR-TRV320/TRV320P/TRV520/

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: F, address: 5E, set data: 69 (NTSC model) or 9C (PAL model), and press the PAUSE button.
- 3) Select page: F, address: 5F, set data: 63 (NTSC model) or A0 (PAL model), and press the PAUSE button.
- 4) Select page: 0, address: 03, and set data: 11.
- 5) Select page: 1, and check that the display data (Note 1) during PITCH data satisfies the specified value.
- 6) Select page: 0, address: 03, and set data: 12.
- 7) Select page: 1, and check that the display data during YAW data satisfies the specified value.

Processing after Completing Adjustments

- 1) Select page: 0, address: 03, and set data: 00.
- 2) Select page: 0, address: 01, and set data: 00.
- 3) Check that the steady shot operations have been performed normally.

1-4. MONOCHROME CRT ELECTRONIC VIEWFINEDER SYSTEM ADJUSTMENTS (DCR-TRV320/TRV320E/: E, HK, AUS, CN/TRV320P/TRV420E: CN/TRV520/TRV520E: E, HK, AUS, CN, JE/TRV520P)

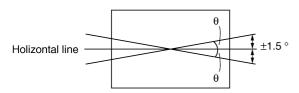

Note: NTSC model: DCR-TRV320/TRV320P/TRV520/TRV520P PAL model: DCR-TRV320E/TRV420E: CN/TRV520E: E, HK, AUS, CN, JE

1-4-1. Horizontal Slant Check

Mode	Playback	
Signal	Hi8/standard 8 mm alignment tape :	
	For checking operation	
	(WR5-8NSE(NTSC))	
	(WR5-8CSE(PAL))	
	Monoscope section	
Specified Value	± 1.5°	

Adjustment method:

- 1) Adjust RV904 (BRIGHT) (VF-129 board) so that the CRT can be seen easily and clearly.
- 2) Check that the difference between the horizontal line and the tilt of black mask satisfies the specified value.

Specified value : The image should be within \pm 1.5 $^{\circ}$ of the holizontal line.

Fig. 5-1-15

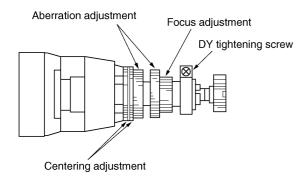

Fig. 5-1-16

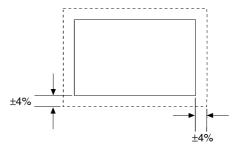

1-4-2. Centering Adjustment

Mode	Playback	
Signal	Hi8/standard 8 mm alignment tape :	
	For checking operation	
	(WR5-8NSE(NTSC))	
	(WR5-8CSE(PAL))	
	Monoscope section	
Specified Value	± 4%	

Adjustment method:

 Use the centering adjustment ring and adjust so that the left, light, top, and bottom sides of the display are uniform. (Refer to Fig. 5-1-15)

Note: As the centering position changes due to earth magnetism, rotate it 360° in the horizontal direction, and adjust with the center section of the modifying position.

Adjustment value: ±4%

Fig. 5-1-17

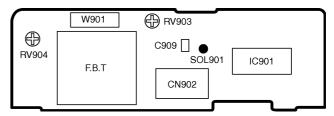

1-4-3. Focus Adjustment

Mode	Playback	
Signal	Hi8/standard 8 mm alignment tape :	
	For checking operation	
	(WR5-8NSE(NTSC))	
	(WR5-8CSE(PAL))	
	Monoscope section	

Adjustment method:

1) Adjust the focus ring to obtain the optimum focus. (Refer to Fig. 5-1-15)

VF-129 BOARD

1-4-4. Aberration Adjustment

Mode	VTR stop
Signal	Dot pattern
Specified Value	$b1 \le 2 \times a1$
	$b2 \le 0.8 \times a2$

Adjustment method:

- Adjust the aberration adjustment ring so that the tracing of the dot satisfies the specified value.
- 2) If the centering becomes displaced here, perform the centering adjustment from the beginning again.

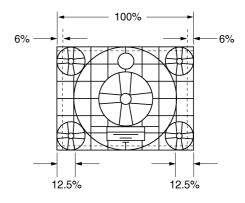

Fig. 5-1-18

1-4-5. Horizontal Amplitude Adjustment (VF-129 board)

Mode	Playback	
Signal	Hi8/standard 8 mm alignment tape :	
	For checking operation	
	(WR5-8NSE(NTSC))	
	(WR5-8CSE(PAL))	
	Monoscope section	
Adjusting Element	C909 (SOL901)	
Specified Value	12 ± 6%	

Adjustment method:

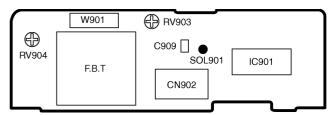

- 1) Rotate RV903, and adjust the top and bottom side of the monoscope image to the top and bottom edges of the display.
- 2) Rotate RV904 so that the brightness is the normal level.
- 3) Solder or unsolder SOL901 pattern of the H size adjustment capacitor (C909) to "short" or "open", so that the horizontal direction over scan becomes 12 ± 6% (Left and right totals).

SOL901	Size H
Open	Small
Short	Big

Fig. 5-1-19

VF-129 BOARD

1-4-6. Vertical Amplitude Adjustment (VF-129 board)

Mode	Playback
Signal	Hi8/standard 8 mm alignment tape : For checking operation (WR5-8NSE(NTSC)) (WR5-8CSE(PAL)) Monoscope section
Adjusting Element	RV903
Specified Value	10 ± 3%

Adjustment method:

1) Adjust RV903 so that the vertical direction over scan becomes $10 \pm 3\%$ (Top and bottom totals).

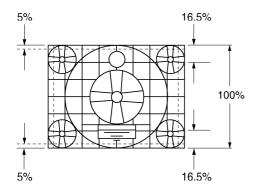

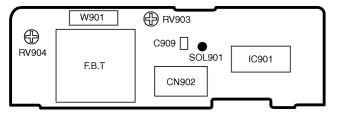

Fig. 5-1-20

VF-129 BOARD

1-4-7. Brightness Adjustment (VF-129 board)

Mode	Playback
Signal	Hi8/standard 8 mm alignment tape:
	For checking operation
	(WR5-8NSE(NTSC))
	(WR5-8CSE(PAL))
	Monoscope section
Adjusting Element	RV904

Adjustment method:

 Rotate RV904, and adjust so that the bright/dark sections of gray scale are displayed correctly. (The bright section should be unsatisfactory till the cross hatch appears vague in the monoscope circle. The dark section should be unsatisfactory till the darkest section of the gray scale cannot be differentiate.)

1-4-8. Horizontal Amplitude, Vertical Amplitude, Focus Check

"1-4-5. Horizontal Amplitude Adjustment" and "1-4-6. Vertical Amplitude Adjustment" should be both satisfy the specified values. If not, perform the adjustments from the beginning again. In this case, perform "1-4-7. Brightness Adjustment" again.

Moreover, check the focus, and if it found to be vague, perform "1-4-3. Focus Adjustment" and "1-4-4. Aberration Adjustment".

1-5. LCD ELECTRONIC VIEWFINDER SYSTEM ADJUSTMENTS

(DCR-TRV320E: AEP, UK, EE, NE, RU/TRV420E: AEP/TRV520E: AEP/TRV525/TRV620E/TRV720/TRV720E)

Note 1: The back light (fluorescent tube) is driven by a high voltage AC power supply. Therefore, do not touch the back light holder to avoid electrical shock.

Note 2: When replacing the LCD unit, be careful to prevent damages caused by static electricity.

Note 3: COLOR LCD EVF model:

3. VCO Adjustment (VF-141 board)

Set the VCO free-run frequency. If deviated, the EVF screen will be blurred

Mode	Camera
Subject	Arbitrary
Measurement Point	Pin ① of CN1108 (VCO) on VC-235 board
Measuring Instrument	Frequency counter
Adjustment Page	D
Adjustment Address	92 (NTSC model) 92, 93 (PAL model)
Specified Value	f=15734 ± 30 Hz (NTSC model) f=15625 ± 30 Hz (PAL model)

Note 1: NTSC model: DCR-TRV320/TRV320P/TRV520/TRV520P/TRV525/TRV720

PAL model: DCR-TRV320E/TRV420E/TRV520E/ TRV620E/TRV720E

Adjusting method (NTSC model):

- 1) Select page: 0, address: 01, and set data: 01.
- Select page: D, address: 92, change the data and set the VCO frequency (f) to the specified value.
- 3) Press the PAUSE button of the adjustment remote commander.
- 4) Select page: 0, address: 01, and set data: 00.

Adjusting method (PAL model):

- 1) Select page: 0, address: 01, and set data: 01.
- Select page: D, address: 92, change the data, and set the VCO frequency (f) to the specified value.
- 3) Press the PAUSE button of adjustment remote commander.
- 4) Read the adjustment data of step 2), and this data is named
- 5) Convert D₉₂ to decimal notation, and obtain D₉₂'. (Refer to Table 5-4-1 "Hexdecimal-decimal conversion table" of "5-4. Service Mode")
- Calculate D93' using following equations (decimal calculation), convert it to a hexdecimal number, and obtain D93.
 D93' = D92' - 26

Note2: If D_{93} ' < 0, then D_{93} = "00"

- 7) Select page: D, address: 93, set data D₉₃, and then press the PAUSE button of adjustment remote commander.
- 8) Select page: 0, address: 01, and set data: 00.

4. RGB AMP Adjustment (VF-141 board)

Set the D range of the RGB driver used to drive the LCD to the specified value. If deviated, the EVF screen will become blackish or saturated (whitish).

Mode	Camera
Subject	Arbitrary
Measurement Point	Pin ② of CN1108 (EVF VG) on VC-235 board
Measuring Instrument	Oscilloscope
Adjustment Page	D
Adjustment Address	95
Specified Value	A= 7.00 ± 0.1 Vp-p (COLOR LCD EVF model) A= 7.40 ± 0.1 Vp-p (B/W LCD EVF model)

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 95, change the data and set the voltage (A) between the reversed waveform pedestal and non-reversed waveform pedestal to the specified value.
- 3) Press the PAUSE button.
- 4) Select page: 0, address: 01, and set data: 00.

5. Contrast Adjustment (VF-141 board)

Set the level of the VIDEO signal for driving the LCD to the specified value. If deviated, the screen image will be blackish or saturated (whitish).

Mode	Camera
Subject	Arbitrary
Measurement Point	Pin ② of CN1108 (EVF VG) on VC-235 board
Measuring Instrument	Oscilloscope
Adjustment Page	D
Adjustment Address	99
Specified Value	A=2.40 ± 0.1 Vp-p (NTSC model) A=2.20 ± 0.1 Vp-p (PAL model)

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- Select page: D, address: 99, change the data and set the voltage (A) between the pedestal (0 IRE) and 100 IRE to the specified value.
 - (The data of address: 99, should be "00" to "7F")
- 3) Press the PAUSE button.
- 4) Select page: 0, address: 01, and set data: 00.

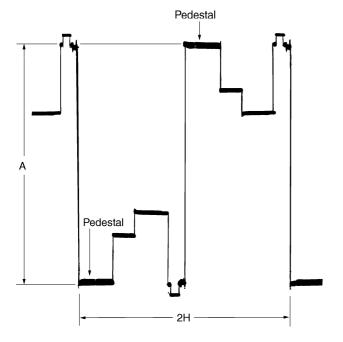

Fig. 5-1-22

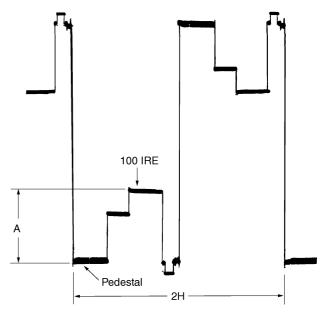

Fig. 5-1-23

6. Backlight Consumption Current Adjustment (VF-141 board)

Set the backlight luminance and color temperature. If deviated, the image may become dark or bright.

Mode	Camera
Subject	Arbitrary
Measurement Point	+Probe: Pin 1 of CN1108 (EVF BL 4.6V on VC-235 board -Probe: Pin 1 of CN1108 (EVF BL) on VC-235 board
Measuring Instrument	Digital voltmeter
Adjustment Page	D
Adjustment Address	9C, 9D, 9E
Specified Value	COLOR LCD EVF model: BRIGHT mode: A=15.0 ± 1 mV NORMAL mode: A=10.0 ± 1 mV B/W LCD EVF model: BRIGHT mode: A=11.0 ± 1 mV NORMAL mode: A=7.0 ± 1 mV

Note: COLOR LCD EVF model:

B/W LCD EVF model:

DCR-TRV320E: AEP, UK, EE, NE, RU/TRV420E: AEP/TRV520E: AEP

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- Select page: D, address: 9D, change the data, and set the votage difference (A) between Pin (10) of CN1108 (EVF BL 4.6V) and Pin (10) of CN1108 (EVF BL) to thes pecified value of BRIGHT mode.

(The data of address: 9D, should be "00" to "3F")

- 3) Press the PAUSE button of adjustment remote commander.
- 4) Read the adjustment data of step 2), and this data is named D_{9D}.
- Convert D9D to decimal notation, and obtain D9D'. (Refer to Table 5-4-1. "Hexdecimal-decimal conversion table" of "5-4. Service Mode".)
- Calculate D9c' using following equations (decimal calculation), convert it to a hexdecimal number, and obtain D9c. D9c'=D9p'+192
- 7) Select page: D, address: 9C, set data D₉C, and then press the PAUSE button of adjustment remote commander.
- 8) Select page: D, address: 9E, change the data, and set the votage difference (A) between Pin (10) of CN1108 (EVF BL 4.6V) and Pin (10) of CN1108 (EVF BL) to the specified value of NORMAL mode.

(The data of address: 9D, should be "00" to "1F")

- 9) Press the PAUSE button of adjustment remote commander.
- 10) Select page: 0, address: 01, and set data: 00.

7. White Balance Adjustment (VF-141 board) (DCR-TRV525/TRV620E/TRV720/TRV720E)

Correct the white balance.

If deviated, the EVF screen color cannot be reproduced.

Mode	Camera
Subject	Arbitrary
Measurement Point	Check on EVF display
Measuring Instrument	
Adjustment Page	D
Adjustment Address	97, 98
Specified Value	The EVF screen should not be colored.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 97 and 98, and set the data to the initial

Note: To write in the non-volatile memory (EEPROM), press the PAUSE button of the adjustment remote commander each time to set the data.

Address	Data
97	80
98	80

3) Check that the EVF screen is not colored. If colored, change the data of page: D, address: 97 and 98 so that the EVF screen is not colored.

Note: To write in the non-volatile memory (EEPROM), press the PAUSE button of the adjustment remote commander each time to set the data.

4) Select page: 0, address: 01, and set data: 00.

1-6. LCD SYSTEM ADJUSTMENTS

Note 1: The back light (fluorescent tube) is driven by a high voltage AC power supply. Therefore, do not touch the back light holder to avoid electrical shock.

Note 2: When replacing the LCD unit, be careful to prevent damages caused by static electricity.

Note 3: Set the LCD BRIGHT to the center.

Set the LCD COLOR (Menu display) to the center.

5. Contrast Adjustment (PD-117/118 board)

Set the level of the VIDEO signal for driving the LCD to the specified value. If deviated, the screen image will be blackish or saturated (whitish).

Mode	Camera
Subject	Arbitrary
Measurement Point	Pin ③ of CN5502 (VG) External trigger: Pin ④ of CN5502 (PANEL COM)
Measuring Instrument	Oscilloscope
Adjustment Page	D
Adjustment Address	AA
Specified Value	A=3.47 ± 0.07 Vp-p (TYPE S 61 k model) A=3.34 ± 0.07 Vp-p (TYPE S 123 k model) A=2.80 ± 0.07 Vp-p (2.5 LCD TYPE C 61 k model) A=3.00 ± 0.07 Vp-p (3.5/4 LCD TYPE C model)

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- Select page: D, address: AA, change the data and set the voltage (A) between the pedestal (0 IRE) and 100 IRE to the specified value.
 - (The data of address: AA, should be "00" to "7F")
- 3) Press the PAUSE button.
- 4) Select page: 0, address: 01, and set data: 00.

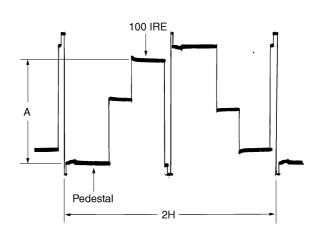

Fig. 5-1-26

6. COM AMP Adjustment (PD-117/118 board)

Set the common electrode drive signal level of LCD to the specified value.

· cercro ·	
Mode	Camera
Subject	Arbitrary
Measurement Point	Pin 4 of CN5502 (PANEL COM)
Measuring Instrument	Oscilloscope
Adjustment Page	D
Adjustment Address	A7
Specified Value	A=6.33 ± 0.05 Vp-p (2.5/3/4 LCD TYPE S model) A=6.10 ± 0.05 Vp-p (3.5 LCD TYPE S model) A=5.05 ± 0.05 Vp-p (2.5 LCD TYPE C 61 k model) A=5.50 ± 0.05 Vp-p (3.5/4 LCD TYPE C model)

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: A7, change the data and set the PANEL COM signal level (A) to the specified value.
- 3) Press the PAUSE button.
- 4) Select page: 0, address: 01, and set data: 00.

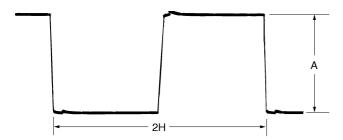

Fig. 5-1-27

7. V-COM Adjustment (PD-117/118 board)

Set the DC bias of the common electrode drive signal of LCD to the specified value.

If deviated, the LCD display will move, producing flicker and conspicuous vertical lines.

Mode	Camera
Subject	Arbitrary
Measurement Point	Check on LCD display
Measuring Instrument	
Adjustment Page	D
Adjustment Address	A4

Note: Perform "Bright Adjustment" and "Contrast Adjustment" before this adjustment.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: A4, change the data so that the brightness of the section A and that of the section B is equal.
- 3) Read the adjustment data of step 2), and this data is named Dref
- 4) Convert Dref to decimal notation, and obtain Dref'. (Refer to Table 5-4-1 "Hexdecimal-decimal conversion table" of "5-4. Service Mode")
- Calculate DA4' using following equations (decimal calculation), convert it to a hexdecimal number, and obtain DA4.
 DA4'=Dref'-8
- 6) Select page: D, address: A4, set data DA4, and then press the PAUSE button of adjustment remote commander.
- 7) Select page: 0, address: 01, and set data: 00.

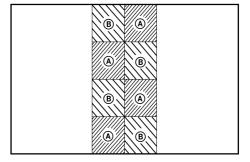

Fig. 5-1-28

8. White Balance Adjustment (PD-117/118 board)

Correct the white balance.

If deviated, the LCD screen color cannot be reproduced.

	<u> </u>
Mode	Camera

Measurement Point	Check on LCD display
Measuring Instrument	
Adjustment Page	D
Adjustment Address	A8, A9
Specified Value	The LCD screen should not be colored.

Note 1: Check the white balance only when replacing the following parts. If necessary, adjust them.

- 1. LCD panel
- 2. Light induction plate
- 3. IC5501

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: A8 and A9, and set the data to the initial value.

Note: To write in the non-volatile memory (EEPROM), press the PAUSE button of the adjustment remote commander each time to set the data.

Address	Data
A8	80
A9	80

3) Check that the LCD screen is not colored. If colored, change the data of page: D, address: A8 and A9 so that the LCD screen is not colored.

Note: To write in the non-volatile memory (EEPROM), press the PAUSE button of the adjustment remote commander each time to set the data.

4) Select page: 0, address: 01, and set data: 00.

5-2. MECHANISM SECTION ADJUSTMENT

Mechanism Section adjustments, checks, and replacement of mechanism parts, refer to the separate volume "8 mm Video Mechanism Adjustment Manual VII [B Mechanism]".

Note 1: NTSC model: DCR-TRV320/TRV320P/TRV520/ TRV520P/TRV525/TRV720 PAL model: DCR-TRV320E/TRV420E/TRV520E/ TRV620E/TRV720E

2-1. Hi8/STANDARD 8 mm MODE 2-1-1. HOW TO ENTER PLAYBACK MODE WITHOUT CASSETTE

- Refer to "Section 2. DISASSEMBLY" and supply the power with the cabinet assembly removed. (So that the mechanical deck can be operated)
- 2) Connect the adjustment remote commander to the LANC jack.
- Turn on the HOLD switch of the adjustment remote commander.
- Close the cassette compartment without loading a cassette and complete loading.
- 5) Select page: 0, address: 01, and set data: 01.
- 6) Select page: F, address: 22, set data: 81, and press the PAUSE button of the adjustment remote commander.
- Select page: D, address: 10, set data: 10, and press the PAUSE button of the adjustment remote commander.
- 8) Select page: 2, address: 2E, and set data: 02.
- 9) Press the PLAY button of the unit.

Note2: Be sure to carry out "Processing after checking Operations" after checking the operations.

Set the data of page: D, address: 10 to "12", if the sensor ineffective mode, forced VTR power supply ON mode is to be used together.

[Procedure after checking operations]

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 2, address: 2E, and set data: 00.
- Select page: F, address: 22, set data: 80, and press the PAUSE button of the adjustment remote commander.
- 4) Select page: D, address: 10, set data: 00, and press the PAUSE button of the adjustment remote commander.
- 5) Select page: 0, address: 01, and set data: 00.
- 6) Disconnect the power supply of the unit.

2-1-2. TAPE PATH ADJUSTMENT

1. Preparations for Adjustment

- 1) Clean the tape path face (tape guide, capstan shaft, pinch roller).
- 2) Connect the adjustment remote commander to the LANC jack.
- 3) Turn on the HOLD switch of the adjustment remote commander.
- 4) Select page: 0, address: 01, and set data: 01.
- 5) Select page: 2, address: 2E, and set data: 02.
- 6) Select page: F, address: 22, set data: 88, and press the PAUSE button of the adjustment remote commander.

 (Be sure to perform "Processing after operation" after completing adjustments)
- Connect the oscilloscope to VC-235 board CN1108 via CPC-13 jig (J-6082-443-A).

Channel 1: VC-235 board, CN1108 Pin (5) External trigger: VC-235 board, CN1108 Pin (8)

- Playback Hi8/standard 8 mm alignment tape for tracking. (WR5-1NP(NTSC)) (WR5-1CP(PAL))
- 9) Check that the oscilloscope RF waveform is flat at the entrance and exit.
 - If not flat, adjust according to the separate volume "8 mm Video Mechanical Adjustment Manual VII B Mechanism".
- 10) Perform "Processing after operations", after completing adjustment.

CN1108 of VC-235 board

Pin No.	Signal Name	Pin No.	Signal Name
1	SWP	11	VCO
2	AFC F0	12	EVF VG
3	BPF MONI	13	DV RF SWP
4	F0 ADJ RF IN	14	RF IN
5	PB RF	15	CAP FG
6	REG GND	16	RF MON
7	RF AGC OUT	17	TMS
8	VC RF SWP	18	TCK
9	EVF BL	19	TDO
10	EVF BL 4.6V	20	TDI

Table 5-2-1

[Procedure after operations]

- Connect the adjustment remote commander, and turn on the HOLD switch.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: 2, address: 2E, and set data: 00.
- 4) Select page: F, address: 22, set data: 80, and press the PAUSE button of the adjustment remote commander.
- 5) Select page: 0, address: 01, and set data: 00.
- 6) Remove the power supply from the unit.

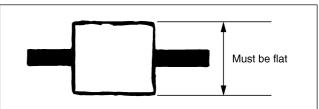

Fig. 5-2-1

2-2. DIGITAL8 MODE

2-2-1. HOW TO ENTER RECORD MODE WITHOUT CASSETTE

- 1) Connect the adjustment remote commander to the LANC jack.
- Turn the HOLD switch of the adjustment remote commander to the ON position.
- 3) Close the cassette compartment without the cassette.
- Select page: 3, address: 01, and set data: 0C, and press the PAUSE button of the adjustment remote commander. (The mechanism enters the record mode automatically)
 Note: The function buttons becomes inoperable.
- 5) To quit the record mode, select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjustment remote commander. (Whenever you want to quit the record mode, be sure to quit following this procedure)

2-2-2. HOW TO ENTER PLAYBACK MODE WITHOUT CASSETTE

- 1) Connect the adjustment remote commander to the LANC jack.
- 2) Turn the HOLD switch of the adjustment remote commander to the ON position.
- 3) Close the cassette compartment without the cassette.
- Select page: 3, address: 01, and set data: 0B, and press the PAUSE button of the adjustment remote commander. (The mechanism enters the playback mode automatically) Note: The function buttons becomes inoperable.
- 5) To quit the playback mode, select page: 3, address: 01, set data: 00, and press the PAUSE button of the adjustment remote commander. (Whenever you want to quit the playback mode, be sure to quit following this procedure)

2-2-3. OVERALL TAPE PATH CHECK

1. Recording of the tape path check signal

- Clean the tape running side (tape guide, capstan shaft, pinch roller).
- 2) Connect the adjustment remote commander to the LANC jack.
- Turn the HOLD switch of the adjustment remote commander to the ON position.
- 4) Set to the camera recording mode.
- 5) Select page: 3, address: 1C, set data: 5D, and press the PAUSE button of the adjustment remote commander.
- 6) Record for several minutes.
- 7) Release the camera recording mode.
- 8) Select page: 3, address: 1C, set data: 00, and press the PAUSE button.

2. Tape path check

- 1) Clean the tape running side (tape guide, capstan shaft, pinch roller).
- 2) Connect the adjustment remote commander to the LANC jack.
- Turn the HOLD switch of the adjustment remote commander to the ON position.
- Connect an oscilloscope to VC-235 board CN1108 via the CPC-13 jig (J-6082-443-A).

Channel 1: VC-235 board, CN1108 Pin (18) (Note) External trigger: VC-235 board, CN1108 Pin (19)

Note: Connect a 75 Ω resistor between Pins (6) of CN1108 and (6) (GND).

- 5) Select page: 2, address: 2E, and set data: 01.
- 6) Playback the tape path check signal.
- 7) Select page: 3, address: 33, and set data: 08.
- 8) Select page: 3, address: 26, and set data: 31.
- Check that the oscilloscope RF waveform is flat at the entrance and exit.

If not flat, perform "2-1-2. TAPE PATH ADJUSTMENT" of "2-1. Hi8/STANDARD 8 mm MODE".

- 10) Select page: 3, address: 26, and set data: 00.
- 11) Select page: 3, address: 33, and set data: 00.
- 12) Select page: 2, address: 2E, and set data: 00.

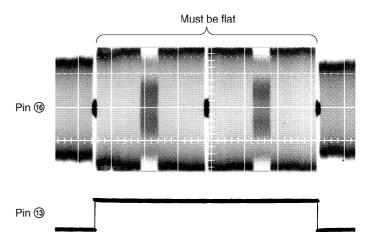

Fig. 5-2-2

5-3. VIDEO SECTION ADJUSTMENT

PREPARATIONS BEFORE ADJUSTMENTS 3-1.

Use the following measuring instruments for video section adjustments.

Note: NTSC model: DCR-TRV320/TRV320P/TRV520/TRV520P/

TRV525/TRV720

PAL model: DCR-TRV320E/TRV420E/TRV520E/

TRV620E/TRV720E

3-1-1. Equipment to Required

1) TV monitor

- Oscilloscope (dual-phenomenon, band width above 30 MHz with delay mode) (Unless specified otherwise, use a 10:1
- 3) Frequency counter
- 4) Pattern generator with video output terminal
- 5) Digital voltmeter
- 6) Audio generator
- 7) Audio level meter
- 8) Audio distortion meter
- 9) Audio attenuator
- 10) Regulated power supply
- 11) Digital8 alignment tapes
 - SW/OL standard (WR5-2D)

13) PAL Hi8/standard 8 mm alignment tapes (For PAL model)

• For tracking adjustment (WR5-1CP)

Parts code: 8-967-995-07

• For video frequency characteristics adjustment (WR5-7CE)

Parts code: 8-967-995-18

• For checking Standard 8 mode operations

For LP (WR5-4CL)

Parts code: 8-967-995-56

For SP (WR5-5CSP)

Parts code: 8-967-995-47

Note: The following alignment tapes can also be used.

1) WR5-3CL (8-967-995-36)

2) WR5-4CSP (8-967-995-46)

• For checking Hi8 mode operations

For LP (WR5-8CLE)

Parts code: 8-967-995-57

For SP (WR5-8CSE)

Parts code: 8-967-995-48

• For Checking AFM stereo operations (WR5-9CS)

Parts code: 8-967-995-28

• For BPF adjustment (WR5-11CS)

Parts code: 8-967-995-76

14) Adjustment remote commander (J-6082-053-B)

- 15) CPC-13 jig (J-6082-443-A)
- 16) Power code (J-6082-223-A)

Note: Connect the adjustment remote commander to the LANC jack, and set the HOLD switch to the "ADJ"

17) IR receiver jig (J-6082-383-A)

3-1-2. Precautions on Adjusting

 The adjustments of this unit are performed in the VTR mode or camera mode.

To set to the VTR mode, set the power switch to "VTR or PLAYER" or set the "Forced VTR Power ON mode" using the adjustment remote commander (Note 1).

To set to the Camera mode, set the power switch to "CAMERA" or set the "Forced Camera Power ON mode" using the adjustment remote commander (Note 2).

After completing adjustments, be sure to exit the "Forced VTR Power ON Mode" or "Forced Camera Power ON Mode". (Note 3)

2) The front panel block (MI-37 board, focus dial, microphone unit) need not be connected except during "Battery end adjustment" and "IR transmitter adjustment". To remove, disconnect the following connectors.

VC-235 board CN1111 (32P 0.5 mm)

- By setting the "Forced VTR Power ON mode" or "Forced Camera Power ON mode", the video section can be operate even if the cabinet (R) block (Camera function switch (CF-69/ 70/72 board), LCD block, viewfinder) has been removed. But removing the cabinet (R) block (removing the VC-235 board CN1105) means removing the lithium 3 V power supply (CF-69/70/72 board BH001), data such as date, time, user-set menus will be lost. After completing adjustments, reset these data. If the cabinet (R) block has been removed, the self-diagnosis data, data on history of use (total drum rotation time etc.) will be lost. Before removing, note down the self-diagnosis data and data on history use (data of page: 2, address: A2 to AA). (Refer to "SELF-DIAGNOSIS FUNCTION" for the self-diagnosis data, and to "5-4. Service Mode" for the data on the history use) To remove the cabinet (R), disconnect the following connectors
 - 1. VC-235 board CN1105 (45P, 0.5 mm)
 - 2. VC-235 board CN1109 (8P, 1.0 mm)
- 4) The lens block (CD-242/244/266/267/270/271 board) and the intelligent accessory shoe need not be connected except during "Battery end adjustment". To remove, disconnect the following connectors.
 - 1. VC-235 board CN1501 (16P, 0.5 mm)
 - 2. VC-235 board CN1551 (24P, 0.5 mm)
 - 3. Intelligent accessory shoe (8P, 0.8 mm)

- **Note 1:** Setting the "Forced VTR Power ON" mode (VTR mode)
 - 1) Select page: 0, address: 01, and set data: 01.
 - 2) Select page: D, address: 10, set data: 02, and press the PAUSE button of the adjustment remote commander. The above procedure will enable the VTR power to be turned on with the power switch (SS-10000 block) removed.

After completing adjustments, be sure to exit the "Forced VTR Power ON mode".

- **Note 2:** Setting the "Forced Camera Power ON" mode (Camera mode)
 - 1) Select page: 0, address: 01, and set data: 01.
 - 2) Select page: D, address: 10, set data: 01, and press the PAUSE button of the adjustment remote commander. The above procedure will enable the camera power to be turned on with the power switch (SS-10000 block) removed.

After completing adjustments, be sure to exit the "Forced Camera Power ON mode".

- **Note 3:** Setting the "Forced Memory Power ON" mode (Memory mode)
 - 1) Select page: 0, address: 01, and set data: 01.
 - 2) Select page: D, address: 10, set data: 05, and press the PAUSE button of the adjustment remote commander. The above procedure will enable the memory power to be turned on with the power switch (SS-10000 block) removed.

After completing adjustments, be sure to exit the "Forced Memory Power ON mode".

Note 4: Exiting the "Forced Power ON" mode

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 10, set data: 00, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 0, address: 01, and set data: 00.

3-1-3. Adjusting Connectors

Some of the adjusting points of the video section are concentrated at VC-235 board CN1108. Connect the measuring instruments via the CPC-13 jig (J-6082-443-A). The following table lists the pin numbers and signal names of CN1108.

Pin No.	Signal Name	Pin No.	Signal Name
1	SWP	11	VCO
2	AFC F0	12	EVF VG
3	BPF MONI	13	DV RF SWP
4	F0 ADJ RF IN	14	RF IN
5	PB RF	15	CAP FG
6	REG GND	16	RF MON
7	RF AGC OUT	17	TMS
8	VC RF SWP	18	TCK
9	EVF BL	19	TDO
10	EVF BL 4.6V	20	TDI

Table 5-3-1

3-1-4. Connecting the Equipment

Connect the measuring instruments as shown in Fig. 5-3-2 and perform the adjustments.

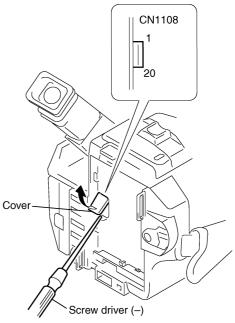

Fig. 5-3-1

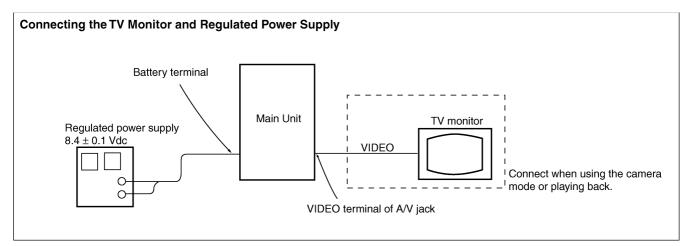

Fig. 5-3-2

3-1-5. Alignment Tape

The following table lists alignment tapes which are available. Use the tape specified in the signal column for each adjustment. If the type of tape to be used for checking operations is not specified, use whichever type.

Digital8 alignment tape

Name	Usage
SW/OL standard (WR5-2D)	Switching position adjustment
Audio operation check	Audio system adjustment
(WR5-3ND (NTSC),	
WR5-3CD (PAL))	
System operation check	Operation check
(WR5-5ND (NTSC),	
WR5-5CD (PAL))	

Hi8/standard 8 mm alignment tape

Name	Recording mode	Tape type	Tape speed	Usage	
Tracking (WR5-1NP (NTSC), WR5-1CP (PAL))	Standard 8 mm	MP	SP	Tape path adjustment, Switching position adjustment	
Video frequency characteristics (WR5-7NE (NTSC), WR5-7CE (PAL))	Hi8	ME	SP (NTSC) LP (PAL)	Frequency characteristics adjustment	
Operation check (WR5-5NSP (NTSC), WR5-5CSP (PAL))	Standard 8 mm	MP	SP	Operation check	
Operation check (WR5-8NSE (NTSC), WR5-8CSE (PAL))	Hi8	ME	SP		
Operation check (WR5-4NL (NTSC), WR5-4CL (PAL))	Standard 8 mm	MP	LP		
Operation check (WR5-8NLE (NTSC), WR5-8CLE (PAL)	Hi8	ME	LP		
AFM stereo operation check WR5-9NS (NTSC), WR5-9CS (PAL)	Standard 8 mm	MP	SP	AFM stereo Operation check	
BPF adjustment WR5-11NS (NTSC), WR5-11CS (PAL)	Standard 8 mm	MP	SP	BPF adjustment	

Tape type

ME Particle type metal tape MP Evaporated type metal tape

Table 5-3-2

Fig. 5-3-3 Shows the color bar signals recorded on the alignment

Note: Measure using the VIDEO terminal (Terminated at 75 Ω).

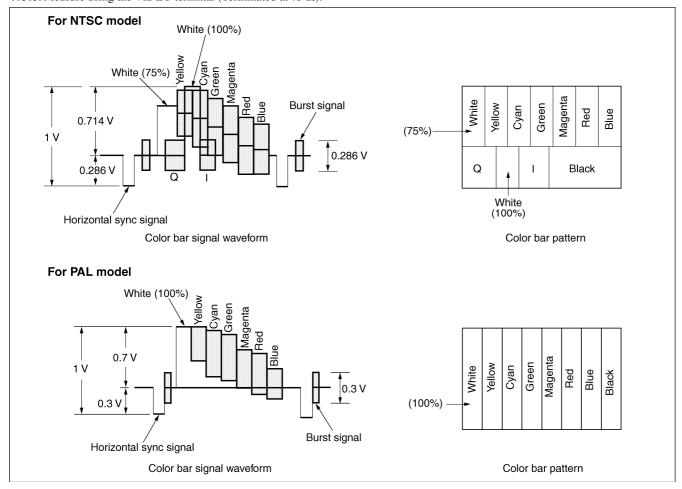

Fig. 5-3-3 Color Bar Signal of the Alignment Tape

5-44

3-1-6. Input/output Level and Impedance

Video input/output

Phono jack, 1 Vp-p, 75 Ω , unbalanced, sync negative

S video input/output

4-pin mini DIN

Luminance signal:

1 Vp-p, 75 Ω , unbalanced, sync negative

Chrominance signal:

 $0.286 \text{ Vp-p}, 75 \Omega$, unbalanced (NTSC)

 $0.300 \, \text{Vp-p}, 75 \, \Omega, \, \text{unbalanced (PAL)}$

Audio input/output

Phono jack:

Input: -7.5 dBs, input impedance more than 47 k Ω

Output: -7.5 dBs, (at load impedance 47 k Ω), output impedance

less than 2.2 $k\Omega$

3-2. SYSTEM CONTROL SYSTEM ADJUSTMENT

1. Initialization of 7, 8, C, D, E, F Page Data

If the 7, 8, C, D, E, F page data is erased due to some reason, perform "1-2. INITIALIZATION OF 7, 8, C, D, E, F PAGE DATA", of "5-1. CAMERA SECTION ADJUSTMENT"

2. Node Unique ID No. Input

Note 1: Perform "2-2. Input of Serial No." if the data on page C has been cleared and the node unique ID No. is not found.

2-1. Input of Company ID

Write the company ID to the EEPROM (nonvolatile memory).

ı	Page	С
	Address	E8, E9, EA, EB, EC

Input method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Enter the following data.

Note 2: Each time the data is set, press the PAUSE button on the adjusting remote commander.

Address	Data
E8	08
E9	00
EA	46
EB	01
EC	01

3) Select page: 0, address: 01, and set data: 00.

2-2. Input of Serial No.

Write the serial No. and model code to the EEPROM (nonvolatile memory).

In writing the serial No., a decimal number should be converted into a hexadecimal number.

Page	С
Address	ED, EE, EF

- 1) Select page: 0, address: 01, and set data: 01.
- Read the serial No. from the model name label, and it is assumed to be D₁.

Example: If serial No. is "77881",

 $D_1 = 77881$

3) From Table 5-3-3, obtain D_2 and H_1 that correspond to D_1 . Example: If $D_1 = 77881$,

 $D_2 = D_1 - 65536 = 12345$

 $H_1 = 00$

D ₁ (decimal)	D ₂ (decimal) (Service model code)	H ₁ (hexadecimal)
00001 to 65535	D_1	00
65536 to 131071	D ₁ -65536	00
131072 to196607	D ₁ -131072	00
196608 to 262143	D1-196608	00

Table 5-3-3

4) Enter H₁ to address: ED on page: C.

Example: If $H_1 = 00$,

select page: C, address: ED, and set data: 00, then press the PAUSE button.

5) From Table 5-3-4, obtain the maximum decimal number less than D₂, and it is assumed to be D₃.

Example: If $D_2 = 12345$.

 $D_3 = 12288$

6) From Table 5-3-4, obtain a hexadecimal number that corresponds to D₃, and it is assumed to be H₃.

Example: If $D_3 = 12288$,

 $H_3 = 3000$

Caluculate D₄ using following equations (decimal caluculation).
 (0 ≤ D₄ ≤ 225)

 $D_4 = D_2 - D_3$

Example: If $D_2 = 12345$ and $D_3 = 12288$,

 $D_4 = 12345 - 12288 = 57$

 Convert D₄ into a hexadecimal number to obtain H₄. (See Table 5-4-1 "Hexadecimal - decimal conversion table" in 5-4. Service Mode)

Example: If $D_4 = 57$,

 $H_4 = 39$

9) Enter higher two digits of H_3 to address: EE on page: C. Example: If $H_3 = 3000$,

select page: C, address: EE, and set data: 30, then press the PAUSE button.

10) Enter H4 to address: EF on page: D.

Example: If $H_4 = 39$,

select page: C, address: EF, and set data: 39, then press the PAUSE button.

11) Select page: 0, address: 01, and set data: 00.

Note: D₃: Decimal H₃: Hexadecimal

Table 5-3-4

3. Battery End Adjustment (VC-235 board)

Set the battery end voltage.

If the voltage is incorrect, the life of the battery will shorten.

The image at the battery end will also be rough.

Mode	Camera recording	
Subject	Arbitrary	
Measurement Point	LCD display of the adjustment remote commander	
Measuring Instrument		
Adjustment Page	D	
Adjustment Address	48, 49	

Note: The lens block and cabinet (R) must be connected.

Switch setting:

1)	AUTO FOCUS	OFF
2)	LCD screen	Closed
3)	NIGHT SHOT	OFF

Connection:

1) Connect the regulated power supply and the digital voltmeter to the battery terminal as shown in Fig. 5-3-4.

Adjusting method:

- 1) Adjust the output voltage of the regulated power supply so that the digital voltmeter display is 6.1 ± 0.1 Vdc.
- 2) Turn off the power supply.
- 3) Turn on the HOLD switch of the adjustment remote commander.
- 4) Turn on the power supply.
- 5) Load a cassette, and set to the camera recording mode.
- 6) Select page: 0, address: 01, and set data: 01.
- 7) Decrease the output voltage of the regulated power supply so that the digital voltmeter display is 5.30 ± 0.01 Vdc.
- 8) Select page: 2, address: 5D, read the data, and this data is named Dref.
- Select page: D, address: 48, set data: Dref, and press the PAUSE button of the adjustment remote commander.
- 10) Convert Dref to decimal notation, and obtain Dref'. (Refer to Table 5-4-1 "Hexadecimal-decimal conversion table" of "5-4. Service Mode")
- Calculate D49' using following equations (decimal calculation), convert it to a hexdecimal number, and obtain D49.
 D49'=Dref'+8
- 12) Select page: D, address: 49, set data D₄₉, and then press the PAUSE button of adjustment remote commander.
- 13) Select page: 0, address: 01, and set data: 00.

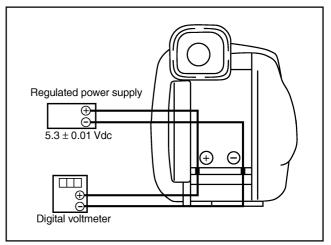

Fig. 5-3-4

3-3. SERVO AND RF SYSTEM ADJUSTMENTS

Before perform the servo and RF system adjustments, check that the specified value of "27 MHz/36MHz Origin Oscillation Adjustment" of "3-4. VIDEO SYSTEM ADJUSTMENT" is satisfied.

Adjusting Procedure:

- 1. REEL FG adjustment
- 2. PLL fo & LPF fo Pre-adjustment
- 3. Switching position adjustment
- 4. AGC center level adjustment
- 5. APC & AEQ adjustment
- 6. PLL fo & LPF fo final adjustment
- 7. Hi8/standard 8 mm switching position adjustment
- 8. CAP FG offset adjustment

1. REEL FG Adjustment (VC-235 board)

	,		
Mode	VTR stop		
Measurement Point	Display data of page: 3, address: 03		
Measuring Instrument	Adjustment remote commander		
Adjustment Page	С		
Adjustment Address	17, 30		
Specified Value	Bit values of bit 1 and bit 3 are "0"		

Adjusting method:

- Close the cassette compartment without loading a cassette and complete loading.
- 2) Select page: 0, address: 01, and set data: 01.
- 3) Select page: 3, address: 01, set data: 1C, and press the PAUSE button of the adjustment remote commander.
- 4) Select page: 3, address: 02, and check that the data changes to "00".
- Select page: 3, address: 03, and check that bit values of bit 1 and bit 3 are "0".
 - If bit value of bit 1 and bit 3 is "1", there are errors. For the error contents, see the following table. (For the bit values, refer to "5-4. SERVICE MODE", "4-3. 3. Bit value discrimination")

Bit value of page: 3, address: 03	Error contents
bit $3 = 1$	S REEL is defective
bit 1 = 1	T REEL is defective

6) Select page: 0, address: 01, and set data: 00.

2. PLL fo & LPF fo Pre-adjustment (VC-235 board)

Mode	VTR stop		
Measurement Point	Display data of page: 3, address: 03		
Measuring Instrument	Adjustment remote commander		
Adjustment Page	С		
Adjustment Address	1F, 20, 22, 29		
Specified Value	Bit values of bit 2, bit 3 and bit 6 are "0"		

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 30, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 3, address: 02, and check that the data changes to "00".
- 4) Select page: 3, address: 03, and check that bit values of bit2, bit3 and bit6 are "0".

If bit value of bit 2, bit 3 or bit 6 is "1", there are errors. For the error contents, see the following table. (For the bit values, refer to "5-4. SERVICE MODE", "4-3. 3. Bit value discrimination")

Bit value of page: 3, address: 03	Error contents
bit 6 = 1	LPF fo adjustment is defective
bit $3 = 1$	PLL f ₀ , fine adjustment is defective
bit 2 = 1	PLL f ₀ , fine adjustment is defective

If bit value of bit 2 or bit 3 is "1", select page: C, address: 21, set the following data, and press the PAUSE button, and repeat steps 2) to 4).

	Setting data
When the data of page: C, address: 21 is "CA"	CE
When the data of page: C, address: 21 is "CE"	C6
When the data of page: C, address: 21 is "C6"	D2
When the data of page: C, address: 21 is "D2"	C2

5) Select page: 0, address: 01, and set data: 00.

3. Switching Position Adjustment (VC-235 board)

To obtain normal playback waveform output, adjust the switching position.

Mode	VTR playback
Signal	Digital8 alignment tape : SW/OL standard (WR5-2D)
Measurement Point	Display data of page: 3, address: 03
Measuring Instrument	Adjustment remote commander
Adjustment Page	С
Adjustment Address	10, 11, 12, 13
Specified Value	00

Adjusting method:

- 1) Insert the Digital8 SW/OL reference tape and enter the VTR STOP mode.
- Select page: 0, address: 01, and set data: 01.
- Select page: 3, address: 21, and check that the data is "02".

Note: If the data of page: 3, address: 21 is other than "72", the tape top being played. After playing the tape for 1 to 2 seconds, perform step 4) and higher. If the data of page: 3, address: 21 is other than "62", the tape end being played. After rewind the tape, perform step 4) and higher.

- Select page: 3, address: 01, set data: 0D, and press the PAUSE 4) button of the adjustment remote commander.
- Select page: 3, address: 02, wait data for stable condition as 5) "00".
- 6) Select page: 3, address: 03, and check that the data is "00".

Note: If bit 0 of page: 3, address: 03 data is "1", the A channel is defective. If bit 1 is "1", the B channel is defective. Contents of the defect is written into page: C, addresses: 10 and 12. See the following table. (For the bit values, refer to "5-4. SERVICE MODE", "4-3. 3. Bit value discrimination")

Select page: 0, address: 01, and set data: 00.

When the A channel is defective

Data of page: C, address: 10	Contents of defect
EE	Writing into EEPROM (IC4502) is defective
E8	Adjustment data is out of range
E7	No data is returned from IC3301 (CAIN)

When the B channel is defective

Data of page: C, address: 12	Contents of defect
E8	Adjustment data is out of range
E7	No data is returned from IC3301 (CAIN)

4. AGC Center Level Adjustment (VC-235 board)

Mode	Camera record and playback
Subject	Arbitrary
Measurement Point	Pin ® of CN1108 (RF MON) (Note 1) External trigger: Pin ® of CN1108 (DV RF SWP)
Measuring Instrument	Oscilloscope
Adjustment Page	С
Adjustment Address	1E
Specified Value	The display data of page: 3, address: 03 is "00"

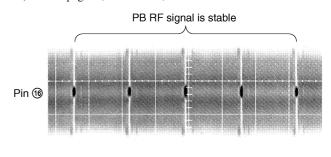

Note 1: Connect a 75 Ω resistor between Pin (6) and Pin (6) (GND) of CN1108.

75 Ω resistor (Parts code: 1-247-804-11)

Note 2: Use a Hi8 MP tape.

Adjusting method:

- Select page: 0, address: 01, and set data: 01.
- Select page: 8, address: 2A, set data: C8, and press the PAUSE button of the adjustment remote commander.
- Record the camera signal for a minute.
- Select page: 2, address: 2E, and set data: 01. 4)
- Playback the recorded segment. 5)
- Select page: 3, address: 33, and set data: 08.
- Confirm that the playback RF signal is stable.
- Select page: 3, address: 01, set data: 23, and press the PAUSE button.
- Select page: 3, address: 02, and check that the data is "00".
- 10) Select page: 3, address: 03, and check that the data is "00". **Note 3:** If the data of page: 3, address: 03 is other than "00", adjustment has errors.
- 11) Select page: 3, address: 33, and set data: 00.
- 12) Select page: 2, address: 2E, and set data: 00.
- 13) Select page: 8, address: 2A, set data: 00, and press the PAUSE
- 14) Select page: 0, address: 01, and set data: 00.

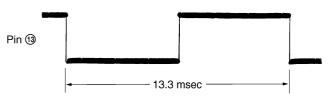

Fig. 5-3-5

5. APC & AEQ Adjustment (VC-235 board)

Mode	Camera record and playback
Subject	Arbitrary
Measurement Point	Pin (18) of CN1108 (RF MON) (Note 1) External trigger: Pin (13) of CN1108 (DV RF SWP)
Measuring Instrument	Oscilloscope
Adjustment Page	С
Adjustment Address	18, 19, 1B, 1C, 21, 2C
Specified Value	The display data of page: 3, address: 03 is "00"

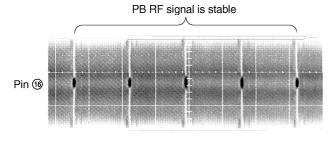

Note 1: Connect a 75 Ω resistor between Pin (6) and Pin (6) (GND) of CN1108.

75 Ω resistor (Parts code: 1-247-804-11)

Note 2: Use a Hi8 MP tape.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 8, address: 2A, set data: C8, and press the PAUSE button of the adjustment remote commander.
- 3) Record the camera signal for a minute.
- 4) Select page: 2, address: 2E, and set data: 01.
- 5) Playback the recorded segment.
- 6) Select page: 3, address: 33, and set data: 08.
- 7) Confirm that the playback RF signal is stable.
- 8) Select page: 3, address: 01, set data: 07, and press the PAUSE button.
- Select page: 3, address: 02, and check that the data changes from "07" to "00" in about 20 seconds after pressing the PAUSE button
- 10) Select page: 3, address: 03, and check that the data is "00".
 - **Note 3:** If the data of page: 3, address: 03 is other than "00", adjustment has errors.
- 11) Select page: 3, address: 33, and set data: 00.
- 12) Select page: 2, address: 2E, and set data: 00.
- 13) Select page: 8, address: 2A, set data: 00, and press the PAUSE button.
- 14) Select page: 0, address: 01, and set data: 00.

6. PLL fo & LPF fo Final Adjustment (VC-235 board)

Mode	VTR stop
Signal	Arbitrary
Measurement Point	Display data of page: 3, address: 03
Measuring Instrument	Adjustment remote commander
Adjustment Page	С
Adjustment Address	1F, 20, 22, 29
Specified Value	Bit values of bit2, bit3 and bit6 are "0"

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 01, set data: 30, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 3, address: 02, and check that the data changes to "00".
- 4) Select page: 3, address: 03, and check that bit values of bit2, bit3 and bit6 are "0".

Note: If bit value of bit 2, bit 3 or bit 6 is "1", there are errors. For the error contents, see the following table. (For the bit values, refer to "5-4. SERVICE MODE", "4-3. 3. Bit value discrimination")

Bit value of page: 3, address: 03	Error contents
bit 6 = 1	LPF fo adjustment is defective
bit $3 = 1$	PLL f ₀ , fine adjustment is defective
bit 2 = 1	PLL f ₀ , fine adjustment is defective

5) Select page: 0, address: 01, and set data: 00.

7. Hi8/standard 8 mm Switching Position Adjustment (VC-235 board)

If deviated in this case causes switching noise or jitter on the Hi8/ standard 8 mm mode played back screen.

standard 8 mm mode prayed back screen.	
Mode	Playback
Signal	Hi8/standard 8 mm alignment tape:
	For tracking adjustment
	(WR5-1NP (NTSC))
	(WR5-1CP (PAL))
Measurement Point	CH1: Pin (8) of CN1108
	(VC RF SWP)
	CH2: Pin (5) of CN1108 (PB RF)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	62, 63
Specified Value	t1=0 ± 10 μsec

Adjusting Method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: F, address: 22, set data: C0, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 2, address: 2E, and set data: 02.
- 4) Set to the playback mode.
- 5) Select page: F, address: 62, change the data and minimize "t1", and then press the PAUSE button. (Coarse adjustment)
- Select page: F, address: 63, change the data and adjust so that the switching position (t1) becomes the specified value. (Fine adjustment)
- 7) Press the PAUSE button.
- 8) Select page: F, address: 22, set data: 80, and press the PAUSE button.
- 9) Select page: 2, address: 2E, and set data: 00.
- 10) Select page: 0, address: 01, and set data: 00.

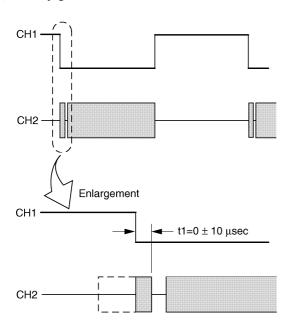

Fig. 5-3-7

5-51

8. CAP FG Duty Adjustment (VC-235 board)

Improve the capstan servo characteristic. If it is not correct, jitters will increase.

Mode	Playback
Signal	Hi8/standard 8 mm alignment tape:
	For checking operation
	(WR5-5NSP (NTSC))
	(WR5-5CSP (PAL))
Measurement Point	Pin (5) of CN1108 (CAP FG)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	64
Specified value	Duty=50 ± 1%

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 2, address: 2E, and set data: 02.
- 3) Set to the playback mode.
- Select page: 6, address: 01, set data: 81, and press the PAUSE button of the adjustment remote commander. (to start up automatic CAP FG offset adjustment)
- 5) Select page: 6, address: 02, and check that the data is "01".
- 6) Check that Duty of CAP FG signal satisfies the specified value. If not, select page: 6, address: 01, set data: 00, and press the PAUSE button, and then, repeat steps 4) to 6).
- 7) Select page: 6, address: 01, set data: 00, and press the PAUSE button
- 8) Select page: 2, address: 2E, and set data: 00.
- 9) Select page: 0, address: 01, and set data: 00.

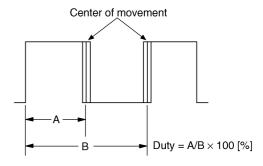

Fig. 5-3-8

VIDEO SYSTEM ADJUSTMENTS 3-4.

3-4-1. Video System Adjustments

Adjusting Procedure:

- 27 MHz/36 MHz origin oscillation adjustment
- 2. Chroma BPF fo adjustment
- S VIDEO OUT Y Level Adjustment
- S VIDEO OUT chroma level adjustment 4.
- 5. VIDEO OUT Y, chroma level check
- Hi8/standard 8 mm AFC fo adjustment

1. 27 MHz/36 MHz Origin Oscillation Adjustment (VC-235 board)

Set the oscillation frequency of X1501.

If deviated, the synchronization will be disrupted and the color will become inconsistent.

Note: 27 MHz 720H model 36 MHz 960H model

720H model: DCR-TRV320/TRV320P/TRV520/

TRV520P/TRV525/TRV720

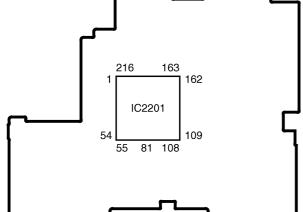

960H model: DCR-TRV320E/TRV420E/TRV520E/ TRV620E/TRV720E

Mode	Camera
Measurement Point	Pin (81) of IC2201
Measuring Instrument	Frequency counter
Adjustment Page	F
Adjustment Address	4D
Specified Value	f=13500000 ± 68 Hz

Adjusting method:

VC-235 BOARD

- Select page: 0, address: 01, and set data: 01.
- Select page: F, address: 4D, change the data and set the clock frequency(f) to the specified value.
- Press the PAUSE button of the adjustment remote commander.
- Select page: 0, address: 01, and set data: 00.

2. Chroma BPF fo Adjustment (VC-235 board)

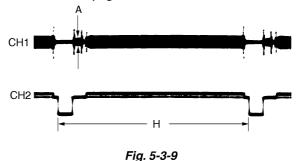

Set the center frequency of IC3701 chroma band-pass filter.

	<u> </u>
Mode	VTR stop
Signal	No signal
Measurement Point	CH1: Chroma signal terminal of S VIDEO jack (75 Ω terminated) CH2: Y signal terminal of S VIDEO jack (75 Ω terminated)
Measuring Instrument	Oscilloscope
Adjustment Page	С
Adjustment Address	28
Specified Value	A = 100 mVp-p or less B = 200 mVp-p or more

Adjusting method:

- Select page: 0, address: 01, and set data: 01.
- Select page: D, address: 11, set data: 10, and press the PAUSE button of the adjustment remote commander.
- 3) Check that the burst signal (B) is output to the chroma signal terminal of S VIDEO jack.
- Select page: 3, address: 0C, set data: 04, and press the PAUSE 4) button.
- Select page: C, address: 28, and change the data for minimum amplitude of the burst signal level (A). (The data of address: 28, should be "00" to "07")
- Press the PAUSE button.
- Select page: 3, address: 0C, set data: 00, and press the PAUSE
- Check that the burst signal level (B) satisfies the specified value.
- Select page: D, address: 11, set data: 00, and press the PAUSE button.
- 10) Select page: 0, address: 01, and set data: 00.

When the data of page: 3, address: 0C, is 04:

When the data of page: 3, address: 0C, is 00:

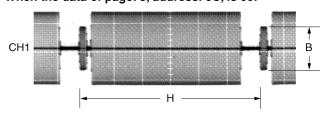

Fig. 5-3-10

3. S VIDEO OUT Y Level Adjustment (VC-235 board)

Mode	VTR stop
Subject	Arbitrary
Measurement Point	Y signal terminal of S VIDEO jack (75 Ω terminated)
Measuring Instrument	Oscilloscope
Adjustment Page	С
Adjustment Address	25
Specified Value	$A = 1000 \pm 20 \text{ mV}$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 11, set data: 10, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 3, address: 0C, set data: 02, and press the PAUSE button
- 4) Select page: C, address: 25, change the data and set the Y signal level (A) to the specified value.
- 5) Press the PAUSE button.
- 6) Select page: 3, address: 0C, set data: 00, and press the PAUSE button.
- 7) Select page: D, address: 11, set data: 00, and press the PAUSE button.
- 8) Select page: 0, address: 01, and set data: 00.

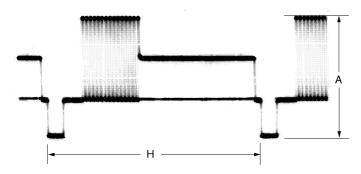

Fig. 5-3-11

4. S VIDEO OUT Chroma Level Adjustment (VC-235 board)

Mode	VTR stop
Subject	Arbitrary
Measurement Point	Chroma signal terminal of S VIDEO jack (75 Ω terminated) External trigger: Y signal terminal of S VIDEO jack
Measuring Instrument	Oscilloscope
Adjustment Page	С
Adjustment Address	26, 27
Specified Value	Cr level: A=714 ± 14 mV (NTSC) A=700 ± 14 mV (PAL) Cb level: B=714 ± 14 mV (NTSC) B=700 ± 14 mV (PAL) Burst level: C=286 ± 6 mV (NTSC) C=300 ± 6 mV (PAL)

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: D, address: 11, set data: 10, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 3, address: 0C, set data: 02, and press the PAUSE button.
- 4) Select page: C, address: 26, change the data and set the Cr signal level (A) to the specified value.
- 5) Press the PAUSE button.
- 5) Select page: C, address: 27, change the data and set the Cb signal level (B) to the specified value.
- 7) Press the PAUSE button.
- Check that the burst signal level (C) is satisfied the specified value.
- 9) Select page: 3, address: 0C, set data: 00, and press the PAUSE button.
- 10) Select page: D, address: 11, set data: 00, and press the PAUSE button.
- 11) Select page: 0, address: 01, and set data: 00.

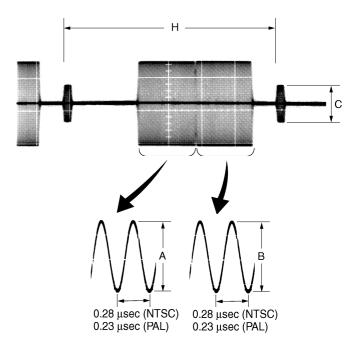

Fig. 5-3-12

5. VIDEO OUT Y, Chroma Level Check (VC-235 board)

Mode	VTR stop
Subject	Arbitrary
Measurement Point	VIDEO jack (75 Ω terminated)
Measuring Instrument	Oscilloscope
Specified Value	Sync level: $A=286 \pm 18 \text{ mV (NTSC)}$
	$A=307 \pm 18 \text{ mV (PAL)}$
	Burst level: $B=286 \pm 18 \text{ mV (NTSC)}$
	$B=300 \pm 18 \text{ mV (PAL)}$

Adjusting method:

- 1) Select page: 0, address: 01, set data: 01.
- Select page: D, address: 11, set data: 10, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 3, address: 0C, set data: 02, and press the PAUSE button.
- 4) Check that the sync signal level (A) satisfies the specified value.
- $5) \quad \text{Check that the burst signal level (B) satisfies the specified value.} \\$
- 6) Select page: 3, address: 0C, set data: 00, and press the PAUSE button.
- 7) Select page: D, address: 11, set data: 00, and press the PAUSE button.
- 8) Select page: 0, address: 01, set data: 00.

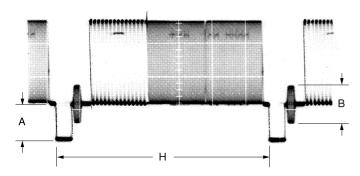

Fig. 5-3-13

6. Hi8/standard 8 mm AFC f₀ Adjustment (VC-235 board) (Using Digital Voltmeter)

Adjust the pull-in range of the clock generator (IC2201) for A/D conversion during Hi8/standard 8 mm playback.

Mode	VTR stop
Signal	No signal
Measurement Point	Pin ② of CN1108 (AFC F0)
Measuring Instrument	Digital voltmeter
Adjustment Page	F
Adjustment Address	65
Specified Value	$A=2.00 \pm 0.05 \text{ Vdc}$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 0D, set data: 04, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 6, address: 63, set data: 04.
- 4) Select page: 6, address: 6F, set data: 01.
- 5) Select page: F, address: 65, change the data and set the DC voltage (A) to the specified value.
- 6) Press the PAUSE button.
- Select page: 3, address: 0D, set data: 00, and press the PAUSE button.
- 8) Select page: 6, address: 63, set data: 00.
- 9) Select page: 6, address: 6F, set data: 00.
- 10) Select page: 0, address: 01, and set data: 00.

7. Hi8/standard 8 mm AFC f₀ Adjustment (VC-235 board) (Auto Adjustment)

Adjust the pull-in range of the clock generator (IC2201) for A/D conversion during Hi8/standard 8 mm playback.

Mode	VTR stop
Signal	No signal
Measurement Point	Display data of Page: 6, Address: 6E
Measuring Instrument	Adjustment remote commander
Adjustment Page	F
Adjustment Address	65
Specified Value	B2 to BA

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 0D, set data: 04, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: 6, address: 63, set data: 04.
- 4) Select page: 6, address: 6F, set data: 01.
- 5) Select page: 6, address: 01, set data: C5, and press the PAUSE button.
- 6) Select page: 6, address: 02, and check that the data is "01".
- 7) Select page: 6, address: 6E, and check that the display data satisfies the specified value.
- 8) Select page: 3, address: 0D, set data: 00, and press the PAUSE button.
- 9) Select page: 6, address: 01, set data: 00, and press the PAUSE button.
- 10) Select page: 6, address: 63, set data: 00.
- 11) Select page: 6, address: 6F, set data: 00.
- 12) Select page: 0, address: 01, and set data: 00.

3-5. IR TRANSMITTER ADJUSTMENTS

Adjust using a IR receiver jig (J-6082-383-A).

Switch setting:

LASER LINK ON (Red LED is lit)

1. IR Video Carrier Frequency Adjustment (MI-37 board)

Mode	VTR stop
Signal	No signal
Measurement Point	Pin 5 of CN003 of IR receiver jig (RF)
Measuring Instrument	Frequency counter
Adjustment Page	F
Adjustment Address	80
Specified Value	f=11.85 ± 0.05 MHz (NTSC model) f=11.55 ± 0.05 MHz (PAL model)

Note: NTSC model: DCR-TRV320/TRV320P/TRV520/ TRV520P/TRV525/TRV720 PAL model: DCR-TRV320E/TRV420E/TRV520E/

TRV620E/TRV720E

Connection of Equipment

Connect the measuring device as shown in the following figure, and adjust.

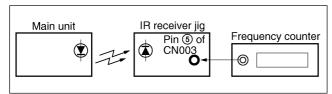

Fig. 5-3-14

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 0C, set data: 08, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: F, address: 80, change the data, and set the video carrier frequency (f) to the specified value.
- 4) Press the PAUSE button.
- 5) Select page: 3, address: 0C, set data: 00, and press the PAUSE button.
- 6) Select page: 0, address: 01, and set data: 00.

2. IR Video Deviation Adjustment (MI-37 board)

	<u> </u>
Mode	VTR stop
Signal	No signal
Measurement Point	VIDEO OUT terminal of IR receiver jig
	(Terminated at 75 Ω)
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	7E
Specified Value	A=0.82 ± 0.05 V

Connection of Equipment

Connect the measuring device as shown in the following figure, and adjust.

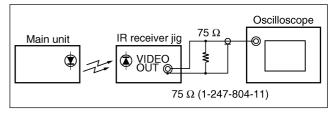

Fig. 5-3-15

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: 3, address: 0C, set data: 01, and press the PAUSE button of the adjustment remote commander.
- 3) Select page: F, address: 7E, and change the data, set the video signal amplitude (A) to the specified value.
- 4) Press the PAUSE button.
- 5) Select page: 3, address: 0C, set data: 00, and press the PAUSE button.
- 6) Select page: 0, address: 01, and set data: 00.

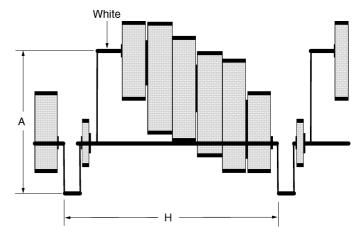

Fig. 5-3-16

3. IR Audio Deviation Adjustment (MI-37 board)

	<u> </u>
Mode	VTR stop
Signal	Audio signal: 400 Hz, -7.5 dBs: Audio left and right terminal of A/V jack Video signal: Color bar signal: VIDEO terminal of A/V jack
Measurement Point	AUDIO L terminal and AUDIO R terminal of IR receiver jig (Terminated at 47 k Ω)
Measuring Instrument	Audio level meter
Adjustment Page	F
Adjustment Address	7F
Specified Value	Signal level: $-7.5 \pm 1.0 \text{ dBs}$ Level difference of L and R: Below 2 dB

Connection of Equipment

Connect the measuring device as shown in the following figure, and adjust.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- Connect the audio level meter to the AUDIO L terminal of the IR receiver jig.
- 3) Select page: F, address: 7F, change the data and set the 400 Hz audio signal level to the specified value.
- 4) Press the PAUSE button.
- 5) Connect the audio level meter to the AUDIO R terminal of the IR receiver jig.
- 6) Check that the 400 Hz audio signal level is within the specified value. If outside, repeat from step 3).
- 7) Select page: 0, address: 01, and set data: 00.

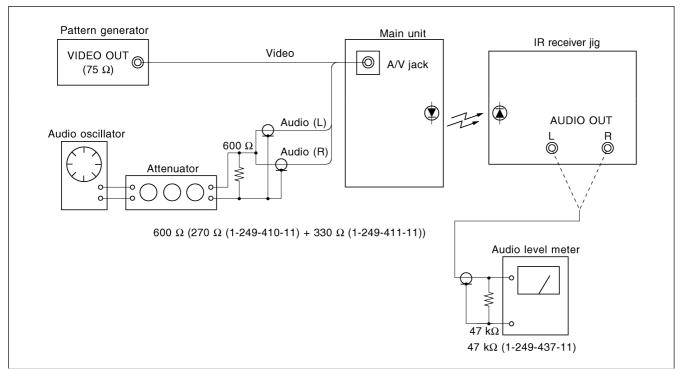

Fig. 5-3-17

3-6. AUDIO SYSTEM ADJUSTMENTS

[Connecting the measuring instruments for the audio]

Connect the audio system measuring instruments in addition to the video system measuring instruments as shown in Fig. 5-3-22.

[Adjustment Procedure]

- 1) Hi8/standard 8 mm AFM BPF fo adjustment
- 2) Hi8/standard 8 mm AFM 1.5 MHz deviation adjustment
- 3) Hi8/standard 8 mm AFM 1.7 MHz deviation adjustment
- 4) Digital8 playback level check
- 5) Overall level characteristics check
- 6) Overall distortion check
- 7) Overall noise level check
- 8) Overall separation check

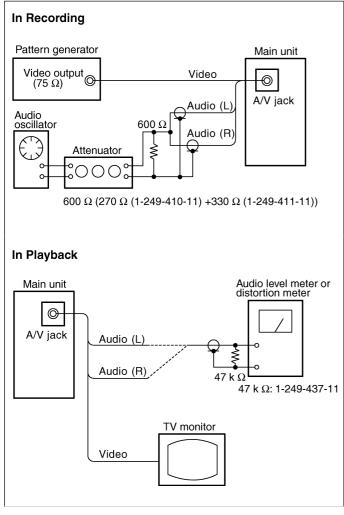

Fig. 5-3-18

1. Hi8/standard 8 mm AFM BPF fo Adjustment (VC-235 board)

Sets the BPF passing frequency of IC5701 so that the AFM signal can separate from the playback RF signal properly. If deviated, the mono/stereo mode will be differentiated incorrectly, and noises and distortions will increase during high volume playback.

Mode	Playback
Signal	Hi8/standard 8 mm alignment tape: For BPF adjustment (WR5-11NS (NTSC)) (WR5-11CS (PAL))
Measurement Point	Audio left or right terminal of A/V jack
Measuring Instrument	Distortion meter
Adjustment Page	F
Adjustment Address	7D
Specified Value	The Main and Sub channel distortion rate should be almost the same (within ± 1%) and minimum.

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Set the Hi-Fi sound switch (menu display) to "2".
- Select page: F, address: 7D, change the data and minimize the distortion rate.
- 4) Press the PAUSE button of the adjustment remote commander.
- 5) Set the Hi-Fi sound switch (menu display) to "1".
- Select page: F, address: 7D, change the data and minimize the distortion rate.
- 7) Press the PAUSE button of the adjustment remote commander.
- 8) Repeat steps 2) to 7) and set the data of address: 7D so that the distortions rates when the Hi-Fi sound switch is set to "2" and set to "1" respectively are almost the same and minimum.
- 9) Press the PAUSE button of the adjustment remote commander.
- 10) Select page: 0, address: 01, and set data: 00.
- 11) Set the Hi-Fi sound switch to "STEREO".

2. Hi8/standard 8 mm AFM 1.5 MHz Deviation Adjustment (VC-235 board)

Adjust to the optimum 1.5 MHz audio FM signal deviation. If the adjustment is not correct, its playback level will differ from that of other units.

Mode	Playback
Signal	Hi8/standard 8 mm alignment tape: For checking AFM stereo operation Monoscope section (WR5-9NS (NTSC)) (WR5-9CS (PAL))
Measurement Point	Audio left or right terminal of A/V jack
Measuring Instrument	Audio level meter
Adjustment Page	F
Adjustment Address	7B
Specified Value	$-7.5 \pm 2.0 \text{ dBs}$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Set the Hi-Fi sound switch (menu display) to "1".
- 3) Select page: F, address: 7B, change the data and set the 400 Hz signal level to the specified value.
- 4) Press the PAUSE button.
- 5) Set the Hi-Fi sound switch (menu display) to "STEREO".
- 6) Select page: 0, address: 01, and set data: 00.

3. Hi8/standard 8 mm AFM 1.7 MHz Deviation Adjustment (VC-235 board)

Adjust to the optimum 1.7 MHz audio FM signal deviation. If improper, this causes deteriorated separation (with stereo signal).

Mode	Playback
Signal	Hi8/standard 8 mm alignment tape: For checking AFM stereo operation Monoscope section (WR5-9NS (NTSC))
Measurement Point	(WR5-9CS (PAL)) Audio left or right terminal of A/V
	jack
Measuring Instrument	Oscilloscope
Adjustment Page	F
Adjustment Address	7C
Specified Value	$-7.5 \pm 2.0 \text{ dBs}$

Adjusting method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Set the Hi-Fi sound switch (menu display) to "2".
- 3) Select page: F, address: 7C, change the data and set the 1 kHz signal level to the specified value.
- 4) Press the PAUSE button.
- 5) Set the Hi-Fi sound switch (menu display) to "STEREO".
- 6) Select page: 0, address: 01, and set data: 00.

4. Digital8 Playback Level Check

Mode	VTR playback
Signal	Digital8 alignment tape:
	For audio operation check
	(WR5-3ND (NTSC))
	(WR5-3CD (PAL))
Measurement Point	Audio left or right terminal of A/V
	jack
Measuring Instrument	Audio level meter and frequency counter
Specified Value	32 kHz mode: 1 kHz, $+ 3.0 \pm 2.0$ dBs
	48 kHz mode: 1 kHz, + 3.0 ± 2.0 dBs
	44.1 kHz mode:
	The 7.35 kHz signal level during EMP
	OFF is $+2.0 \pm 2.0$ dBs.
	The 7.35 kHz signal level during EMP
	ON is -6 ± 2 dB from the signal level
	during EMP OFF.

Checking Method:

1) Check that the playback signal level is the specified value.

5. Overall Level Characteristics Check

Mode	Camera recording and playback
Signal	400 Hz, –66 dBs signal: MIC jack left and right
Measurement Point	Audio left or right terminal of A/V jack
Measuring Instrument	Audio level meter
Specified Value	$-7.5 \pm 3.0 \text{dBs}$

Checking Method:

- 1) Input the 400 Hz, -66 dBs signal in the MIC jack.
- 2) Record in the camera mode.
- 3) Playback the recorded section.
- 4) Check that the 400 Hz signal level is the specified value.

6. Overall Distortion Check

Mode	Camera recording and playback
Signal	400 Hz, –66 dBs signal: MIC jack left and right
Measurement Point	Audio left or right terminal of A/V jack
Measuring Instrument	Audio distortion meter
Specified Value	Below 0.4% (200 Hz to 6 kHz BPF ON)

Checking Method:

- 1) Input the 400 Hz, –66 dBs signal in the MIC jack.
- 2) Record in the camera mode.
- 3) Playback the recorded section.
- 4) Check that the distortion is the specified value.

7. Overall Noise Level Check

Mode	Camera recording and playback
Signal	No signal: Insert a shorting plug in the MIC jack
Measurement Point	Audio left or right terminal of A/V jack
Measuring Instrument	Audio level meter
Specified Value	Below –45 dBs (IHF-A filter ON, 20 kHz LPF ON)

Checking Method:

- 1) Insert a shorting plug in the MIC jack.
- 2) Record in the camera mode.
- 3) Playback the recorded section.
- 4) Check that the noise level is the specified value.

8. Overall Separation Check

Mode	Camera recording and playback
Signal	400 Hz, -66 dBs signal: MIC jack <right> [left] (Connect the MIC jack <left> [right] to GND)</left></right>
Measurement Point	Audio <left> [right] terminal of A/V jack</left>
Measuring Instrument	Audio level meter
Specified Value	Below –40 dBs

<> : Left channel check
[] : Right channel check

Checking Method:

- 1) Input the 400 Hz, -66 dBs signal in the <right> [left] terminal of the MIC jack only.
- 2) Record in the camera mode.
- 3) Playback the recorded section.
- 4) Check that the signal level of the audio output <left> [right] terminal is the specified value.

5-4. SERVICE MODE

4-1. ADJUSTMENT REMOTE COMMANDER

The adjustment remote commander is used for changing the calculation coefficient in signal processing, EVR data, etc. The adjustment remote commander performs bi-directional communication with the unit using the remote commander signal line (LANC). The resultant data of this bi-directional communication is written in the non-volatile memory.

1. Using the Adjustment Remote Commander

- 1) Connect the adjustment remote commander to the LANC terminal
- Set the HOLD switch of the adjustment remote commander to "HOLD" (SERVICE position). If it has been properly connected, the LCD on the adjustment remote commander will display as shown in Fig. 5-4-1.

Fig. 5-4-1

- 3) Operate the adjustment remote commander as follows.
 - Changing the page
 The page increases y

The page increases when the EDIT SEARCH+ button is pressed, and decreases when the EDIT SEARCH– button is pressed. There are altogether 16 pages, from 0 to F.

Hexadecimal notation	0	1	2	3	4	5	6	7	8	9	A	В	С	D	Е	F
LCD Display	П	1	2	3	Ч	5	5	7	8	9	Я	Ь	С	d	Ε	F
Decimal notation conversion value	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15

- Changing the address
 - The address increases when the FF ($\blacktriangleright \blacktriangleright$) button is pressed, and decreases when the REW ($\blacktriangleleft \blacktriangleleft$) button is pressed. There are altogether 256 addresses, from 00 to FF.
- Changing the data (Data setting)

 The data increases when the PLAY (►) button is pressed, and decreases when the STOP (■) button is pressed. There are altogether 256 data, from 00 to FF.
- Writing the adjustment data
 The PAUSE button must be pressed to write the adjustment data (7, 8, C, D, E, F page) in the nonvolatile memory. (The new adjusting data will not be recorded in the nonvolatile memory if this step is not performed)
- 4) After completing all adjustments, turn off the main power supply (8.4 V) once.

2. Precautions Upon Using the Adjustment Remote Commander

Mishandling of the adjustment remote commander may erase the correct adjustment data at times. To prevent this, it is recommended that all adjustment data be noted down before beginning adjustments and new adjustment data after each adjustment.

4-2. DATA PROCESS

The calculation of the DDS display and the adjustment remote commander display data (hexadecimal notation) are required for obtaining the adjustment data of some adjustment items. In this case, after converting the hexadecimal notation to decimal notation, calculate and convert the result to hexadecimal notation, and use it as the adjustment data. Indicates the hexadecimal-decimal conversion table.

exadecimal-deci	mal C	onver	sion T	able										2		
Lower digit of hexadecimal	0	1	2	3	4	5	6	7	8	9	Α	В	С	D	E (=)	F
Upper digit of hexadecimal											(日)	(日)	(_)	(占)	(E)	(/
0	0	1	2	3	4	5	6	7	8	9	10	11	12	13	14	1
1	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	3
2	32	33	34	35	36	37	38	39	40	41	42	43	44	45	46	4
3	48	49	50	51	52	53	54	55	56	57	58	59	60	61	62	6
4	64	65	66	67	68	69	70	71	72	73	74	77	76	77	78	7
5	80	81	82	83	84	85	86	87	88	89	90	91	92	93	94	9
6	96	97	98	99	100	101	102	103	104	105	106	107	108	109	110	1
7	112	113	114	115	116	117	118	119	120	121	122	123	124	125	126	1

9	144	145	146	147	148	149	150	151	152	153	154	155	156	157	158	1.
A (A)	160	161	162	163	164	165	166	167	168	169	170	171	172	173	174	1
В (Ь)	176	177	178	179	180	181	182	183	184	185	186	187	188	189	190	19
C (_)	192	193	194	195	196	197	198	199	200	201	202	203	204	205	206	2
D (ය)	208	209	210	211	212	213	214	215	216	217	218	219	220	221	222	2:
E (E)	224	225	226	227	228	229	230	231	232	233	234	235	236	237	238	2
F (F)	240	241	242	243	244	245	246	247	248	249	250	251	252	253	254	2.

Note: The characters shown in the parenthesis () shown the display on the adjustment remote commander.

(Example) If the DDS display or the adjustment remote commander shows BD (hd);

Because the upper digit of the adjustment number is B ($_{\mathcal{B}}$), and the lower digit is D ($_{\mathcal{G}}$), the meeting point "189" of ① and ② in the above table is the corresponding decimal number.

Table 5-4-1

4-3. SERVICE MODE

Additional note on adjustment

Note: After the completion of the all adjustments, cancel the service mode by either of the following ways.

- 1) After data on page: D and F is restored, unplug the main power supply and remove the coin lithium battery. (In this case, date and time and menu setting have been set by users are canceled. Perform resetting)
- 2) After data on page: D and F is restored, select page: 0, address: 01, and return the data to 00. And when data on page: 2 and 3 are changed, return data to the original condition.

1. Setting the Test Mode

Page F	Address 22

Data	Function
80	Normal
81	Test mode Various emergency prohibitions and releases Drum emergency, capstan emergency, loading motor emergency, reel emergency, tape top and end, DEW detection

Page D	Address 10
--------	------------

Data	Function
00	Normal
01	Forced camera power ON
02	Forced VTR power ON
03	Forced camera + VTR power ON
05	Forced memory power ON

- Before setting the data, select page: 0, address: 01, and set data: 01.
- For page D and F, the data set will be recorded in the non-volatile memory by pressing the PAUSE button of the adjustment remote commander. In this case, take note that the test mode will not be exited even when the main power is turned off (8.4 Vdc).
- After completing adjustments/repairs, be sure to return the data
 of this address to 00, and press the PAUSE button of the adjustment
 remote commander. And select page: 0, address: 01, and set data:
 00.

2. Emergence Memory Address

2-1. C Page Emergence Memory Address

Page C	Address F4 to FF
--------	------------------

Address	Contents
F4	EMG code when first error occurs
F6	Upper: MSW code when shift starts when first error
	occurs Lower: MSW code when first error occurs
	Lower: MSW code when first error occurs
F7	Lower: MSW code to be moved when first error
l	occurs
F8	EMG code when second error occurs
FA	Upper: MSW code when shift starts when second
l	error occurs
	Lower: MSW code when second error occurs
FB	Lower: MSW code to be moved when second error
	occurs
FC	EMG code when last error occurs
FE	Upper: MSW code when shift starts when last error
	occurs
	Lower: MSW code when last error occurs
FF	Lower: MSW code to be moved when last error
	occurs

When no error occurs in this unit, data "00" is written in the above addresses (F4 to FF). when first error occurs in the unit, the data corresponding to the error is written in the first emergency address (F4 to F7). In the same way, when the second error occurs, the data corresponding to the error is written in the second emergency address (F8 to FB).

Finally, when the last error occurs, the data corresponding to the error is written in the last emergency address (FC to FF).

Note: After completing adjustments, be sure to initialize the data of addresses F4 to FF to "00".

Initializing method:

- 1) Select page: 0, address: 01, and set data: 01.
- Select page: C, address: F4, set data: 00, and press the PAUSE button.
- 3) Select address: F5 to FF and set data "00" into them in the same way as address: F4.
- 4) Select page: 0, address: 01, and set data: 00.

2-2. F Page Emergence Memory Address

Note 1: Emergence of PB mode only.

B E A 11 10 1B	
Page F Address 10 to 1B	

Address	Contents
10	EMG code when first error occurs
12	Upper: MSW code when shift starts when first error
	occurs Lower: MSW code when first error occurs
13	Lower: MSW code to be moved when first error occurs
14	EMG code when second error occurs
16	Upper: MSW code when shift starts when second error occurs Lower: MSW code when second error occurs
17	Lower: MSW code to be moved when second error occurs
18	EMG code when last error occurs
1A	Upper: MSW code when shift starts when last error
	occurs Lower: MSW code when last error occurs
1B	Lower: MSW code to be moved when last error occurs

When no error occurs in this unit, data "00" is written in the above addresses (10 to 1B). when first error occurs in the unit, the data corresponding to the error is written in the first emergency address (10 to 13). In the same way, when the second error occurs, the data corresponding to the error is written in the second emergency address (14 to 17).

Finally, when the last error occurs, the data corresponding to the error is written in the last emergency address $(18 \ to \ 1B)$.

Note 2: After completing adjustments, be sure to initialize the data of addresses 10 to 1B to "00".

Initializing method:

- 1) Select page: 0, address: 01, and set data: 01.
- 2) Select page: F, address: 10, set data: 00, and press the PAUSE button.
- 3) Select address: 11 to 1B and set data "00" into them in the same way as in address: 10.
- 4) Select page: 0, address: 01, and set data: 00.

2-3. EMG Code (Emergency Code)

Codes corresponding to the errors which occur are written in C page, addresses F4, F8 and FC (or F page, addresses 10, 14 and 18). The type of error indicated by the code are shown in the following table.

Code	Emergency Type
00	No error
10	Loading motor emergency during loading
11	Loading motor emergency during unloading
22	T reel emergency during normal rotation
23	S reel emergency during normal rotation
24	T reel emergency (Short circuit between S reel
24	terminal and T reel terminal)
30	FG emergency at the start up of the capstan
40	FG emergency at the start up of the drum
42	FG emergency during normal rotation of the drum

2-4. MSW Code

- The lower parts of the data of C page, addresses F6, FA and FE (or F page, addresses 12, 16 and 1A) represent the MSW codes (mode switch mechanism position) when errors occurs.
- The upper parts of the data of C page, addresses F6, FA and FE (or F page, addresses 12, 16 and 1A) represent, when the mechanism position is to be moved, the MSW codes at the start movement (when moving the loading motor).
- The lower parts of the data of C page, addresses F7, FB and FF (or F page, addresses 13, 17 and 1B) represent the MSW codes of the desired movement when the mechanism position is to be moved.

	← Unloading	g										Į	_oading $ ightarrow$
Mechanism position	EJECT	BL	USE	BL	LOAD	BL	STOP	BL	TURN	BL	REC/PB	BL	REW
MSB ——	- O	0	0	0	0	0	0	0	0	0	0	0	0

		<u> </u>				, ,	Pinch	rolle	r is detached				1
	i	i J								į			i
D	eleasing lock	of.								`	Pinch rolle	r is pi	ressed
	assette camp		nt										

Mechanism Position	MSW Code	Contents
EJECT	1	Position at which the cassette compartment lock is released. The mechanism will not move any further in the unloading direction.
BL	7	BLANC code. Between two codes. The mechanism will not be stopped by this code while it is operating.
USE	3	EJECT completion position. When the cassette is ejected, the mechanism will stop at this position.
LOAD	2	Code during loading/unloading. Code that is used while the LS chassis is moving.
STOP	6	Normal stop position. The pinch roller separates, the tension regulator returns, and the brakes of both reels turn on.
TURN	4	Position at which is used when the pendulum gear swings from S to T or from T to S.
REC/PB	0	PB, REC, CUE, REV, PAUSE, FF positions. The pinch roller is pressed and tension regulator is on.
REW	5	REW position. REW are carried at this position. The mechanism will not move any further in the loading direction.

3. Bit Value Discrimination

Bit values must be discriminated using the display data of the adjustment remote commander for the following items. Us the table below to discriminate if the bit value is "1" or "0".

Display on the adjustment remote commander

(Example) If the remote commander display is "8E", bit value from bit 7 to bit 4 can be discriminated from the column (a), and those from bit 3 to bit 0 from column (b).

	Display on the		Bit va	alues	
	adjustment	bit3	bit2	bit1	bit0
	remote	or	or	or	or
	commander	bit7	bit6	bit5	bit4
	0	0	0	0	0
	1	0	0	0	1
	2	0	0	1	0
	3	0	0	1	1
	4	0	1	0	0
	5	0	1	0	1
	6	0	1	1	0
	7	0	1	1	1
A	8	1	0	0	0
	9	1	0	0	1
	A (月)	1	0	1	0
	В (Ь)	1	0	1	1
	C ([)	1	1	0	0
	D (d)	1	1	0	1
$^{\odot}$	E (E)	1	1	1	0
	F (F)	1	1	1	1

4. Input/output Check

Page 2	Address 49
--------	------------

Bit	Function	When bit value = 1	When bit value = 0
0			
1			
2			
3			
4	MIC jack	MIC jack is used	
5			
6	AUDIO/VIDEO jack	AUDIO/VIDEO jack is used	
7	S VIDEO jack		S VIDEO jack is used

Using method:

- 1) Select page: 2, address: 49.
- 2) By discriminating the bit value of display data, the state of the jack can be discriminated.

5. LED, LCD (Display Window) Check

Page 2	Address 05	Bit5
--------	------------	------

Using method:

- 1) Select page: 2, address: 05, and set the bit value of Bit5 to "1".
- 2) Check that all LED are lit and all segments of LCD (display window) are lit.
- 3) Select page: 2, address: 05, and set the bit value of Bit5 to "0".

6. Record of Use Check

Page 2 Address A2 to AA

Bit	Function		Remarks
A2	Drum rotation	Hour (H)	1000th place digit and 100th place digit of counted time (decimal digit)
A3	counted time	Hour (L)	10th place digit and 1st place digit of counted time (decimal digit)
A4	(BCD code)	Minute	
A5	User initial power	Year	
A6	on date	Month	After setting the clock, set the date of power on next
A7	(BCD code)	Day	
A8	Final condensation	Year	
A9	occurrence date	Month	
AA	(BCD code)	Day	

Using method:

1) The record of use data is displayed at page: 2, addresses: A2 to

Note 1: This data will be erased when the coin lithium battery (CF-69/70/72 board BH001) is removed (reset).

Note 2: 2.5 LCD model: DCR-TRV320/TRV320E/TRV320P

3 LCD model: DCR-TRV420E/TRV525

3.5 LCD model: DCR-TRV520/TRV520E/TRV520P/

TRV620E

4 LCD model: DCR-TRV720/TRV720E

	CF board
2.5 LCD model	CF-69
3/3.5 LCD model	CF-70
4 LCD model	CF-72

Note 3: When the drum was replaced, initialize the drum rotation counted time.

Initializing method of drum rotation counted time:

- 1) Select page: 0, address: 01, and set data: 01.
- Select page: 2, address: A2, set data: 00, and press the PAUSE button.
- 3) Select address: A3 and A4 and set data "00" into them in the same way as in address: A2.
- 4) Select page: 0, address: 01, and set data: 00.

7. Switch Check (1)

Page 2	Address 43
--------	------------

Bit	Function	When bit value = 1	When bit value = 0
0	VTR MODE SW (SS-10000 block S001)	OFF	ON
1	CAM MODE SW (SS-10000 block S001)	OFF	ON
2	START/STOP SW (SS-10000 block S002)	OFF	ON
3	EJECT SW (FK-10000 block S012)	OFF	ON
4	CC DOWN SW (Mechanism chassis)	OFF (UP)	ON (DOWN)
5	PHOTO FREEZE SW (FK-10000 block S013)	OFF	ON
6	PHOTO MODE SW (SS-10000 block S001)	OFF	ON
7			

Using method:

- 1) Select page: 2, address: 43.
- By discriminating the bit value of display data, the state of the switches can be discriminated.

8. Switch Check (2)

Using method:

 Select page: 2, address: 60 to 66.
 By discriminating the display data, the pressed key can be discriminated.

6-2. ELECTRICAL PARTS LIST

NOTE:

- · Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one
- RESISTORS

All resistors are in ohms. METAL: Metal-film resistor.

METAL OXIDE: Metal oxide-film resistor.

F: nonflammable

· Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

SEMICONDUCTORS

In each case, u: µ, for example:

 $\begin{array}{lll} uA. & : \mu A. \, . \\ uPB. & : \mu PB. \, . \end{array}$ uPA.. : μΡΑ. . uPC.. : μPC. .

uPD. . : μPD. .

CAPACITORS

uF: μF COILS

uH: μH

The components identified by mark △ or dotted line with mark △ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque A sont critiquens pour la sécurité.

Ne les remplacer que par une pièce portant le numéro spécifié.

When indicating parts by reference number, please include the board.

About PD-117/118 board and LCD module, discriminate LCD type on the machine referring to page 9, and replace the same type.

The components identified by mark \triangle or dotted line with mark \triangle are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque \triangle sont critiques pour la sécurité.
Ne les remplacer que par une pièce portant le numéro spécifié.

The components identified by mark \triangle or dotted line with mark \triangle are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque A sont critiques pour la sécurité.

Ne les remplacer que par une pièce portant le numéro spécifié.

1. PREPARATION FOR CHECKING, ADJUSTING AND REPLACING THE MECHANISM

For the disassembly procedures of the cabinet and printed wiring boards, please refer to the "DISASSEMBLY" section of the service manual of the respective models.

To re-assemble the mechanical parts which are disassembled in the following sections, perform the disassembly steps in reverse, unless otherwise specified.

The mechanisms are adjusted while set in the <u>USE</u> mode of operation. (Refer to the "Mode Selector Operation Procedure of the Supplement-1 Manual for how to enter the <u>USE</u> mode.)

1-1. Cassette Compartment Block Assy

1. Disassembly Procedure (Refer to Fig. 1.)

- 1) Set the mechanism to USE mode.
- 2) Confirm that the Cassette Compartment Block Assy is opened. If it is not opened, open it referring to Fig. a.
- Remove the claws (a) and (B) of the Damper Assy (1) from the chassis.
- 4) Remove the washer ② from the shaft of the Cassette Compartment near the Drum, next to the loading motor. Remove the shaft of the arm from the slot.

- 5) Remove the shaft of the arm from the slot © of the Cassette Compartment near the Drum, next to the capstan motor. (Refer to Fig. b)
- 6) Lift up the Cassette Compartment at the Drum side in the direction of the arrow ①, and remove the arm shaft of the Cassette Compartment from the LS Chassis ④ near the Reel Tables. Remove the Cassette Compartment Assy ③ in the direction of the arrow ⑥.

- 1) After attaching the Tension Spring, confirm that the straight portion at the end of the curved hook of the spring is positioned inside the mechanism. (Refer to Fig. c)
- Confirm that the claw in the bottom of the shaft near the Reel Table of the Cassette Compartment is hooked to the LS Chassis.
- 3) Confirm that the claw of the Damper Assy is hooked to the LS Chassis. (Refer to Fig. b)

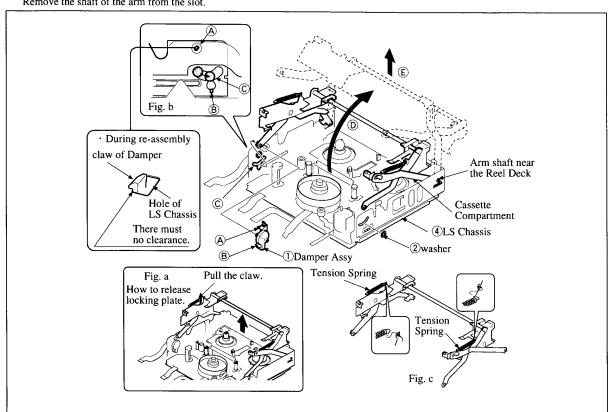

Fig. 1

1-2. How to Operate the Mechanism with the Cassette Compartment Block Assy Removed

1. How to load a cassette tape (Refer to Fig. 2):

- While referring to section "DISASSEMBLY" of the respective service manual, turn the main power on with the cabinet and camera section removed. (It enables to operate the mechanical deck.)
- Connect the adjustment remote commander (Ref. No. J-10) and establish the TEST mode.

Example of establishing the TEST mode: model CCD-TR420E/TR440E.

Select page: 6, address: 00, set data:01 and press the PAUSE button to release protection.

Select page: 7, address: 01, set data: 01 and press the PAUSE button.

After tape loading or other desired operations of mechanism are completed, be sure to perform the following:

Select page: F, address: 01, set data :00 and press the PAUSE button.

Select page: 6, address: 00, set data: 00 and press the PAUSE button.

- 3) Press the push-switch ① knob in the direction of the arrow which sets the machine into loading mode.
- ☆ PB, FF/REW and CUE/REV operations are possible.

2. How to establish RECORD mode:

- 1) Press pin of the push-switch ② (ON state) and keep the ON state by fixing with adhesive tape ③.
- Turn the main power switch ON (select VTR or CAMERA position of in case of camera).
- Set the RECORD switch to ON.
 (When the TEST mode is selected, the rotation detection of the S and T reel tables is muted, and the top end sensor is disable which allow to run the tape.)

3. How to eject a cassette tape:

1) Press the EJECT switch to ON.

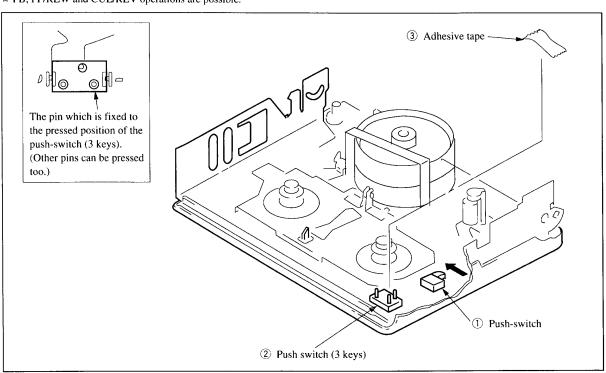

Fig. 2

2. PERIODIC CHECK AND MAINTENANCE ITEMS

Perform the following periodic check and maintenance to
ensure that the machine functions continue to operate in peak
condition, and to protect the tape and mechanism deck. After
completing repair work, perform the following maintenance
items regardless of how long the user's machine has been
used.

2-1. Rotary Drum Assy Cleaning

Press the cleaning piece (Ref. No. J-2) moistened with cleaning fluid (Ref. No. J-1) lightly on the Rotary Drum Assy. Gently turn the Rotary Drum Assy slowly by hand counter-clockwise to clean the rotary drum.

Caution: Never attempt to turn the head drum motor by turning the main power ON. Also, never turn the drum clockwise by hand. In addition, never move the cleaning piece vertically with respect to the head tips, since this will damage them. Never clean the head drum in any way other than as described above.

2-2. Tape Path Cleaning (Refer to Fig. 3.)

 Set the mechanism to USE mode. Clean the tape path system (TG-1, TG-2, TG-3, TG-4, pinch roller, capstan shaft) and lower drum using a very thin cotton swab (Ref. No. J-3) moistened with cleaning fluid.

Caution: Take care that the very thin cotton swab (Ref. No. J-3) does not touch the oil or grease of the various link mechanisms.

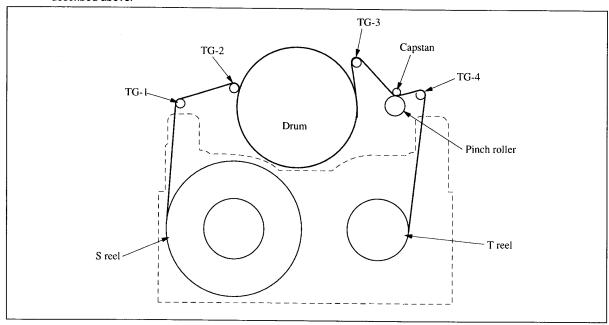

Fig. 3

2-3. Periodic Check Items

Maintenance and					Davida							
Inspection Points		500	1000	1500	2000	2500	3000	3500	4000	4500	5000	Remarks

Note: When overhauling the machine, replace the parts while referring to the above table.

Note: Regarding oil

- Be sure to use the specified oil. (If the viscosity and other characteristics are different, various troubles may arise.)
 - Oil: Sony part No. 7-661-018-18 (Mitsubishi diamond oil hydro fluid NT-68)
- For the oil lubricated bearings, use oil free from dust or foreign materials. If the oil contains any dust or foreign material, the bearings will wear out quickly or burn out.
- One drop of oil is the amount of oil which forms at the tip of a stick of 2 mm diameter.

Other equipment

- Oscilloscope
- Analog circuit tester (input impedance 20 k Ω)

3. CHECKING, ADJUSTING AND REPLACING THE MECHANISM

3-1. HC Roller Block Assy (Refer to Fig. 5)

1. Disassembly Procedure

- Remove the HC Roller Block Assy in the direction shown by ©.
- 3) Remove the stop washer ② and remove the HC Roller Block Assy ③.

- 1) After attaching the HC Roller Block Assy, confirm that both ends of the torsion spring are hooked to (A) and (D).
- 2) Align the block so that the cut-out (E) agrees with the rib (F).

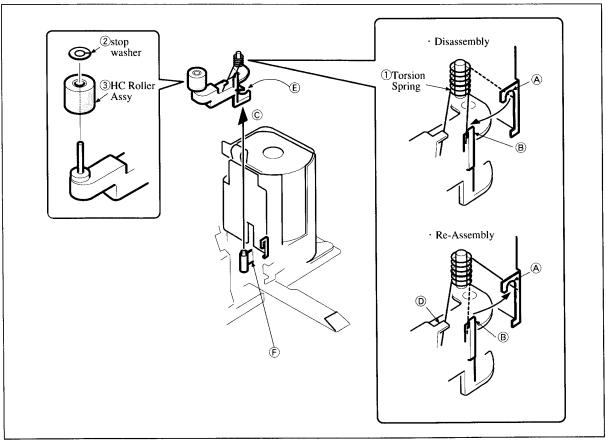

Fig. 5

3-2. Drum Assy (Refer to Fig. 6)

1. Disassembly Procedure

- 1) Set the mechanism to USE mode.
- 2) Remove the three screws (M 1.4) 1 and remove the Drum Assy 2.

Caution: Be careful not to touch the outer circumference of the drum. (Hold the portions (A) and (B) of the drum assy.)

- 1) Be careful not to touch the outer circumference of the drum. (Hold the portions A and B of the drum assy.)
- 2) When tightening the three screws (M 1.4), tighten them in the order ©, then ©, then E.
- 3) After attaching the Drum Assy, perform the steps in section "4. TAPE PATH ADJUSTMENT".

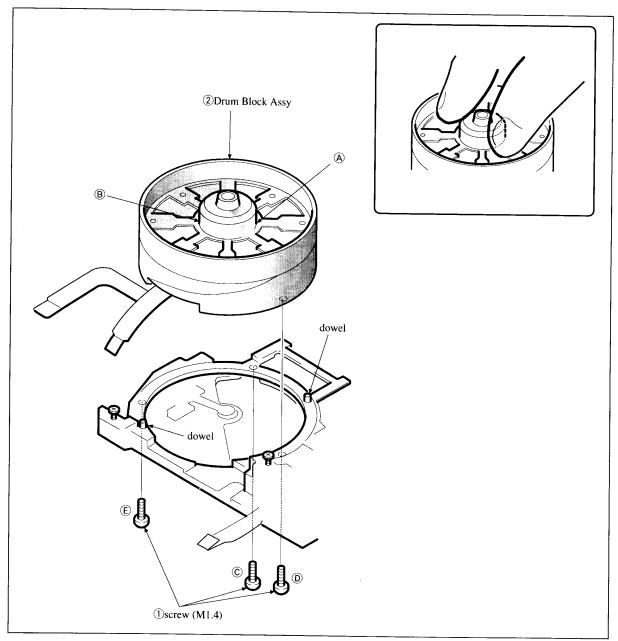

Fig. 6

3-3. Drum Base Block Assy, Shaft Ground (Refer to Fig. 7)

1. Disassembly Procedure

- 1) Remove the Drum Assy referring to section 3-2.
- 2) Remove the three screws (M 1.4×2.5) ① and remove the Drum Base Block Assy ②.
- 3) Remove the screw (M 1.7×1.4) 3 and remove the Shaft Ground 4.
- Caution 1: Do not hold the spring portion of the Shaft Ground ④.
- Caution 2: The loading motor can be removed while the mechanism is in this state. However, do not move any other mechanical parts (especially gears and cams around the rotary switch) when removing the loading motor. (Refer to 3-11.)

- 1) Do not touch the spring portion of the Shaft Ground 4.
- 2) When tightening the three screws (M 1.4×2.5), tighten them in the order of A, then B, then C.
- 3) After re-assembly is completed, perform the steps in section "4. TAPE PATH ADJUSTMENT".

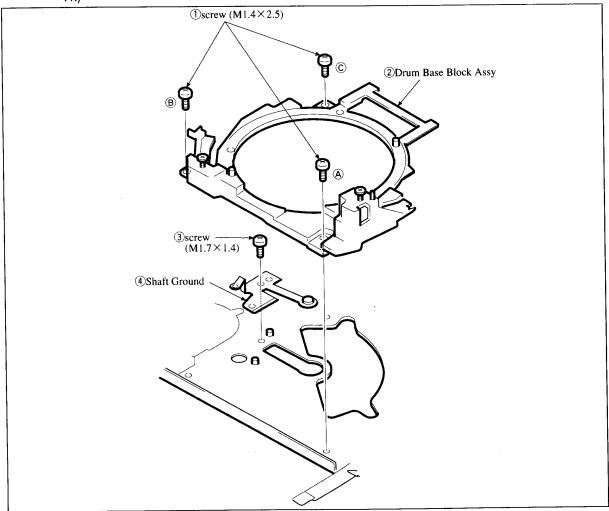

Fig. 7

3-4. Gooseneck Retainer, Gooseneck Gear Assy (Refer to Fig. 8)

1. Disassembly Procedure

- 1) Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the LED ① from the LED holder of the Gooseneck Retainer ③.
 - (Turn the flexible board 90° outside and remove it upward.)
- 3) Remove the three screws (M 1.4×2.5) ② and remove the Gooseneck Retainer ③.
- 4) Remove the stop washer ④ and remove the Gooseneck Gear Assy ⑤.

- When attaching the Gooseneck Retainer 3, take care that the Gooseneck Retainer 3 does not collide with the tension regulator band. (The tension regulator band must be located inside.)
- 2) Hook the T-side claw on the guide.

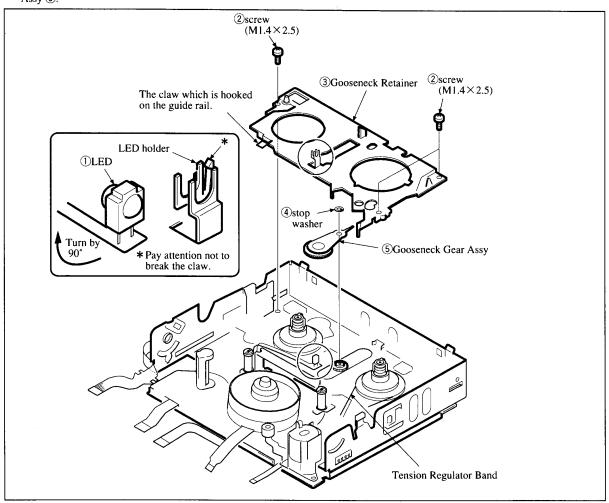

Fig. 8

3-5. LS Chassis Block Assy, Mechanical Chassis Block Assy (Refer to Fig. 9)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1.
- Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- Remove the FP-221 flexible board ① from the flexible board holder.
- 4) Remove the stop ring E1.5 ②.
- 5) Remove the two screws (M 1.4×2.5) (3) and remove the LS Chassis Block Assy (4) from the Mechanical Chassis Block (5) in the direction of the arrow (A).

Note: The Tension Regulator Plate (2) can easily fall into the Mechanical Chassis Block Assy. Take care not to drop it.

- Before attaching the LS Chassis Block Assy, confirm that the respective phase-determining holes have been adjusted for correct phase. Also confirm that the specified locations of the Mechanical Chassis Block Assy and the LS Chassis Block Assy are coated with grease SG-055G (Ref. No. J-13). (Refer to Fig. a)
- 2) When attaching the LS Chassis Block Assy, insert the LS Cam Plate (on the LS chassis side) into the dowel (on the mechanical chassis side). Also insert the TG1 Cam Axis (on the LS chassis side) into the Tension Regulator Plate (2) (on the mechanical chassis side).
- When attaching these block assemblies, attach them while pressing the TG-1 Arm Assy in the direction toward the TG-2 Guide. (Refer to Fig. b)
- 4) Pay attention that the TG-1 Arm is not floated.

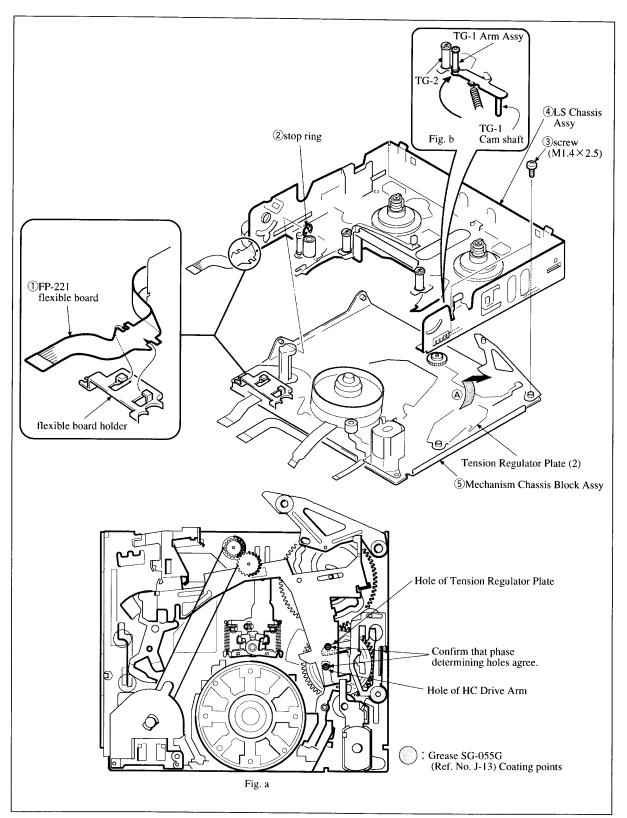

Fig. 9

• PARTS CONSTITUTING THE LS CHASSIS.

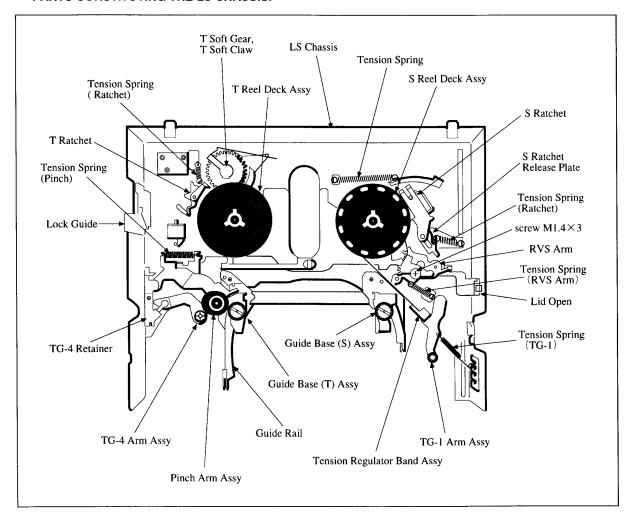

Fig. 10

3-6. T Reel Table Assy, T Ratchet, T Soft Gear Block Assy (Refer to Fig. 11)

1. Disassembly Procedure

- 1) Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 3) Remove the claw of the T Reel Deck Assy ① from the chassis and remove the T Reel Deck Assy from its shaft.
- 4) Remove the Tension Spring (Ratchet) ② from the LS Chassis and turn the T Ratchet ③ in the direction of the arrow ④ and remove it .
- 5) Turn the T Soft Gear Block Assy 4 in the direction of the arrow (B) and remove it.

- Confirm that the protrusions of both the T Soft Gear Block Assy and T Ratchet are securely locked to the LS Chassis.
- 2) Be careful not to deform the claw.

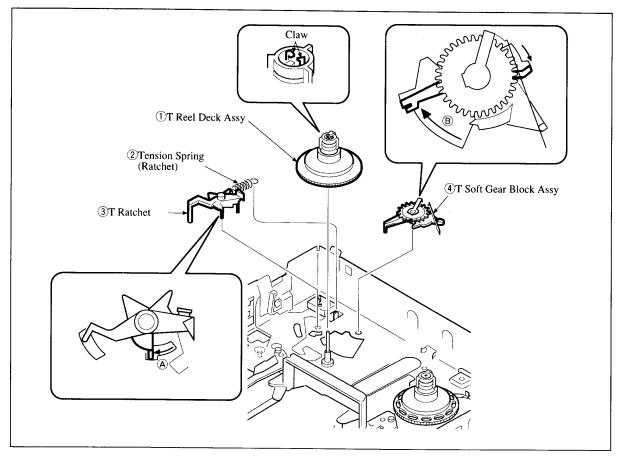

Fig. 11

3-7. Tension Regulator Band Assy, TG1 Arm Assy, S Reel Table Assy, S Ratchet, S Ratchet Release Plate, RVS Arm (Refer to Fig. 12)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 3) Remove the Tension Spring (TG1) ① from the LS Chassis.
- 4) Remove the screw (M 1.4×3) ② and remove the Tension Adjustment Block of the Tension Regulator Band Assy ⑤ form RVS Arm.
- 5) Release the S Ratchet **(6)** in the direction of the arrow **(A)** and remove the Tension Regulator Band (while taking care not to bend the band) from the S Reel.
- 6) Remove the TG1 Arm Assy ③ from the LS Chassis, then remove the claw of the Tension Regulator Band Assy ④. (Refer to Fig. a)
- 7) Remove the claw of the S Reel Deck Assy (5) from the chassis and remove the S Reel Deck Assy from its shaft.
- 8) Remove the S Ratchet **(6)**. (Because it is press-fitted, insert tip of screwdriver into the center of rotation and remove it.
- 9) Remove the Tension Spring (ratchet) ① from the LS Chassis and remove the S Ratchet Release Plate ⑧.
- 10) Remove the Tension Spring (9) from the LS Chassis and remove the RVS Arm (10) by turning it...

- Confirm that the dowel of the S Ratchet Release Plate is inserted into the groove of the S ratchet and confirm that the center of the ratchet is press-fitted into bottom of the shaft. (It can be used again.)
- 2) When attaching the Tension Regulator Band Assy, take care not to bend it.
- Pay attention that oil or grease is not spit on the surface of the Tension Regulated Band. (Pay attention also not to touch it with hand directly.)
- 4) Confirm that the tension regulator band is correctly inserted into the groove of the S Reel Deck Assy (5). (Refer to Fig. b)
- 5) When securing the Tension Adjustment Block using the screw, press it toward the position which gives the least tension, then tighten the fixing screw.
- Before attaching the TG1 Arm Assy, coat the LS Chassis TG1 boss with oil (1/2 drop).
- 7) Do not touch the tape guide of the TG1 Arm Assy with bare
- Confirm that the claw of the S Reel Deck Assy is not deformed.

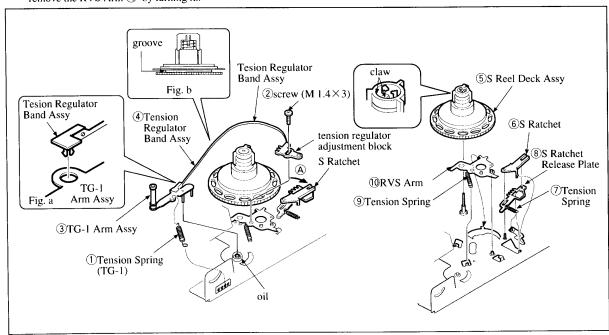

Fig. 12

3-8. Pinch Arm Assy, TG4 Arm Block Assy (Refer to Fig. 13)

1. Disassembly Procedure

- 1) Remove the Cassette Compartment Block Assy referring to section 1-1.
- Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 3) Remove the LS Chassis Block Assy referring to section 3-5.
- 4) Remove the Torsion Spring (pinch) ① from an end of Pinch Arm and hook it on the cut-out ⓐ of the LS Chassis.
- 5) Remove the screw (M 1.4×2.5) ② and remove the TG4 Retainer ③.
- 6) Remove the TG4 Arm Block Assy ④ and remove the Torsion Spring ⑤ while paying attention to the Torsion Spring ⑤.
- 7) Remove the Pinch Arm Assy ⑥. (Caution: The Pinch Press Roller is easy to drop. Pay attention not to drop it.)
- 8) Remove the Torsion Spring (pinch) ① from the cut-out of the LS Chassis in the order of ⓐ then ⓐ.

- Before attaching these parts, coat the LS chassis pinch arm boss and TG4 arm boss with grease SG-055G (Ref. No. J-13).
- Do not touch the tape guide of the TG4 Arm Block Assy and roller of the Pinch Arm Assy with bare hand.
- 3) After coating the Pinch Press Shaft of the Pinch Arm Assy ③ with grease SG-055G (Ref. No. J-13), attach the Pinch Press Roller.

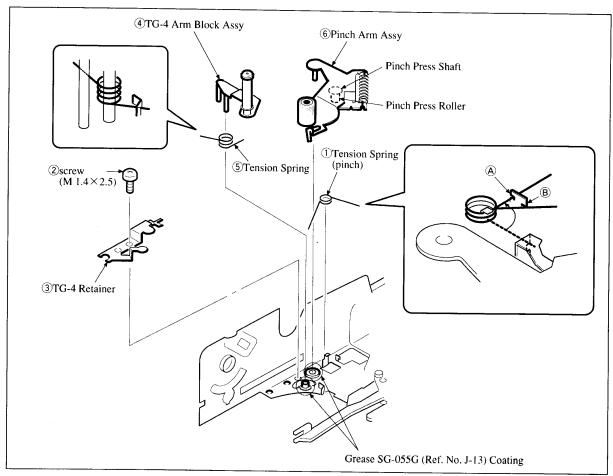

Fig. 13

3-9. LS Cam Plate, LS Guide Cover, Lid Opener, EJ Arm, Lock Guide (Refer to Fig. 14)

1. Disassembly Procedure

- 1) Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 3) Remove the LS Chassis Block Assy referring to section 3-5.
- 4) Remove the two screws (M 1.4 \times 2.5) ① and remove the the LS Cam Plate ②.

In this state, write a mark on the screw ① and on the LS Chassis indicating the position of the LS Cam Plate which helps during re-assembly.

- 5) Remove the LS Guide Cover 3.
- 6) Remove the Lock Guide ④ in the upward direction. (Refer to Fig. a)

- 7) Remove the Lid Open ⑤ in the direction of the arrow ⓒ while pushing ⑧ portion.
- 8) Remove the EJ Arm (6) . (The EJ Arm (6) is press-fitted. If the EJ Arm (6) is not damaged, it is not necessary to replace.)

- 1) After the captioned parts are attached, confirm that the respective claws and dowels are engaged completely.
- 2) If the EJ Arm (6) is removed, be sure to replace it with the new replacement EJ Arm.
- 3) If any mark is not written when removing the LS Cam Plate②, adjust and attack it as shown in Fig. b.

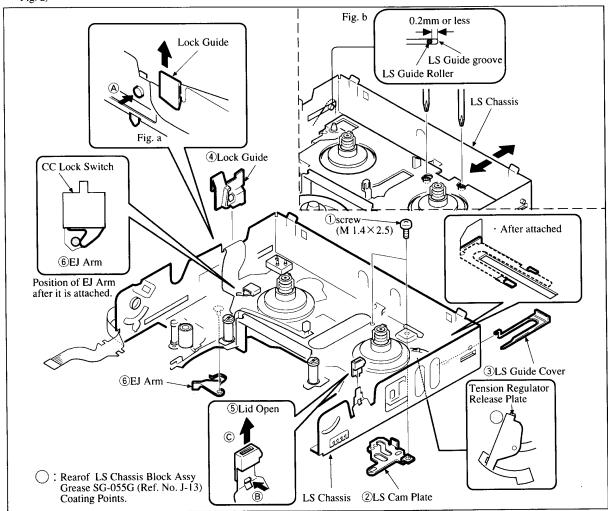

Fig. 14

3-10. Guide Base (S) and (T) Block Assemblies, Guide Rail (Refer to Fig. 15)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 3) Remove the LS Chassis Block Assy referring to section 3-5.
- 4) While pushing the GB Stoppers (S) and (T) in the direction of arrow (A), press the guide arm in the direction of the arrow (B), and turn the Guide Base (S) and (T) Block Assemblies: (1) and (2) in the direction of the arrow (C) respectively, and remove them.
- 5) Remove the two screws (M 1.4×2.5) ③ and remove the the Guide Rail Assy ④.
- 6) Remove the Stopper (S) and (T): ⑤ and ⑥, then remove the GB Stopper S and T: ⑦ and ⑧.

- 1) Pay attention not to deform the Guide Rail.
- Do not touch the tape guide of the Guide Base (S) and (T) Block Assemblies with bare hand.
- 3) Pay attention not to deform the Stoppers (S) and (T).
- 4) When attaching the Guide Base (S) and (T) Blocks to the Guide Rail, move back the Guide Bases until the GB Stoppers (S) and (T) are locked. ("Click" sounds.)
- 5) After the captioned parts are attached, perform section "4. TAPE PATH ADJUSTMENT".

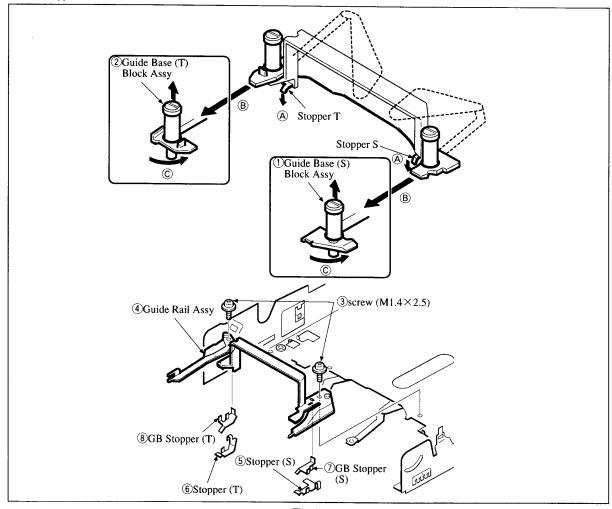

Fig. 15

• PARTS CONSTITUTING THE MECHANISM CHASSIS

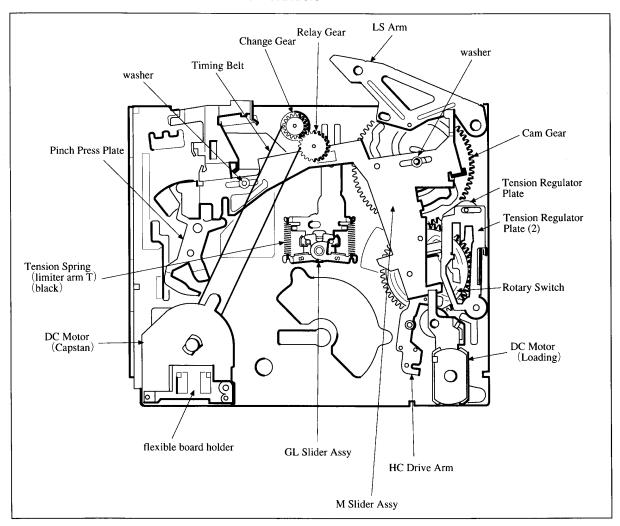

Fig.16

3-11. DC Motor Assy (Loading) (Refer to Fig. 17)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the HC Roller Block Assy referring to section 3-1.
- 3) Remove the Drum Assy referring to section 3-2.
- 4) Remove the Drum Base Block Assy referring to section 3-3.
- Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 6) Remove the LS Chassis Block Assy referring to section 3-5.
- 7) Remove soldering from the (A) portion.
- 8) Remove the screw (M 1.4×2.5) ① and remove the Motor Holder Block Assy ② from the mechanism chassis along with the claw beneath the Motor Holder Block Assy as shown by the arrow ③.
- 9) Remove the Motor Shield ③ in the direction of the arrow© (by opening the two ★ star marked points).
- 10) Release the claw on top of the Motor Holder ⑤ and remove the DC Motor Assy ④ in the direction of the arrow ⑥.
- 11) Remove the Motor Holder Sleeve (6), Gear A(7) and Worm Shaft (8) in this order.

- 1) Before attaching the Gear A ⑥, coat the Retainer Shaft ⑥ with grease SG-055G (Ref. No. J-13).
- After assembling the Motor Holder Block Assy, coat the six locations shown by Fig. a with grease SG-055G (Ref. No. J-13).
- 3) The HC Drive Arm is easy to drop. Confirm that it is attacked referring to Fig. 19.

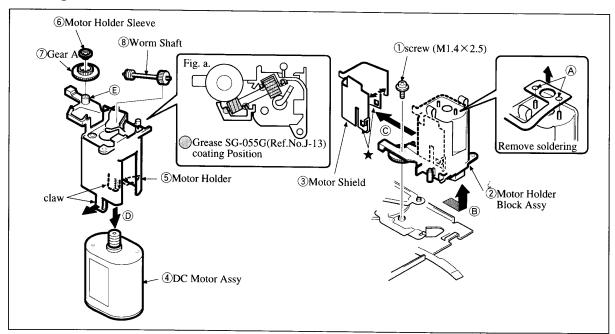

Fig. 17

3-12. Tension Regulator Plate 2, Relay Gear, M Slider Assy (Refer to Fig. 18)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1
- 2) Remove the HC Roller Block Assy referring to section 3-1.
- 3) Remove the Drum Assy referring to section 3-2.
- 4) Remove the Drum Base Block Assy referring to section 3-3.
- 5) Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 6) Remove the LS Chassis Block Assy referring to section 3-5.
- 7) Remove the DC motor referring to section 3-11.
- 8) Remove the Tension Regulator Plate 2 ①.
- 9) Remove the Relay Gear 2.
- 10) Remove the two washers ③. Remove the M Slider Assy ④. At the point, confirm that the LS Roller ⑤ is not dropped.

- 1) Before attaching the M Slider Assy ④, coat the LS Roller Shaft ⑥ on the back of the M Slider Assy, the Pinch Press Plate Shaft ® and the mechanism chassis M Slider Axis © with grease SG-055G (Ref. No. J-13). (Refer to Fig. b)
- 2) While confirming the phase-determining holes, attach the M Slider Assy 4 while paying attention to the claw.
- Attach the Tension Regulator Plate 2 ① inside the Tension Regulator Plate. (Refer to the asterisk * Marked portion of Fig. a)
- 4) Before attaching the Relay Gear ②, coat the mechanism chassis Relay Gear Axis ① with grease SG-055G (Ref. No. J-13).

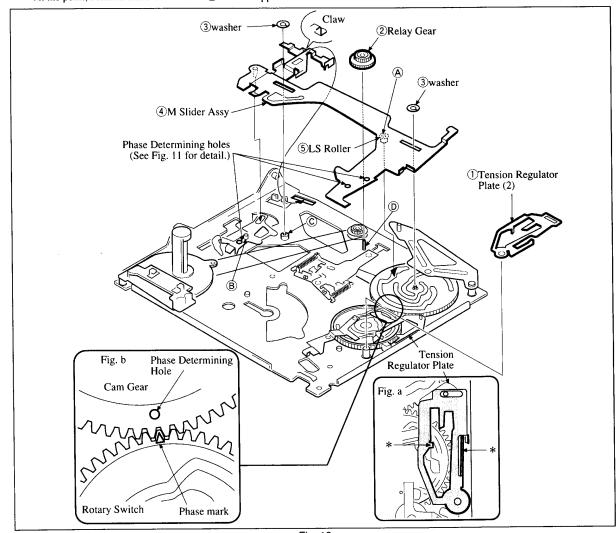

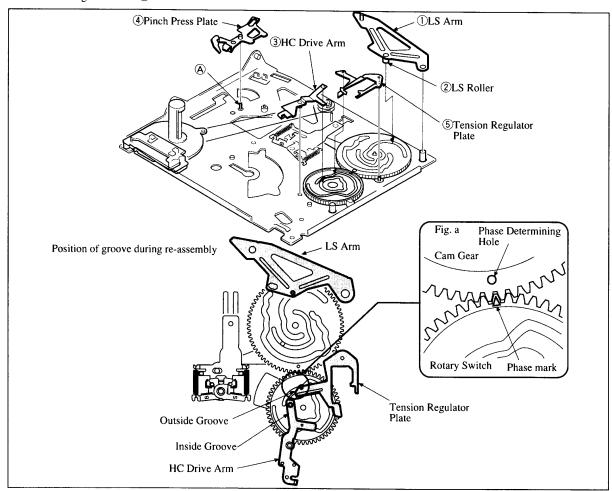

Fig. 18

3-13. LS Arm, HC Drive Arm, Pinch Press Plate, Tension Regulator Plate (Refer to Fig. 19)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the HC Roller Block Assy referring to section 3-1.
- 3) Remove the Drum Assy referring to section 3-2.
- 4) Remove the Drum Base Block Assy referring to section 3-3.
- Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 6) Remove the LS Chassis Block Assy referring to section 3-5.
- 7) Remove the DC Motor Assy referring to section 3-11.
- Remove the Tension Regulator Plate 2, Relay Gear and M Slider Assy referring to section 3-12.
- Remove the LS Arm ①. At this point, confirm that the LS Roller ② is not dropped.
- 10) Remove the HC Drive Arm ③, Pinch Press Plate ④ and Tension Regulator Plate ⑤.

- Before attaching the captioned parts, confirm that phases of the Cam Gear and the Rotary Switch agree. (See Fig. a.)
- 2) Insert the dowel of the Tension Regulator Plate ⑤ into the groove outside the rotary switch.
- 3) Before attaching the Pinch Press Plate ④, check for grease on the mechanism chassis Pinch Press Plate Shaft ⑥. If grease cannot be found, coat it with grease SG-055G (Ref. No. J-13). After attaching the Pinch Press Plate ④, align its phase hole until it agrees with the phase-determining hole on the mechanism chassis.
- 4) Insert the dowel of the HC Drive Arm ③ into the groove inside the rotary switch.
- 5) Before attaching the LS Arm ①, coat the LS roller shaft of the LS Arm ① with grease SG-055G (Ref. No. J-13).

3-14. Cam Gear (Refer to Fig. 20)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the HC Roller Block Assy referring to section 3-1.
- 3) Remove the Drum Assy referring to section 3-2.
- 4) Remove the Drum Base Block Assy referring to section 3-3.
- Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 6) Remove the LS Chassis Block Assy referring to section 3-5.
- 7) Remove the DC Motor Assy referring to section 3-11.
- 8) Remove the Tension Regulator Plate 2, Relay Gear and M Slider Assy referring to section 3-12.
- Remove the LS Arm and Tension Regulator Plate referring to section 3-13.
- 10) Remove the Cam Gear ①.

2. Precautions During Re-Assembly

- 2) Attach the Cam Gear ① so that its phase hole agrees with the phase mark on the rotary switch. (Refer to Fig. a)
- 3) After the Cam Gear ① is attached, coat the GL Arm Axis Block of the cam gear with grease SG-055G (Ref. No. J-13).

Reference: The phase marks of the Cam Gear and Rotary Switch can also be checked from the rear side of mechanism chassis. It means that the phase can be confirmed after mechanism deck is fully re-assembled.

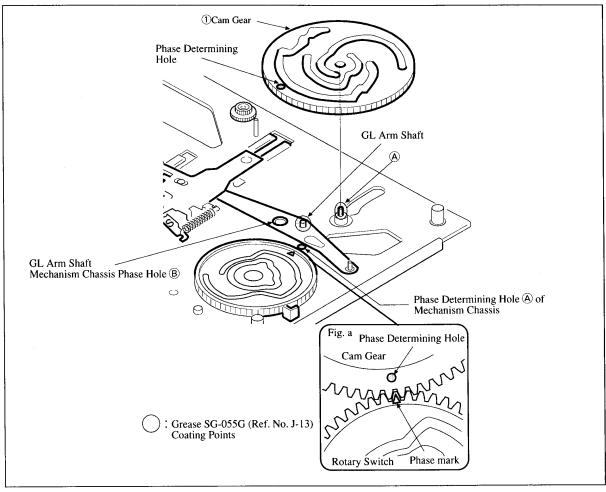

Fig. 20

3-15. GL Slider Assy, GL Arm (Refer to Fig. 21)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the HC Roller Block Assy referring to section 3-1.
- 3) Remove the Drum Assy referring to section 3-2.
- 4) Remove the Drum Base Block Assy referring to section 3-3.
- Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 6) Remove the LS Chassis Block Assy referring to section 3-5.
- 7) Remove the DC Motor Assy referring to section 3-11.
- Remove the Tension Regulator Plate 2, Relay Gear and M Slider Assy referring to section 3-12.
- 9) Remove the LS Arm and Tension Regulator Plate referring to section 3-13.
- 10) Remove the Cam Gear referring to section 3-14.
- 11) Remove the GL Slider Assy ① by sliding it in the direction of the arrow ④.

12) Remove the GL Arm 2.

- The Tension Spring T³ is colored black and the Tension Spring S⁴ is colored silver.
- 2) Coat the position shown in Fig. a of the GL Slider Assy ① with grease SG-055G (Ref. No. J-13).
- 3) Coat the four points (B) where GL slider is attached on the mechanism chassis with grease SG-055G (Ref. No. J-13).
- 4) After attaching the GL Arm ② and the GL Slider Assy, align the GL arm phase hole until it agrees with the phase-determining hole on the mechanism chassis.

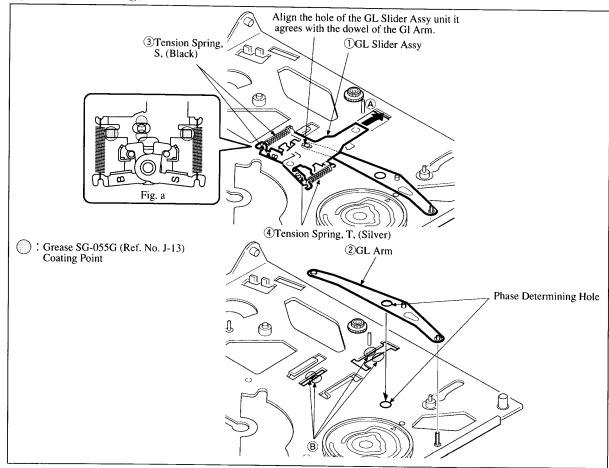

Fig. 21

3-16. Rotary Switch (Refer to Fig. 22)

1. Disassembly Procedure

- Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the HC Roller Block Assy referring to section 3-1.
- 3) Remove the Drum Assy referring to section 3-2.
- 4) Remove the Drum Base Block Assy referring to section 3-3.
- 5) Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 6) Remove the LS Chassis Block Assy referring to section 3-5.
- 7) Remove the DC Motor Assy referring to section 3-11.
- Remove the Tension Regulator Plate 2, Relay Gear and M Slider Assy referring to section 3-12.
- 9) Remove the LS Arm, Tension Regulator Plate, HC Drive Arm and Pinch Press Plate referring to section 3-13.
- 10) Remove the Cam Gear referring to section 3-14.

- 11) Remove soldering the portion (a) on the rear of the Rotary Switch. (Pay attention at this moment that the GL Slider and GL Arm do not drop.)
- 12) While lifting up the portion (B) about 1 mm (pay attention not to break it), hold the portion (C) and turn it in the direction of the arrow (D) to remove the Rotary Switch.

2. Precautions During Re-Assembly

 Before attaching the Rotary Switch by soldering on the FP-220 board, insert the portion
 (a) dowel into the hole on the mechanism chassis. Confirm that the three claws are engaged with the mechanism chassis.

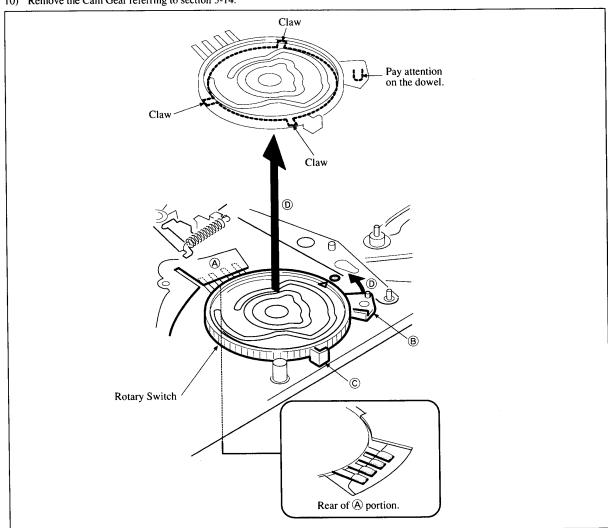

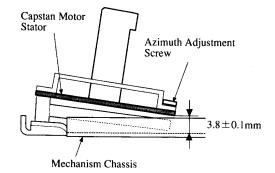

Fig. 22

3-17. Capstan Motor (Refer to Fig. 23)

1. Disassembly Procedure

- 1) Remove the Cassette Compartment Block Assy referring to section 1-1.
- 2) Remove the HC Roller Block Assy referring to section 3-1.
- 3) Remove the Drum Assy referring to section 3-2.
- 4) Remove the Drum Base Block Assy referring to section 3-3.
- 5) Remove the Gooseneck Retainer and Gooseneck Gear Assy referring to section 3-4.
- 6) Remove the LS Chassis Block Assy referring to section 3-5.
- 7) Remove the DC Motor Assy referring to section 3-11.
- Remove the Tension Regulator Plate 2, Relay Gear and M Slider Assy referring to section 3-12.
- 9) Remove the Pinch Press Plate referring to section 3-13.
- 10) Remove the screw (M 1.4×6.7) ① and remove the Flexible Board Holder ②.
- 11) Remove the two screws (M 1.4×6.7) ③ and remove the Capstan Motor ④, Timing Belt ⑤ and Capstan Spacer ⑥.
- 12) Remove the washer 7 and remove the Changer Gear 8.

- 1) Confirm that the timing belt is not twisted.
- 2) Do not touch the capstan with bare hand.
- 3) Lubricate the mechanism chassis's Change Gear shaft (A).
- 4) After attaching the Capstan Motor, perform the capstan azimuth adjustment.

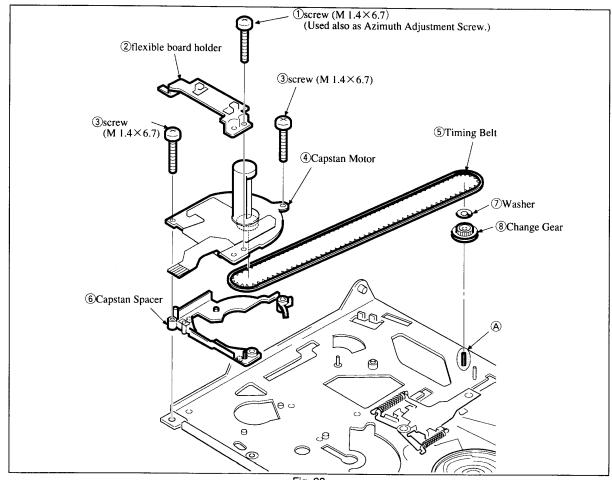

Fig. 23

3-18. Tension Regulator Position Adjustment (Refer to Fig.24)

1. Adjustment Procedure

- 1) Insert a cassette Tape and run the Tape in PB mode.
- 2) While tape is running, confirm that the distance between the LS Chassis and TG-1 Guide's top flange is 8.3mm.
- 3) If not, proceed to step 4).
- 4) Loosen the screw 1 (M 1.4 \times 3).
- 5) If the TG-1 Guide is located inside the specified position, move position of the Tension Regulator Band Assy using the FWD B.T. Adjustment tool screwdriver (Ref. No. J-9) as shown in the direction of the arrow (a). If it is located outside, move it in the direction of the arrow (b).
- 6) Tighten the screw \bigcirc (M 1.4 \times 3).

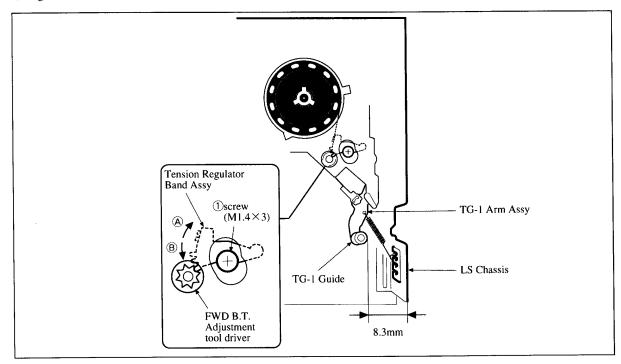

Fig.24

3-19. FWD Tape Hold-Back Tension Adjustment (Refer to Fig. 25)

1. Adjustment Procedure

- 1) Insert the torque measurement cassette to the machine.
- 2) Put the machine in the FWD mode. Confirm that the reading on the S side is in the range from 8.0 to 10.5 g•cm. If the reading is outside the specification range, make the following adjustments.
- 3) If the reading is higher than the specification, change the TG-1 Tension Spring to the side (A).
- 4) If the reading is lower than the specification, change the TG-1 Tension Spring to the side (B).

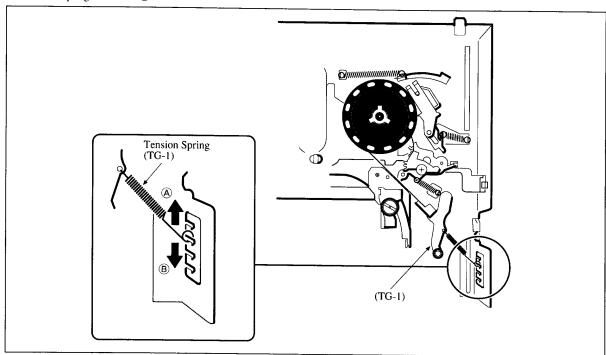

Fig. 25

4. TAPE PATH ADJUSTMENT

Purpose: Adjusts the head linearity.

Adjustment Error: Noise appears on top and bottom of

display when playing back the tape recorded by other machines.

4-1. Preparations for Adjustments

- Clean the tape running surface (tape guide, drum, capstan, pinch roller).
- 2) Connect the adjustment remote commander to the REMOTE terminal (JACK block).
- 3) Establish the PATH mode using the adjustment remote commander (Track Shift mode)* to cancel auto tracking.
- 4) Connect an oscilloscope.
 - CH1: Test connector PB RF terminal
 - External trigger: Test connector PB SWP terminal
- 5) Playback the tracking alignment tape WR5-1NP (NTSC) or WR5-1CP (PAL) (Ref. No. J-6).
- 6) Check to see that RF waveform is flat at input and exit sides on oscilloscope.
 - If it not flat, perform the following section 4-2 until it is flat.
- 7) After completing the adjustment, release the PATH mode (Track Shift mode).*.

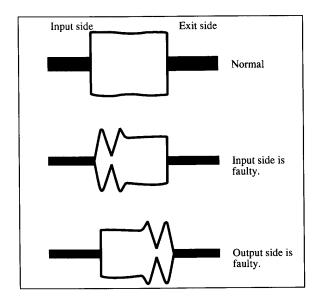

Fig. 26

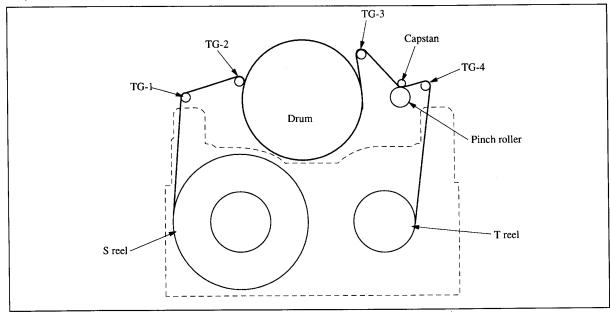

Fig. 27

- * How to enter and exit the Track Shift mode. (In the case of CCD-TR420E/TR440E) Entering the Track Shift mode
 - 1. Select page: 6, address: 00 set data: 01 and press the PAUSE button.
 - 2. Select page: 7, address: 01 set data: 03 and press the PAUSE button.

Exitting the Track Shift mode

- 1. Select page: 7, address: 01 set data: 00 and press the PAUSE button.
- 2. Select page: 6, address: 00 set data: 00 and press the PAUSE button.

4-2. Tracking Adjustment (Refer to Fig. 28.)

- 1) Playback the tracking alignment tape WR5-1NP (NTSC) or WR5-1CP (PAL) (Ref. No. J-6).
- 2) Adjust the tape guide No. 2 until the input side waveform becomes flat.
- Adjust the tape guide No. 3 until the input side waveform becomes flat.
- $\dot{\Sigma}$ Zenith adjustment screws for the TG-2 and TG-3 do not need to be adjusted.

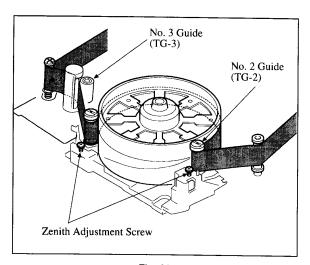

Fig. 28

4-3. No. 4 Guide (TG-4) Adjustment (Refer to Fig. 29.)

- 1) Playback a tape in REV mode.
- 2) Confirm that tape slack does not occur in between the guide No. 3 (TG-3) ① and Capstan ②. If tape slack is found, turn the height adjustment screw ④ of the Guide No. 4 (TG-4) ③ until tape slack is removed.
- 3) Playback a tape in FWD mode. Confirm that tape slack does not occur in between the guide No. 4 (TG-4) ③ and capstan
 ②. (Specification = 0.5 mm or less) If tape slack of more than 0.5 mm is found, turn the TG-4 nut ④ until the slack is 0.5 mm or less. Playback tape in REV mode and confirm that tape slack in between the guide No. 3 (TG-3) ① and capstan
 ② is 0.3 mm or less, the adjustment is complete.

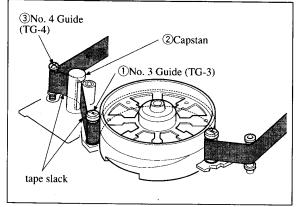

Fig. 29

4-4. CUE, REV Waveforms Check (Refer to Fig. 30.)

- Playback the tracking alignment tape in REV mode.
 Confirm that pitches between the peaks of the waveform are equally spaced for 5 seconds or longer.
 - The pitches are not equally spaced, perform sections "4-2. Tracking Adjustment" and section "4-3. No. 4 Guide Adjustment".
- Playback the tracking alignment tape in CUE mode.
 Confirm that pitches between the peaks of the waveform are equally spaced for 5 seconds or longer.
 - The pitches are not equally spaced, perform section "4-2. Tracking Adjustment".

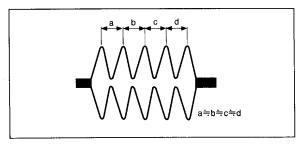

Fig. 30

4-5. Checks After Adjustments

4-5-1. Tracking Check

- Confirm that amplitude of the RF waveform decreases to about 3/4 when the machine enters the PATH mode. (Refer to Fig. 31)
- 2) Confirm that the minimum amplitude (EMIN) of the RF waveform is 65 % or more of the maximum amplitude (EMAX). (Refer to Fig. 32)
- 3) Confirm that the RF waveform does not have too much fluctuation. (Refer to Fig. 33)

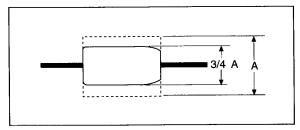

Fig. 31

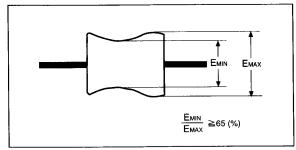

Fig. 32

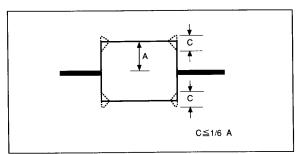

Fig. 33

4-5-2. Waveform Build-up Check (Refer to Fig. 34.)

- 1) Playback the tracking alignment tape.
- 2) Turn OFF the Track Shift mode.
- 3) Eject the tape once, insert and load the tape.
- 4) Start playing back the tape and confirm that the RF waveform builds up in three seconds with flat envelope. Confirm at this time that tape slack does not occur near pinch roller.
- 5) Playback the tape in CUE/REV and FF/REW modes respectively. Confirm that the RF waveform builds up in three seconds with flat envelope. Confirm at this time that tape slack does not occur near pinch roller.
- 6) Repeat the check items 3) to 5) again.

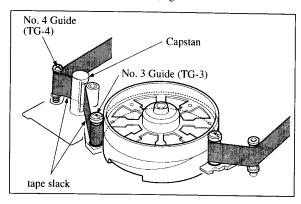

Fig. 34

4-5-3. Tape Pass Check (Refer to Fig. 35.)

- Insert a thin video tape such as P6-120MP (NTSC) or P5-120MP (PAL). Playback the thin tape. Confirm that there is no clearance or curl of 0.3 mm or more at the following points: Upper flange of guide No. 2, upper flange of guide No. 3, upper and lower flanges of guide No. 4.
- 2) Confirm that there is no clearance or curl of 0.3 mm or more at each tape guide when the FF button is pressed from the playback mode to enter the CUE mode, and when the REW button is pressed from the playback mode to enter the REV mode.
